## Six Academic Promotions Announced

University Provost Frederick N. Cleveland has announced six faculty promotions at the Medical Center. The academic changes came in the Departments of Medicine, Community Health Sciences, Radiology and Psychiatry.

Two faculty members rose to associate professors in the Department of Medicine. They are Dr. Jerome Feldman and Dr. C. Craig Tisher.

Dr. Feldman, a 1961 graduate of Northwestern University Medical School in Chicago, received his postdoctoral training at Michael Reese Hospital and Medical Center in Chicago. He came to Duke in 1967 as a research fellow in endocrinology and was named associate in medicine in 1968 and assistant professor in 1970.

He is presently director of the Duke Diabetes Clinic and chief of the endocrine service at the Durham VA Hospital.

Dr. Tisher received his M.D. degree and postgraduate training at Washington University School of Medicine and Barnes Hospital in St. Louis, Mo. In 1969 he was appointed assistant professor of medicine and pathology at Duke. He retains the latter title.

New assistant professors are Drs. Marjorie A. Boeck, Gale B. Hill, Gail R. Marsh, and Byron D. McLees.

Dr. Boeck, formerly an associate in community health sciences, was promoted to assistant professor in the department. She earned a doctorate in education psychology at the University of Minnesota in Minneapolis in 1970 and came to Duke the following year. She is also assistant to the director of education, research and development at Duke.

Dr. Hill was promoted from an

associate in radiology to assistant professor in the department. She is also a research associate in microbiology and immunology. She earned a Ph.D. in microbiology at Duke in 1966.

Dr. Marsh, named assistant professor of medical psychology in the Department of Psychiatry, earned a master's degree in psychology at Brigham Young University in 1962 and a doctorate in physiological psychology at the University of Iowa in

1968. The following year he was appointed associate in medical psychology at Duke.

Dr. McLees, promoted in the Department of Medicine, received a Ph.D. in physiological chemistry at Johns Hopkins University in 1964. He then came to Duke for his medical degree, internship and residency. He was named an associate in medicine at Duke in 1967 and chief medical resident in 1971.

**NEW ARCHITECT**—Larry D. Nelson has joined the Hospital staff as the first Medical Center Architect. He is working under Louis E. Swanson, director of the Planning Office. In his new position Mr. Nelson is designing CR3, clinical cancer research facility, for funding purposes. He will also be involved in the planning of hospital expansion and all other projects related to the development of the Medical Center. Mr. Nelson received his B.S. degree in architecture at Idaho State University and is presently a member of the American Institute of Architects. For the past three years he has worked at the firm of Vosbeck, Vosbeck, Kendrick, Redinger-Architecture, Engineering and Planning in Alexandria, Va., in the positions of office manager and project architect. During this time he was involved in the planning of Culpeper Medical Center, Petersburg General Hospital and Thomas Jefferson Junior High and Community Center. The latter project was named one of the top six designed schools by the American Association of School Administrators.
