SEPTEMBER 26, 1975

DURHAM, NORTH CAROLINA

## Four Administrative Promotions Announced

Four administrative promotions have been announced at the hospital.

Robert G. Winfree, former assistant administrative director of the hospital, has been named acting assistant vice president for health affairs.

James G. Carter, former administrator of Highland Hospital, Duke's 134-bed psychiatric facility in Asheville, has been appointed assistant administrative director here.

Michael Layfield, former business manager of the Division of Nuclear Medicine, is the hospital's new assistant administrator for patient services.

And William G. Slebos, who was a wage and salary analyst here before his promotion, has been named to succeed Layfield as business manager of nuclear medicine, a branch of the Department of Radiology.

Winfree, who assumed his previous position in April of 1972 and has served on the hospital's administrative staff since 1971, will take over the duties of assistant vice president Dr. Jane Elchlepp while Dr. Elchlepp is on a six-month sabbatical leave.

As acting assistant vice president, the 1971 University of Iowa master's degree recipient in hospital and

health administration will have responsibility for medical center space management and planning activities related to Duke's ongoing hospital modernization and expansion program. In addition, he will continue his work on the computer patient information system, legal affairs, hospital accreditation, utilization review and medical audit.

Born in Buenos Aires, Argentina, to U.S. Foreign Service parents, Winfree earned his B.A. degree in economics from Gettysburg College in Pennsylvania in 1965 and spent four years in the U.S. Air Force Medical Service Corps in numerous hospital administration positions.

Carter will serve as administrator for the eight hospital wards which make up the medical and medical specialty units, the Pharmacy Department, Physical Therapy, the Blood Bank, patient equipment and the Department of Anesthesiology.

He had been administrator at Highland Hospital since 1970, transferring there from a job at Duke as unit administrator for the Department of Obstetrics-Gynecology and related services. Prior to his appointment here in 1969, he was director of King's

Business College in Raleigh.

Carter is a 1950 graduate of Morris Harvey College in Charleston, W.Va. He completed Duke's Health Administrators Management Improvement Program (HAMIP) in 1971 and he is currently working toward a master of public health degree at the University of North Carolina.

Layfield will have responsibility for the hospital's General Surgical Unit, departmental laboratories and the Discharge Unit. He is a 1971 graduate in management of Columbus (Ga.) College and a 1975 graduate of HAMIP.

Before being named business manager of Nuclear Medicine in 1973, he was an internal auditor at Duke. Layfield is currently president of the Raleigh-Durham chapter of the Institute of Internal Auditors.

Slebos worked as employment representative and wage and salary analyst with the Personnel Department of the medical center before joining nuclear medicine. Prior to that, he spent four years, from 1971 to 1974, as a teacher in Nashville, N.C. and several years as branch manager of the Wachovia Bank and Trust Co. in Durham and as a personnel analyst at Duke.

## Moylan Tapped as Trauma Director

Duke Hospital, which treats nearly 40,000 emergency cases a year, has brought in a specialist in trauma (injury) who will direct an expanded, comprehensive emergency treatment program.

He is Dr. Joseph A. Moylan Jr., who was director of the Emergency Medical Service Program at the University of Wisconsin Center for Health Sciences before his appointment here this month.

Moylan also was co-director of the Center for Trauma and Life Support

there and was chief of the University of Wisconsin Burn Unit.

His appointment was announced by Dr. David C. Sabiston, chairman of the Department of Surgery.

"Over the past several years," Sabiston said, "the field of surgical trauma has evolved as a definite entity. Specialists in trauma have begun to appear, and Dr. Moylan is a nationally recognized leader in that field."

Moylan will be surgeon-in-charge of the Emergency Department and director of the new Surgical Trauma Program in the Department of

Surgery. He is an associate professor of surgery.

Sabiston said that Moylan will head a Trauma Unit which will be established within the hospital and will contain special equipment for the treatment and monitoring of injured patients on a moment-to-moment basis, similar to Duke's cardiac care and acute care units.

Moylan, a 37-year-old native of Hartford, Conn., describes trauma as "an act of physical violence producing an injury to the body. It's the fourth major cause of death in the United States and the leading cause

of death between the ages of 4 and 40."

Because of the age group affected, Moylan said, "trauma afflicts the most productive part of our population."

Treatment of trauma is not just something that takes place in an emergency room, the new director said.

"It's obvious," he stressed, "that the care of people in trauma must begin prior to their coming to the hospital — at the scene of the accident or injury and while en route."

Over the next several months

## Kinney Honored By Pathology Group Receives Distinguished Service Award

Dr. Thomas D. Kinney was honored at a Chicago banquet Wednesday night by the American Society of Clinical Pathologists and the College of American Pathologists.

He received the ASCP-CAP Distinguished Service Award for outstanding contributions to American pathology.

Kinney is R. J. Reynolds Professor of Pathology, chairman-emeritus of the Department of Pathology and former director of medical and allied health education.

He was cited as a man "who has attained national recognition as an experimental pathologist, medical educator and medical editor." He has been editor-in-chief since 1967 of the *American Journal of Pathology* and he was the first editor of *Laboratory Investigation*.

A news release from the joint organizations noted that:

"Under his direction from 1960-75, the Duke pathology department attained an international reputation for the quality of its

research, its teaching and its graduates, many of whom are now making reputations for themselves in medical schools and hospital laboratories throughout the country.

"Under his administration (as director of medical and allied health education, from 1969-74), the Duke medical school's new and innovative curriculum became firmly established and a new Division of Allied Health Education was created...."

The ASCP-CAP noted that Kinney
