

Miss Bernice Belue, director of Occupational Therapy at Duke since the summer of 1961, has accepted a position at the University of Alabama Medical Center as an occupational therapy supervisor in the Spain Rehabilitation Center. She will assume her new position in Birmingham in April. The "in-between" months will be spent in travel. The first two weeks of December she spent in Aspen, Colorado, skiing.

After the first of the year she will go abroad for three months, flying first to Grindellwald, Switzerland (in the section of the Alps known as the Bernese Oberlen), for several more weeks of skiing. Most of her traveling will be done in Germany and Switzerland, where in addition to "touring" Miss Belue plans to visit some of the well known treatment centers that interest her professionally.

### Overheard on Local Radio Station

Listener to station's weatherman: Good morning. I'm calling from Durham County, and I thought you ought to know that I've just finished shovelling three inches of 'partly cloudy' off my front steps!"

An open house honoring all new staff members in the departments of Dietetics, Nursing Service, Occupational Therapy, and Physical Therapy was held in October by the four departments. Above, left, dietitians Carol Peters and Betty Sue Hensley are served punch by Miss Gertrude Elliott, Ob-Gyn nursing supervisor. At right are Sandra Herzog, a student in Physical Therapy, and Libby Russell, an occupational therapist. The open house, held each fall by the departments, gives new staff members an opportunity to get to know each other better and to meet the department heads and senior staff.
