

ACCOLADE

"FOR THIRTY YEARS OF DEDICATED SERVICE..."

With these words, fifty-five members of the Medical Center Staff were honored at a luncheon on November 3, 1964. Dr. Hart, in addressing the group, recalled the "early days" of the Medical School and hospital. Dr. Woodhall presented each person with a gold pin and certificate in recognition of his loyalty and contribution to the needs of the young Medical Center. He is shown here extending congratulations to Mr. Clarence Cobb, Business Manager of Medical PDC.

INTERCOM is proud to present the original members of the Medical Center Thirty-Year Group:

Dr. W. B. Anderson, Sr.
 Dr. Edwin P. Alyea
 Dr. Jay M. Arena
 Miss Lillian H. Atkins
 Miss Marion F. Batchelder

 Mrs. Lillian Trevathan
 Miss Mozella Vestal
 Miss Nina Waite
 Mr. Charlie M. Wall
 Mrs. Durema Wetmore
 Mr. Herbert Williams

We look forward to many more pleasant years of service with these fine people.

Administrative Director's Corner

by CHARLES H. FRENZEL

Thirty years is a short time in the life of an institution or organization but it represents the major part of the productive life of an individual. When thirty years of an individual's talents are given to the first thirty years of an organization, they are particularly meaningful as they tend to set the pattern and the rate of progress of the enterprise. We are especially grateful, therefore, to the over 50 staff members who completed thirty years of service to the medical center prior to October 1 of this year. Of only slightly less impact is the service of over twenty years given by over 80 staff members honored at a ceremony December 3. The contributions of these two groups will have a lasting effect upon the image of the Duke University Medical Center.

To those of us who have joined the medical center family more recently, these colleagues have given an example, a heritage, and a challenge to continue the progress for our medical center that they have begun so well. I can only pity the members of our staff whose lack of interest or whose selfish interest does not permit them the pleasure of having pride in the accomplishment or excitement in the future of their institution.

I would like to take this opportunity to thank all who expressed concern and well wishes during my recent illness. Happily, my illness was minor and at this writing I am back in full harness, hopefully having learned from the experience.
