

## Faculty Wives Establish Permanent Scholarship

The Medical School Faculty Wives Club at Duke University has established a permanent endowment to provide scholarships for medical students from its Nearly New Shoppe.

The group, consisting of about 150 members, voted October 29 to donate \$10,000 to set up the fund, with hopes that the interest income from it eventually would provide a full scholarship each year.

The club founded the Nearly New Shoppe, a used merchandise mart on Erwin Road, a year and a half ago to furnish inexpensive clothing and household items for low-income families. Articles are either donated or taken on consignment with the seller receiving half the sale price on consigned items.

Profits from the first few months of business at the shop were given to the Medical Center last year to sponsor a full tuition scholarship for a medical student for each of his four years at Duke. This is in addition to the new gift.

The new endowment will be known as

the Medical School Faculty Wives of Duke University Scholarship Fund, and scholarships from it will be available to North Carolina students only.

"We want to show the people of North Carolina that we are concerned citizens striving to ease the problems of getting a medical education in these times of rising costs and expectations," Mrs. Richard Lester, proposal committee chairman, said.

The decision to establish the scholarship fund was the result of meetings between the four-member proposal committee and everyone from Dr. William G. Anlyan, vice president for health affairs, to the medical students themselves.

Mrs. Lester noted that if the club continues the present level of adding to the fund, enough income to support a full scholarship could be expected in about four or five years.

Assisting Mrs. Lester in preparing the scholarship proposal were Mrs. Philip Pratt, Mrs. Glen Young, and Mrs. Robert Hill, with Mrs. Robert Whalen, club president, as an ex officio member.

## EEG Meetings Held in Durham

Durham was the site of four meetings for health care personnel involved with electroencephalography the last week in October.

A two-day review course for electroencephalographic technologists from all over the eastern U. S. was held October 29-30 at the Medical Center. Approximately 45 EEG technologists were at Duke for the postgraduate course.

Also on October 30, Duke hosted the American Board of Registration for EEG technologists from throughout the country who were applying for national certification. Three registered Duke technologists and four Duke M. D.'s served as associate examiners for the session.

A one-day meeting of the Southern Section of EEG Technologists was held October 31 at the Durham Hotel. Mrs.

Fay S. Tyner, a registered EEG technologist and chief technologist at the Medical Center, was convention chairman.

Perry Hope, a registered EEG technologist at Duke, presented a paper on electrocorticography and epilepsy.

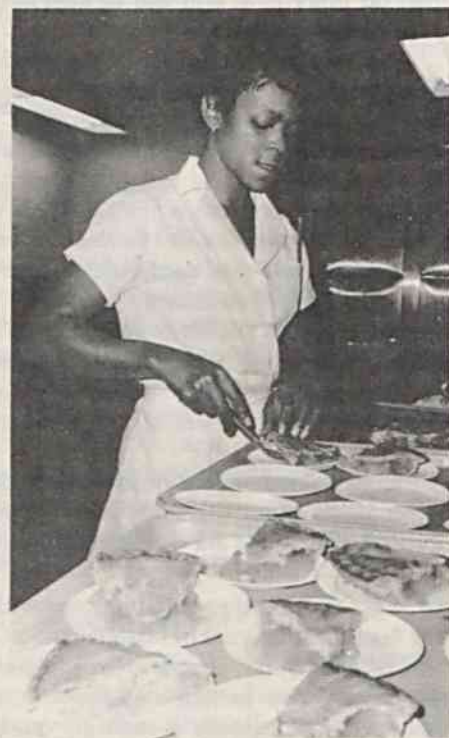

November 1 and 2 were the dates for the annual meeting of the Southern Electroencephalographic Society held in Durham. Dr. Robert L. Green, Jr., associate professor of psychiatry at Duke and chief of psychiatry at the Veterans Administration Hospital, was program chairman for the convention.

Dr. Green, who is now president of the society, Dr. William P. Wilson, professor of psychiatry and director of clinical neurophysiology at the Medical Center, and seven other Duke faculty members presented scientific papers at the session.
