

'The Bell' Now Belongs To The College; Will Be Mounted At Permanent Site

Southeastern now has a symbol--a bell, which will be permanently mounted in a designated spot on the new campus. The bell was acquired through the efforts of college officials.

Interest in the bell first began when Kenneth Williamson, David Barden, and Bill Glisson noticed a small rope dangling down the side of the building. The temptation to pull the rope was too great for Kenneth Williamson, so he tugged with all his weight. To the amazement of the party involved, a clangorous boom sounded throughout this countryside. What the trio had found was an old school bell that had been used in the early days of the Chadbourn schools. For a number of years it had rested on top of the old Chadbourn High School, unused and unwanted.

One week later during the stillness of the night, the trio proceeded to climb to the top of the building.

The purpose of this adventure was to take the measurements of the bell and the existing supports. With this important data, plans for the removal of the bell to a permanent location at the new college site began being made.

'THE BELL NOW BELONGS TO SCC TO BE MOUNTED AT PERMANENT SITE

The following day steps were taken to begin arrangements to acquire the bell for the college.

Mr. Boggess, metal shop instructor, offered his assistance and that of the vocational class to remove and repair the bell. After this the bell is to be per-

manently mounted in a tower at the new college campus in a landscaped area. However, the plans are tentative at the time of publication and it is unknown whether or not the project will be completed before the opening of the college in September.

Students To Receive Scholarship To Continue Education

From over 1800 applicants for 400 scholarships, four recipients of the State Teacher's Scholarships are honor students from SCC. Each of these students approached Mr. Opitz for financial assistance and forms to fill out for scholarships.

Kenneth Hawes, from Nakina, a recipient of a \$350 scholarship has been on the dean's list every quarter at SCC. He is a member of the honor fraternity, Phi Theta Kappa. Ken is transferring to Pembroke State College after graduating in June.

Christine Taylor, from Chadbourn, has also been on the dean's list every quarter and is reporter for Phi Theta Kappa. Christine is transferring to East Carolina College and has received a State Teacher's Scholarship.

Carla Ross, president of Phi Theta Kappa, is transferring to Wilmington College in the fall. Carla is originally from Jacksonville.

Ada Ruth Ward, a part-time student, who works forty hours a week, also received a scholarship to enable her to become a full time student at SCC next year.

Other scholarships to SCC have also been given. Linda Nance was awarded a scholarship from high

school before coming to SCC. Anita Smith Kinlaw, a student at SCC last year, received a scholarship and is now enrolled at Pembroke.

Pam Buckler, a member of Phi Theta Kappa, has received a loan and scholarship from UNC-CH. The scholarship is for \$600. Pam's home is in Lumberton.

Mr. Opitz stated that those persons needing financial aid and received scholarships had approached the administration and the results were successful.

To Reason

By LARRY McQUEEN

You are the height of intelligence;
You are the capacity for understanding;
You are the beginning of wisdom;
You are the learned magnificence.
All man has the edge called thinking;
And some men, because of thinking, have led lives of boredom. Socrates held you in benevolence, while other men were demanding; Ah, but you have eternally quizzed 'um, In their state of quiescence.

Job Opportunities Now Available For Junior College Graduates

Students who have finished two years of college and will not be continuing their education now have a job opportunity with the Federal government. The recruiting program to fill Federal assistant positions throughout the United States, will provide support and technical assistance in such occupations as: Biological aid, medical technician, engineering aid, engineering draftsman, physical science aid, and cartographic aid.

There is no written test; however, some experience or training will be required. Two successfully completed academic years of study above the high school level in an accredited junior or community college.

Two years of technical experience in engineering in the agricultural, biological, medi-

cal, or physical sciences will increase chances of being granted one of these jobs.

SALARIES BEGIN AT \$92

Salaries start at \$92 a week. Opportunities exist in nearly all federal departments and agencies throughout the U. S. including Washington, D. C. and Puerto Rico. A very few vacancies also may exist in territories of the U. S. and in U. S. posts in other countries.

Forms may be obtained at any Board of U. S. Civil Service Examiners and at any main post offices. Send your completed forms to the Interagency Board which serves in the area in which you live.

If you qualify you will be sent instructions with your notice of rating concerning the procedure to follow to have your name placed with Boards in other areas.

Don't Let It Die!

"College Talk" Should Be Continued

America today is a nation on the go. All of us pursue our daily activities, moving from place to place, trying to keep up with or even beating the forward march of time. Because of our nature in modern society, we demand to be entertained and informed while still maintaining the rapid pace of American society.

Radio is the medium that can and does perform this function without consuming but a fraction of that precious commodity called time. It is interesting to note that 150,000,000 people listen to radio every day from more than 4,000 radio stations, and that every home in the United States has an average of two radios for normal use. This does not include those portable sets that follow people from home to the beach or radios installed in cars.

In an attempt to inform a great number of people about activities at Southeastern, the college has sponsored "College Talks", a series of radio programs produced and aired on radio stations throughout Southeastern's service area. The subject matter has ranged from a discussion of building construction plans to a short concert performed by the college chorus. The programs success has been evident in the favorable response of the general public. People listen, and are informed

and entertained by "College Talk."

Because of its success in benefitting Southeastern Community College, "College Talk" should be continued the coming year, but it will not be if someone does not take a working interest in the concepts behind it. "College Talk" reaches more people and is of greater importance than our school paper, our school bulletins or our general public announcements. This is because it presents the college in a vital and personable light to the public; Southeastern is a young and growing institution. For its success, the people it serves must be well aware of its activity.

"College Talk" offers opportunity in the fields of broadcasting, since it involves program production and will offer someone the chance for part time work in a local radio station. If you are interested in broadcasting or would like to learn more about it, and at the same time benefit Southeastern Community College, notify the Student Personnel Office that you would like to become a staff member of "College Talk" for 1967-68. Remember, people do not listen to "Dead Air". Don't allow the news of Southeastern to become "Dead Air."
