VOLUME 18, NUMBER 26

JULY 9, 1971.

DURHAM, NORTH CAROLINA

STUDENT NURSES HERE FOR THE SUMMER—The girls pictured above are among 34 student nurses participating in a two-month work program at the Medical Center. Receiving instruction in the medication room from RN Mrs. R. Ferguson are, from left to right, Elaine Truitt, Marsha Hallman, and Wanda Hall. Miss Truitt and Miss Hallman are Duke students; Miss Hall is from the University of North Carolina at Greensboro. (photo by Lewis Parrish)

34 Student Nurses Participating In Duke Summer Work Program

Thirty-four student nurses are participating in a special work program at the Medical Center this summer. Initiated last year, the two-month program provides a summer income as well as practical experience and educational opportunities.

The students are all rising seniors in bachelor degree programs. For the first time this year the participants include girls from schools other than Duke.

Assigned to patient care areas throughout the Hospital, the students are working as professional nurse assistants. Supervisors are planning various types of learning opportunities to meet the students' interests. Educational programs and special classes are also available for them.

The Duke students participating in the program are Carolyn Ames, Nancy

Beetham, Barbara Borshay, Patricia Briggs, Dorothy Brower, Betts Carpenter, Erica Caruso, Brenda Corley, Janet Finklea, Jean Francis, Marsha Hallman, Gayle Harris, Barbara Harrod, Cathy Harton, Elizabeth Hensleigh, Sue Iddings, Ruthanne Lamb, Martha Reese, Jane Rippe, Ellen Smith, Kathi Stertzbach, Lou Summers, Carol Taaffe, Margaret Thompson, Gale Touger, Elaine Truitt, Caroline Varner, Ellen Wenzel, and Elizabeth Willis.

The five student nurses from other schools are Carol Bradford from Winston-Salem State University, Rhonda Engle from Florida State University, Billi Phillips from Indiana State University, and Wanda Hall and Martha Reeves from the University of North Carolina at Greensboro.

Newly Built Parking Lot For Employees

Employees who work in one of the Research Park buildings or at the Vivarium now have the option of parking in a newly constructed lot between those buildings and Erwin Road.

The lot is actually an access road which has been paved and striped to provide nearly 100 parking places along one side. In addition, a large area between the Vivarium-Research Park complex and the Biological Sciences Building has been cleared and graveled to provide parking for more cars.

A sidewalk and steps connecting the lot with the buildings should be completed in the next week or two.

When all parts of the new lot are finished, parking will be prohibited along the roads fronting the Research Park buildings. At present, parking on both sides of those streets presents a hazard to fire trucks and garbage disposal units.

The total cost of the new lot was \$42,000.

Using Your New ZIP?

Last week the Medical Center changed to a new ZIP code—27710.

The new number should be used by anyone who receives his mail through the Medical Center mail room.

The rest of the University West Campus, including Hanes House and the Graduate Center, will continue to use 27706, and the East Campus ZIP will continue to be 27708.

The separate ZIP Code for the Medical Center is expected to facilitate the handling of mail and eliminate slow-downs in delivery.
