

Slide show to debut Eno River Calendar

A slide show depicting the natural beauty of the Eno River in Durham and Orange counties will be one of the highlights Sunday at a special debut of the Eno River Calendar for 1979.

The debut, to begin at 3 p.m. in Durham's Carolina Theater, also will feature exhibits of Native American artifacts found near the river, displays of past calendars, music and free refreshments.

All are welcome, and there is no charge.

The slide show, entitled "The Eno Experience," was prepared by Dr. Duncan Heron, professor of geology at Duke and

an award-winning nature photographer.

It is scheduled to begin at 4 p.m. and will be shown on the theater's large screen.

The theme of this year's calendar is Indians of the Eno River, according to Sandy Williamson, president of the Eno River Association which is sponsoring the event. Past calendars have focussed on mills, wildlife and plants native to the Piedmont.

All proceeds from the sale of the calendars, again priced at \$3.50, go toward the Eno River State Park, recreational activities in the park and the West Point Mill.

"You'd think they'd filter this stuff."

Car thieves turn pro

According to FBI statistics, there were 960,000 cars stolen last year or about one in every 33 seconds of the day. Of those, only 69 percent were recovered in contrast to 1965 when the recovery rate was 90 percent. The drastic drop in the recovery rate indicates that experienced car thieves, including big time crime syndicates, are participating in what has become a lucrative, nationwide racket.

Not only are vehicles stolen outright, but many are stripped and the parts sold on the black market, posing a serious threat to volume automotive retailers. The FBI also reports 2.3 million larceny offenses relating to automobiles.

Alumni among those appointed to medical faculty

Seven new faculty members have been appointed at the School of Medicine, according to Dr. Frederic N. Cleaveland, university provost.

Dr. John C. Weed Jr., has been named associate professor of obstetrics and gynecology.

New assistant professor in the departments indicated are: Drs. Peter C. English and Thomas R. Kinney, pediatrics; Dr. Raymond E. Ideker, pathology and medicine; Katherine A. Munning, community and family medicine; and Drs. S. Clifford Schold Jr. and Joe B. Weinberg, medicine.

Weed received his undergraduate education at Brown and Tulane universities and earned an M.D. at Tulane's School of Medicine in 1968. He served his internship at the University of Alabama Hospital and completed a residency in obstetrics and gynecology at Duke in 1973.

Prior to his appointment as associate professor, he was director of gynecologic oncology at the University of South Alabama in Mobile.

RUSSIAN VISITORS — Dr. Ewald W. Busse, dean of medical and allied health education (center), poses with two Russian physicians who visited the medical center recently. On the right is Dr. M.E. Vartanian, chief of the Laboratory of Pathophysiology at the Institute of Psychiatry of the Academy of Medical Sciences in Moscow. A geneticist, he is an active investigator in the area of major medical disorders, particularly schizophrenia and manic depressive reactions. He is a member of the Academy of Sciences in the Soviet Union. On the left is Dr. Felix Vartanian, a senior medical officer in the Geneva, Switzerland, headquarters of the World Health Organization. His major interest is in psychopharmacology, and he is responsible for six worldwide studies dealing with the identification of mental disorders in various populations and the use of medication to treat these disorders. Prior to coming to Duke, the Vartanians attended a National Institutes of Health conference that brought together scientists from throughout the world who are responsible for cooperative research projects. While at Duke, the Soviet visitors met with faculty members, house staff and students and visited a number of research laboratories. (Photo by John Becton)

They've got your number

The new campus telephone directories will be distributed next week as outlined on the schedule printed below.

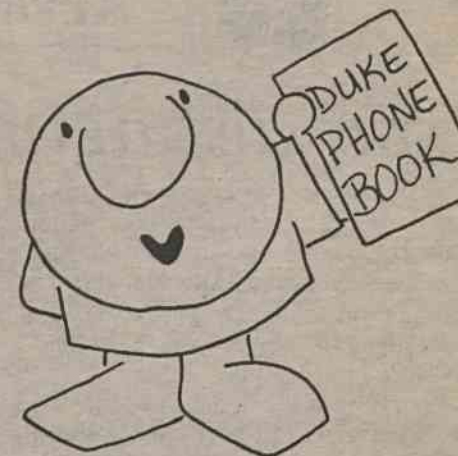

Please decide in advance how many directories will be needed for your work area. If your building is not listed, you can pick up directories at any of the locations nearest you.

Distribution in the medical center will be as follows:

Mon., Nov. 13 and Tues., Nov. 14, 10 a.m.-3 p.m., hospital basement, red zone (near emergency), for hospital and adjacent buildings and Eye Center.

Wed., Nov. 15, 10 a.m.-3 p.m., Sands Bldg., main entrance, for Nanaline H. Duke, Sands, Jones, ALIF, North, Vivarium, and Research Park I, II, III and IV.

Wed., Nov. 15, 12 noon-3 p.m., Hanes House lobby, for Hanes House, Hanes Annex, School of Nursing, Trent Drive Hall, Pickens, Civitan, Southside School, Cancer Control and Community Guidance Clinic.

Fri., Nov. 17, 12 noon-3 p.m., Rm. 306D, Bell Bldg., for Bell, Mudd, Physical Plant, and Heating Plant.

Mon., Nov. 20, 10 a.m.-2 p.m., Alumni Lounge, West Campus Union, make-up day.

appointment, she was an associate in the Department of Family Practice at Iowa's College of Medicine.

Schold earned a B.A. in 1968 and an M.D. in 1973 at the University of Arizona. He served a medical internship at University of Miami Affiliated Hospitals and completed a neurology residency at the University of Colorado Medical Center in 1977.

For the past year, he has held a fellowship in neuro-oncology at the Memorial Sloan-Kettering Cancer Institute in New York.

The University of Arkansas awarded Weinberg a bachelor of science degree in 1965 and an M.D. in 1969. He served his internship at the University of Arkansas Medical Center and completed specialty training in medicine as a fellow in oncology at the University of Utah College of Medicine in 1976.

Since then, he has been associate investigator at the Veterans Administration Hospital in Salt Lake City.

English earned a B.A. degree at Duke in 1969 and both M.D. and Ph.D. degrees here in 1975. He began his residency in pediatrics at New York Hospital and completed it at the medical center this summer.

In 1966 and 1970, respectively, Duke awarded bachelors and medical degrees to Kinney. An assistant professor of pediatrics at the University of Pennsylvania until his appointment, he served his pediatric internship and residency at The Children's Hospital of Philadelphia.

Ideker received a B.A. from Arkansas Polytechnic College in 1965, a Ph.D. in physiology at the University of Tennessee in 1972 and an M.D., also from Tennessee, in 1974. He completed residency training in pathology at Duke and was named research associate in 1975.

A 1967 graduate of Purdue University, Munning received a master's degree in human nutrition from the University of Iowa in 1972. Prior to her Duke
