

## From The Auxiliary

Candy-stripers came and worked. Each day there were many girls to do many duties. While the majority of girls were local, there were a couple of girls from Hillsboro, one from Butner, one from Henderson, one from Mebane, one from White Lake, one from Cherry Point, plus girls from Florida, Texas and Massachusetts. These 115 girls contributed 7265 hours of service cheerfully and eagerly.

As a reward, a swim party was held at the home of Mrs. O. E. Esval in Hope Valley. Some fifty girls came. The day was beautiful and the girls had a wonderful time. As a pleasant surprise, Mr. Frenzel dropped in. He presented the wallet cards which in-

dicate the number of hours of service to each girl. The hungry, thirsty group enjoyed the catered, light supper. As the girls left, the majority said they would be back next year.

Time will tell. We hope they will.

When the candy-stripers left, one doctor remarked that it would take a month to get over the loss of the help of the girls.

## Dining Room Re-opens

The staff dining room at Duke Hospital has been renovated to provide greater service capacity and a wider selection of foods. The \$60,000 three-month project, completed September 1, included installation of new cafeteria serving units, new furniture in part of the dining room rearrangement of serving lines, and re-decoration.

The changes have increased the serving capacity of the dining room from around 500 to 800 persons at each meal. The renovation was necessitated by increases in the number of Medical Center personnel served in the dining room.

The photo shows the cafeteria serving unit in the dining room. Service is speeded up by a double food line.
