

GREG MORRIS

See Stars for Reduced Price

You still have a chance to see a host of celebrities for only \$3, but you'd better hurry.

Advance tickets for Duke's Children's Classic, May 29-30, are available at \$3 for adults and 75 cents for children. The price is \$5 on the days of the tournament.

Tickets are available from the Department of Pediatrics office, 228 Baker House, as well as the Wachovia Bank, the indoor stadium and the golf course.

To Make Mission: Possible

Greg Morris, a three-time Emmy nominee for his role in "Mission: Impossible," is the latest addition to the long list of stars who will attend the celebrity golf tournament.

Transplants

(Continued from page 1)

Christiansen made arrangements to fly to New York, Phillips and UNC transplant technician Ralph Pickett arranged to fly there also with the kidneys aboard a plane chartered from the UNC School of Medicine.

Keeping Them Alive

The kidneys were transported in a kidney perfusion machine, which Duke transplant surgeon Dr. Del Stickel calls "a miniature heart-lung machine" because it keeps the organ alive and functioning by pumping oxygen and human plasma through it.

The men from Duke met Christiansen at Kennedy International Airport where the Dane took over the Duke machine and left for Copenhagen by commercial airliner at 6:15 p.m. Monday.

On Tuesday morning, Herlev Hospital in Copenhagen reported to Duke that the kidneys, which had arrived in excellent condition, had been transplanted into two women, ages 31 and 43, and that they had begun functioning immediately.

Worldwide Network

It was the first time, the hospital said, that kidneys that had been placed through Eurotransplant had been flown from the United States on a perfusion machine. Kidneys have been transported packed in ice.

In a television interview later in the day, the procurement team director, Duke urologic surgeon Dr. John Weinerth, said the experience and the apparently successful transplantation "opens up the organ-sharing network worldwide."

Anyone wanting information about becoming a future donor may contact the Kidney Foundation of North Carolina, Box 2383, Chapel Hill 27514. The phone number in Chapel Hill is 929-7181.

Students Still Give Apples to Their Teachers

Students in the School of Medicine have selected this year's recipients of Golden Apple Awards, presented annually for excellence in teaching.

They are Dr. David C. Sabiston, professor and chairman of surgery; Dr. Bernard F. Fetter, professor of pathology who also won a Golden Apple in 1970; and Dr. Linda A. Clayton, obstetrics-gynecology resident.

The Golden Apple Awards are given to outstanding educators in clinical sciences, basic sciences and house staff categories. Winners are selected by a vote of all medical students at Duke.

He is joining such stars as Perry Como, Chet Atkins, Mickey Rooney, Whitey Ford, Peter Lind Hayes, Mary Healy and Jack Albertson for this fourth annual event.

Tickets to the banquet and star-studded Night Club Review on May 29 are available, for the first time to the public, for \$50 per person.

They may be obtained from the pediatrics office, from members of the Durham Jaycees or by calling 286-1605 or 286-9409.

Community Help Includes TV

The Jaycees also have advance tournament tickets for sale as do all area Record Bars, Durham Sporting Goods, Holt Sporting Goods and most area high school booster groups.

All proceeds go to help fight children's diseases.

The Classic will be discussed in more detail on the television program, "North Carolina People," next week.

Dr. Samuel L. Katz, W.C. Davison professor and chairman of pediatrics, and R.C. "Bucky" Waters will be interviewed by UNC President William Friday on this show which will be aired Sunday at 6 p.m. and Tuesday at 7:30 p.m. on WUNC-TV (channel 4).

HANGING AROUND DUKE — About 50 children, ages 5-12, will be able to participate in the fourth annual Duke Summer Daycamp, beginning June 20. Parents may enroll their children on a weekly basis, but are encouraged to register for at least three weeks. Some scholarships will be awarded on the basis of need. Activities will be structured around weekly topics, including work, money, nature, ecology, countries and customs and roots. For application information, contact Peter Strimer, 914 W. Markham Ave., phone 682-5317.

Sabiston

Sabiston, this year's clinical sciences winner, is a native of Onslow County, N.C. He graduated from the University of North Carolina in 1943 and from the Johns Hopkins University School of Medicine in 1947.

He was professor of surgery at Hopkins in 1964 when he was invited to join the faculty at Duke as chairman of surgery. He was appointed James B. Duke professor of surgery in 1971.

He is editor of the *Davis-Christopher Textbook of Surgery* and co-editor of *Surgery of the Chest*, two of the most widely read medical texts used in this country and abroad.

Sabiston was recently elected president of the American Surgical Association, the oldest and most prestigious society of surgeons in the United States.

Fetter

Fetter, the winner in the basic sciences category, earned an A.B. degree from Johns Hopkins in 1941 and his M.D. from Duke in 1944.

He returned to his home state to begin his pathology residency at the V.A. Hospital in Fort Howard, Md., 1947-50, and completed the residency at Duke in 1953.

Fetter was an associate in

pathology from 1953 until his appointment to the faculty as assistant professor in 1955. He was promoted to associate professor in 1959, and professor in 1967.

The past chairman of the N.C. Society of Pathologists serves as consultant in pathology for Womack Army Hospital, Fort Bragg, and the V.A. Hospital here.

Clayton

Voted the top teacher among residents, Clayton is from Timberlake, N.C., and received a B.S. in chemistry from North Carolina Central University in 1971.

She earned an M.D. from Duke and began her residency in obstetrics-gynecology here in 1975.

Golden Apple winners receive individual plaques from the Davison Society, Duke's medical student government organization, and have their names inscribed on a permanent plaque in the School of Medicine.

In selecting the recipients, all medical students were given the opportunity to suggest five teachers for each category.

The five named the most in each group became the nominees, and each student could then vote for his or her first choice in each of the three categories. This is the 14th year for the awards.

Professional News

Dr. Rebecca H. Buckley, professor of pediatrics and immunology, has been chosen president of the Southern Society for Pediatric Research.

Dr. Montague Brown, professor of health administration, has been appointed to the Advisory Panel on Multi-Hospital Systems by the American Hospital Association, (AHA). The purpose of this panel is to advise AHA on education, research, services and representation issues related to hospital management systems.

James A. Bobula, assistant professor of family medicine, was coordinator of a pilot teacher training workshop for Directors of Family Medicine Programs, March 13-16, at Quail Roost Conference Center.

The Family Medicine Program of Duke University and Durham County General Hospital received a contract from the Society of Teachers of Family Medicine to conduct the workshop, which focused on basic instructional design, teaching skills, resident evaluation and counseling, primary care research and program budget management.

Thirty faculty members from 15 states were selected to participate.

Third year medical student Jack Rutledge has been elected vice president of the American Medical Student Association.

His election came at a meeting of the organization in Chicago in April.

Dr. Carol Hogue, associate professor in the School of Nursing, presented a paper on "The Epidemiology of Accidents in Older Age," at the Second Conference on the Epidemiology of Aging, jointly sponsored by the National Institute on Aging and the Epidemiology Branch of the National Heart, Lung and Blood Institute, Washington, D.C., March 28-29.

Dr. Robert McLelland, associate professor of radiology, was director and moderator of a tutorial course on "Radiology of the Bones and Joints" at the Downtowner Motor Inn in Durham, March 28-April 1.

Other radiology faculty from Duke were Drs. Richard H. Daffner, assistant professor, Salutaris Martinez, assistant professor, and James C. Reed, associate professor. Radiologists from the United States, Canada and England participated.

Dr. Ralph Snyderman, associate professor of medicine, chief of the Division of Rheumatic and Genetic Diseases and a Comprehensive Cancer Center faculty member, presented a paper of "Leukotactic Dysfunction in Cancer" at the Federation of American Societies for Experimental Biology annual meeting in Chicago, April 4.
