

AV Promotes 2

Two promotions in the division of audiovisual education have been announced by Director Sam A. Agnello.

Wayne C. Williams, coordinator of medical photography since 1966, has been promoted to assistant director of the division. He will retain his former title until another coordinator can be selected.

Mr. Williams, a graduate of the University of North Carolina at Chapel Hill with a B. A. degree in zoology, formerly worked as a medical illustrator with Dr. J. E. Markee of the Department of Anatomy.

Michael E. Wayda has been promoted to coordinator of medical television in the division. He had formerly been associate coordinator.

Mr. Wayda earned his master's degree in communications at the University of Florida.

Mrs. Dorothy Corona
Associate Professor of Nursing
Arizona State University

Dr. Louis Rubin
Director, Center for Coordinated Education
University of California, Santa Barbara

Dr. Marlene Kramer
Associate Professor of Nursing
University of California, San Francisco

NURSING

These three experts in the field of nursing were some of the main speakers at a nationwide symposium on nursing curriculum development sponsored by the Duke School of Nursing August 25-29. More than 120 persons, including many deans and assistant deans of schools of nursing, attended from 70 colleges and universities in 35 states, the District of Columbia and Puerto Rico. Dr. Kathryn Crossland, a professor in the graduate division of the Duke School of Nursing, was one of the principal instructors. Miss Patricia A. Lawrence, assistant professor of nursing at Duke, was project director. (staff photos)

Given Research Grant

Dr. Myron L. Wolbarsht, professor of ophthalmology and director of ophthalmic research at the Medical Center has been awarded a \$2,000 grant from the National Society for the Prevention of Blindness, Inc.

The grant will enable Dr. Wolbarsht, in collaboration with Dr. P. P. Lele of the Department of Experimental Medicine at the Massachusetts Institute of Technology, to investigate whether ultrasonics can be used to disrupt retino-vitreous adhesions that often form in adults. Such adhesions frequently cause retinal detachment and blindness.

The grant is effective for one year.

Lang Gets Fellowship

A Duke resident in orthopaedic surgery has been appointed to a six-month clinical fellowship by the United Cerebral Palsy Research and Educational Foundation, Inc.

Dr. Stephen Lang, who begins his fellowship October 1, will work with specialists in the field of cerebral palsy both at Duke and at the N. C. Cerebral Palsy Hospital in Durham.

Dr. Lang came to Duke after earning his M. D. from the University of Illinois and serving his internship at Cook County Hospital in Chicago.
