## Green Onions

Many a college student, that knows nothing about electricity, wires his home for money.

"Why do they all pick on Freshie?" God made him for a man, therefore, let him pass.

"I love the taste of lipstick," The tea-hound said to Grace. She blushed, then hesitated, And passed him her vanity case.

A row of thumb tacks placed along trouser seams will protect them from being sat upon.

### Love In a Garden

Do you carrot for me all the time? My heart beets for you— With your cherry lips And peach complexion Radish hair and turnip nose, My love is as soft as a squash And as strong as an onion If we cantaloupe, lettuce marry We'll make a gourd pear.

### A Ferry Sad Calamity

A tear for the girl in the Lincoln Who swore she could drink without thincoln; While indulging in talk She steered off the dock, And the ferry-men claim she's still sincoln.

There was a young fresh named Hodge, Who purchased a brand new Dodge; He drove it a while, Now it's on the junk pile, And he's pledged to St. Peters Lodge.

Isn't it funny that it is often the woman we know for the shortest time we remember the longest?

A rattling flivver gathers no women.

### Fooled Ya!

I stole so many kisses My lips began to sag. And then that woman, She hid the candy bag.

A Senior stood on the railroad track The train was coming fast. The train got off the railroad track And let the Senior pass.

### Why Men Leave Home

"They're off!" yelled the monkey, as he viewed the inmates of the asylum.

## Clippings

(By Ye Compiler)

### Definitions of a Kiss

A thing of no use to anyone, but much prized by two.  
 The baby's right, the lover's privilege, the parents' benison.  
 That which you cannot give without taking and cannot take without giving.  
 The flag of truce in the petty wars of courtship and marriage.  
 The acme of agony to a bashful man.  
 The only known smack that will calm a storm.  
 A telegram to the heart in which the operator uses the sounding system.  
 Nothing divided by two.  
 Not enough for one, just enough for two, too much for three.  
 The only really agreeable two-faced action in the world.  
 The thunderclap of the lips which inevitably follows the lightning glance of the eyes. A report at headquarters. Everybody's acting edition of Romeo and Juliet.  
 What the child receives free, what the young man steals, and what the old man buys.  
 That in which two heads are better than one.

"It's the little things in life that tell," said the girl as she dragged her kid brother from beneath the sofa.— Ex.

Blessings on thee, little man, Barefoot boy, with cheek of tan, Price of shoes is soaring high, Far beyond the naked eye. In another week or two I'll go barefoot same as you.

Did you know that according to examination papers:

Pompeii was destroyed by the eruption of saliva from the Vatican.  
A blizzard is the inside of a chicken.  
Butterflies are killed by squeezing their borax.

A vacuum is a big empty space where the Pope lives.

Typhoid fever is prevented by fascination.

Esau was a hairy man who lived in the wilderness. He wrote many fables and sold his copyright for a mess of potash.

George Washington married Mary Curtis and in due time became the father of his country.

The German emperor is the Geyser.  
A ruminating animal is one that chews her cubs.

### Girls Who Go Unkissed

"There are some girls who are never kissed," according to an article in The Washington Star. "The Japanese lover, for instance, does not salute his betrothed in our fashion. He regards kissing as a queer foreign custom; it has no meaning for him. In China the kiss is considered disgraceful.

"But although the kiss is unknown or at any rate neglected in many parts of the world, nearly every nation has some form of salutation which corresponds with the European kiss. The Malays and the Eskimos greet each other by rubbing noses. Among the Burmese the form of greeting which denotes affection is to apply the cheek and draw a long breath."

### Cupid's Garden

We entered Cupid's Garden,  
We wandered o'er the land;  
The air was sweet and balmy  
As I held her little—shawl.

Yes, held her little shawl—  
How fast the moment flies.  
The moon was shining brightly  
As I gazed into her—lunch-basket.

Yes, gazed into her lunch-basket—  
I wished I had a taste.  
I crept up close beside her,  
Put my arm about her—umbrella.

Embracing her umbrella—  
The dainty little miss  
Once more crept up beside her,  
And slyly stole a sandwich.

One of the power amplifier stages of the world's first super-power transmitter

Antenna of super-power transmitter

# The World's Loudest Voice

On the rolling plains of South Schenectady, in several scattered buildings, is a vast laboratory for studying radio broadcasting problems. Gathered here are many kinds and sizes of transmitters, from the short-wave and low-power sets to the giant super-power unit with a 50- to 250-kilowatt voice.

Super-power and simultaneous broadcasting on several wave lengths from the same station are among the startling later-day developments in radio. And even with hundreds of broadcasting stations daily on the air throughout the land, these latest developments stand for still better service to millions of listeners.

Only five years old, yet radio broadcasting has developed from a laboratory experiment into a mighty industry. And alert, keen young men have reaped the rewards.

But history repeats itself. Other electrical developments will continue to appear. And it will be the college man, with broad vision and trained mind, who will be ready to serve and succeed.

From the studio of WGY in Schenectady, six miles from the developmental station, there may be controlled a great number of transmitters, one of which is the first super-power transmitter in the world.

WGY, together with its associates, KOA of Denver and KGO of Oakland, is the General Electric Company's assurance to the American public that radio broadcasting shall be maintained upon the highest standards.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.
