

(Continued from page 1)

Institute of Surgery at Warsaw Medical School.

The program on Wednesday, Nov. 2, will be at UNC, chaired by Dr. Fordham, and will be titled, "The Role of the Medical School in Health Care Delivery." Sessions, in the Carolina Room of the Carolina Inn, will include:

9-9:30 a.m. - "The Washington-Alaska-Montana-Idaho (WAMI) Program" by Dr. Roy Schwarz, associate dean at the University of Washington School of Medicine.

9:30-10 - "The Role of the University of Indiana School of Medicine in Graduate Medical Education and Health Care Delivery" by Dr. Steven C. Beering, dean of the University of Indiana School of Medicine.

10-10:30 - "The North Carolina Area Health Education Center (AHEC) Program" by Glenn Wilson, associate dean for

community health services, UNC School of Medicine.

10:30-10:45 - Break

10:45 a.m.-12:15 p.m. - Panel discussion by Dr. Emory Miller, associate dean for continuing education at the Bowman Gray School of Medicine, Dr. Edwin Monroe, vice chancellor for health affairs at the East Carolina University School of Medicine, and Dr. Lawrence M. Cutchin, president and AHEC director, Health Education Foundation of Eastern North Carolina, Inc., in Tarboro.

12:15-1:30 - Luncheon

1:30-5 - "Objectives and Contents of Undergraduate Education for Primary Care" by Prof. Z. Kobielowka and Dr. W. Tysarowski, professor and director of the Department of Education and Health Information Centre, Warsaw; and "Specialization and Continuing Education for Primary Care" by Dr. B. Lewartowski, professor and director of the National School for Postgraduate Medical Education, Warsaw.

The program on Thursday, Nov. 3, will be in the Medical Center Board Room, chaired by Dr. John A.D. Cooper, president of the Association of American Medical Colleges, and will be titled, "Training for Primary Care." The sessions will include:

9-9:30 a.m. - "Overview and Pediatric

Approach to Primary Care" by Dr. Joel Alpert, chairman of the Department of Pediatrics at Boston University.

9:30-10 - "Internal Medicine Approach to Primary Care" by Dr. Thomas Delbanco, director of the Ambulatory Care Center at Beth Israel Hospital in Boston.

10-10:30 - "Family Practice Approach to Primary Care" by Dr. Robert Raketel, chairman of the Department of Family Practice at the University of Iowa.

10:30-10:45 - Break

10:45 a.m.-Noon - "Research in Primary Care Training" by Dr. Charles Lewis, professor of medicine at the University of California, Los Angeles.

Noon-1:30 p.m. - Luncheon

1:30-3 p.m. - Panel discussion on "Non-Physician Health Care Provider" by Dr. Robert Greenberg, associate professor of pediatrics at UNC; James Bernstein, chief of the Office of Rural Health Services, Raleigh; Mrs. Betty Compton, family nurse practitioner from Prospect Hill; and a Duke physician's assistant, Valerie Staples.

3-3:15 - Break

3:15-4 - "Report of U.S. Observer on Polish Training for Primary Care" by Dr. Robert Kalinowski, senior program consultant with the Robert Wood Johnson Foundation.

4-5 - Summing up and final discussion.

Friday's session will be a visit to the Tarboro AHEC. On Saturday the delegation will visit an AHEC directed by the Bowman Gray School of Medicine at Wake Forest University in Winston-Salem and will be guests at the Duke-Wake Forest football game in the afternoon.

Use of CHEP model 'facilitated'

By John Becton

A lay advisor approach, which a medical center outreach program applied effectively to health education, is now being used by the City of Durham in a federally funded housing program.

The concept is the brainchild of Dr. Eva J. Salber, professor of community and family medicine, and was the basis for the Community Health Education Program (CHEP), conducted for three years by the Division of Community Health Models, of which Salber is director.

"Facilitators," people to whom others turn for help and advice, were identified by CHEP and given health education training.

Now the community models division has entered into a contract to provide consultation as the city identifies and trains "housing facilitators" in three target areas.

The training sessions, which began Oct. 18, are covering topics such as the role of the facilitator, housing laws, supportive services and community organization.

The Durham program is one of a number of adaptations of the CHEP model. CHEP was established in 1972 as a pilot program to document that facilitators do exist and that they can be used effectively in disseminating health information to their communities.

The program gained national and international attention and has drawn inquiries from at least 30 states, including Alaska and Hawaii, and from Canada, New Zealand, Thailand, South Africa, Nigeria and West Germany.

The story of the three-year project is the subject of a book published this month by the Department of Community

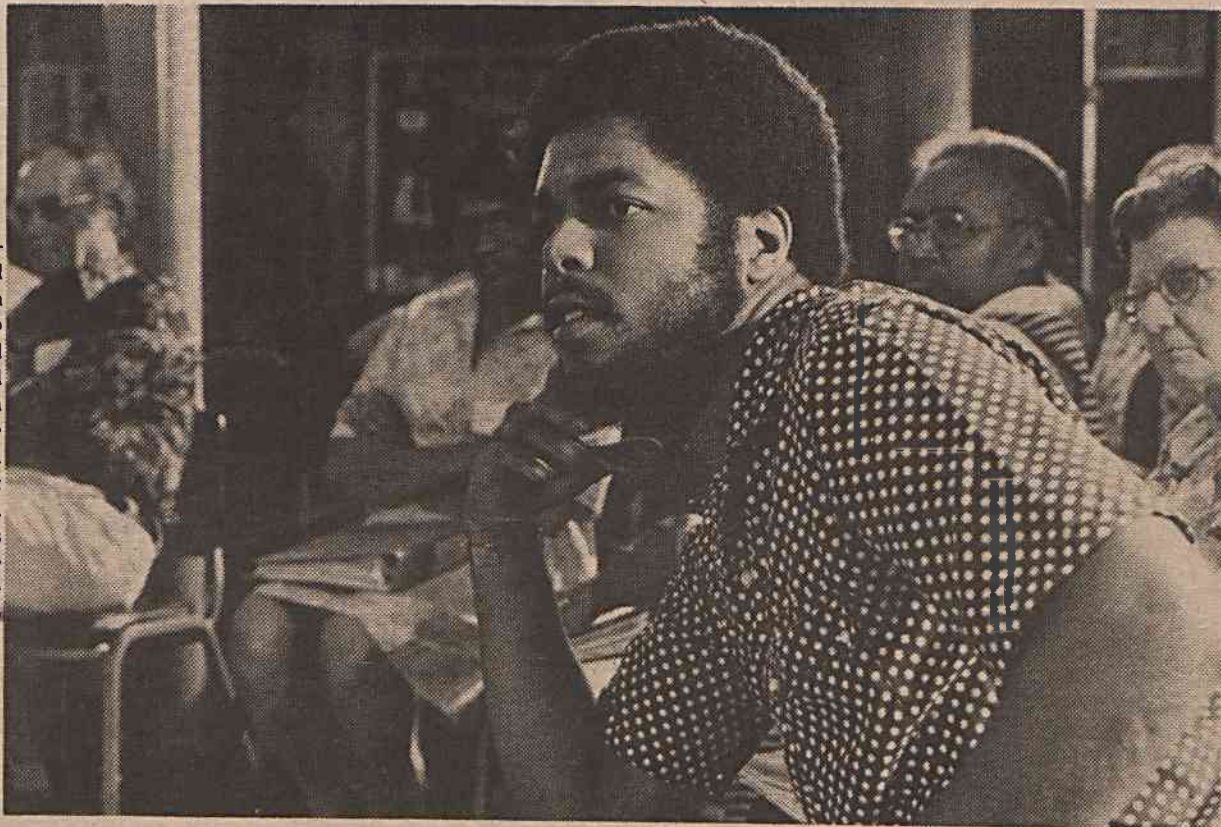

and Family Medicine.

The book, *Community Health Education: The Lay Advisor Approach*, was designed as a manual for others setting up similar programs.

It was edited by Salber and Connie Service, CHEP's associate director for administration.

Grants from the Edna McConnell Clark Foundation of New York City funded the CHEP project and the book.

A HEALTH FACILITATOR - Identified as someone to whom others turn for help and advice, Nathaniel McDaniel participated in a training session conducted by the Community Health Education Program. At that time he was a PCA on Duke West I. This fall he entered the Physician's Associate Program. (Photo by John Becton)

BICP class on tour

A group of students from Harnett Central High School in Angier are touring the medical center today. They are participants in the Biomedical Interdisciplinary Curriculum Project (BICP), which was begun this fall by Duke, the Fayetteville Area Health Education Foundation and the N.C. Department of Public Instruction (see *Intercom*, 9/9/77).

BICP classes from other schools will be our guests on the next two Fridays.

Improvement

In 1492, Columbus left for India and landed on the Bahama Islands. And everything he left with remained with him.

In 1977, when you leave for India, you land in India, but your luggage ends up in the Bahamas.

And people believe there has been an improvement in transportation.

Professional news

"Use of Transcutaneous Electrical Stimulation in the Management of Chronic Pain Syndromes," by Dr. J. Leonard Goldner, professor and chief of the Division of Orthopaedic Surgery, and Paul C. Hendrix, P.A.C., is included in *Current Concepts in the Management of Chronic Pain*, published this fall by Symposia Specialists, Miami, Fla.

The paper was presented last year by Hendrix at a Post-doctoral Pain Symposium at the University of Delaware.

CRNAs Scottie Crowder, Jonelle Mansfield, Lawrence Stump and Loretta Umbarger, attended the 44th Annual Meeting and Professional Sessions of the American Association of Nurse Anesthetists (AANA), Aug. 21-25, in Hollywood, Fla.

The five-day national meeting covered all phases of nurse anesthesia practice, including sessions on clinical anesthesia, EKG cardiology, anesthesia department management, and other health care and governmental agencies that impact on the profession.

It was the largest meeting in the association's history, and drew more than 2,000 participants.

The AANA, founded in 1931, is the professional organization of some 18,000 registered nurses who have had up to two years graduate training at accredited schools of nurse anesthesia and have passed a national qualifying examination. CRNAs administer approximately 50 per cent of the anesthesia in the U.S.

Dr. Ruby L. Wilson, dean of the School of Nursing, is one of 67 new fellows formally admitted to the American Academy of Nursing at its annual meeting in Kansas City, Mo., Sept. 18-20.

According to the academy's president Mary E. Reres, Wilson was recognized for "bringing the Duke University School of Nursing into a position of prominence in keeping with the reputation of the university."

Dr. Joseph A.C. Wadsworth, professor and chairman of the Department of

Ophthalmology, Dr. W. Banks Anderson Jr., professor, and Dr. M. Bruce Shields, assistant professor, presented a course in "Glaucoma Surgery" at the Annual Academy of Ophthalmology and Otolaryngology meeting in Dallas, Tex., in September.

Dr. Harold R. Silberman, professor of medicine in the Division of Hematology-Oncology, was visiting professor of oncology at the Brook Army Hospital in San Antonio, Texas, Sept. 9-11. While there, he lectured on the topics of Adjuvant Therapy of Cancer and Acute Leukemia associated with prolonged cytotoxic chemotherapy.

A workshop on "Tabloid Newspapers" was conducted by John Becton, editor of *Intercom*, at the annual meeting of the Carolinas Hospital Public Relations Society annual meeting on Hilton Head Island, S.C., at the end of last month.

Dr. Evan A. Evans, associate professor of biomedical engineering, presented a general lecture on red cell membrane properties at the Polish Academy of Sciences Solid Mechanics Conference in September.
