Dean

Dr. William G. Anlyan, professor of surgery at Duke Medical Center and, since September, 1963, associate dean of the Medical School, will become dean on July 1.

Dr. WILLIAM G. ANLYAN

Dr. Barnes Woodhall who has served as dean since July 1, 1960, when he succeeded Dr. W. C. Davison, has been filling the post, also, of viceprovost of the University with responsibility for medical and health affairs. The associate deanship was created last fall to lessen some of this load. Dr. Anlyan's appointment as dean will allow Dr. Woodhall to devote full time to his duties as viceprovost.

Dr. Anlyan received his B.S. and M.D. degrees from Yale University. He took his internship and residency training at Duke and then became a member of the Duke medical faculty. Dr. Anlyan is one of several Duke medical faculty members who were awarded Markle Scholarships during their training period. His appointment as dean received the unanimous confirmation of his colleagues in the Medical Center.

Dr. Anlyan Appointed Engel Scholar Named

Charles H. Roe, June '64 graduate of Duke Medical School, is the recipient of the first Frank L. Engel Scholarship in Endocrinology. The Engel Scholarship was set up in honor of Dr. Engel. It is designed to further what had been a life-long interest for Dr. Engel: the recruiting of promising medical students for careers in endocrinology.

Dr. Roe will begin an internship in pediatrics in July at Duke Medical Center.

Supt's Corner

(Continued from page 2)

Drake, Cabell, Meyer and Prevost Wards will be disrupted by the tie-in. The Main Entrance will be eliminated early in the project and will not be replaced until the building is completed. Internal traffic patterns will be affected and the use of the OPC and PDC entrances as main accesses to the Hospital will cause much inconvenience to the PDC and other areas on all floors. External traffic patterns will change and parking and ingress habits will change with them.

The patience and good will of patients, visitors and staff will be well tested during this trying construction period.

From The Auxiliary

by PEGGY WARNER

On Saturday, May 16, the Auxiliary entertained its new crop of Candystripers at an informal party in Baker House lobby.

As most of you know, Candystripers are our teenage volunteers who will help fill the summer vacancies that result when many of our regular volunteers are away on vacation. These girls must be 14 years old or entering their sophomore year in high school. Duty on the wards, however, will be limited to 16-year old girls who have completed the required orientation course held June 9th through June 11th. Very close supervision will be given those girls who are allowed such direct patient contact, and, of course, each girl must obtain the consent of her parents before entering the program.

In addition to working on our regular Auxiliary services when adult volunteers vacation, the Candystripers will serve in various clinics of the hospital as well as on the wards. They may also fill positions in the Post Office, in the Clinical Research Unit, and at the desk of the Emergency Room. Volunteers 14 to 16 years of age may give a half-day at a time, three days a week for a minimum of four weeks during the summer. The 16- to 18-year old Candystripers may give as much as four full days each week, but a minimum of one full day or two half-days each week is required. Mary Daugherty explained, "The reason for requiring minimum hours of service is to justify the amount of time required of regular staff in providing training and supervision.'

Auxiliary members, hospital staff and patients welcome the sight of these candy-striped pinafores and the fresh, sparkling faces that help assure our program's smooth, efficient operation during the summer months.
