**KAPPA PSI NU STARTS GAY BANQUETING SEASON**

(Continued from Page 1)

its eighth annual banquet in the Banquet Hall of the Y. M. C. A. It was the first banquet of the season and gave promise of being a good start for a brilliant banquet season. It was possibly the best banquet ever held by the club in the eight years of its existence.

According to usual custom the guests gathered in the reception hall of the West Dormitory at six-thirty and proceeded from there to the banquet hall. The banquet hall was decorated in the club colors of Gold and Blue. Kappa Psi Nu pennants hung in all the windows which were draped with crepe paper. Individual tables were set, with gold candles in the center of each. At the plate of each guest was an attractive butterfly purse stamped with the monogram of the club. These were accorded to be one of the prettiest favors ever given on the Hill.

H. Richardson served as toasts master and the program was as follows:

- Kappa Psi Nu Yell.
- Welcome—Toasts master.
- Response—Wiley Stout.
- Piano Solo—David Brown Harrell.
- Toast to Old Men—Paul McNeill.
- Response—George D. Colclough.
- History of the Kappa Psi Nu—Phalti Lawrence.
- Vocal Solo—Zenith Hurst Velie. (Accompanied by C. James Velie).
- Kappa Psi Nu Song.

The program was interspersed with music by a five piece orchestra from Greensboro. The last number of the program was unusually interesting from the fact that the guests joined into the singing of the final chorus, under the direction of Professor Velie.

Those present were as follows:

Dr. and Mrs. J. U. Newman, Mrs. W. P. Lawrence, Mrs. J. E. McAuley, E. H. Abell, Nannie Sue Dunn, E. W. Auman, Lyde Bingham, D. D. Barrett, Jr., Berdie Mary Rowland, George D. WE ROOT FOR ELON, THE STATE CHAMPIONS TO-BE

"Elephants a-pilin' teak,  
 In the sludgy, squdgy creek,  
 Where the silence 'ung that 'eavy  
 You was 'arf afraid to speak!"  
 —Kipling's "Mandalay"

**ELEPHANTS**

The elephant is man's most intelligent helper. But—consider this interesting comparison:

An elephant is much larger than the electric motor of a "yarder" or logging machine. The "yarder" has the power of twenty elephants; it handles clusters of logs; it works dependably, twenty-four hours at a stretch, if necessary.

Twenty elephants would eat daily 10,000 pounds of green food, which a corps of attendants must gather. A motor "eats" nothing but electricity, supplied at the throw of a switch.

Power used in the modern industrial world is applied through electric motors—tireless "iron elephants" that are relegating antiquated machines to museums, along with such oldtime household articles as wash-tubs and ordinary irons—and stuffed elephants.

Two million elephants could not do the work now being done by General Electric motors. Whatever the work to be done, whether it needs the power of an elephant or the force of a man's arm, there is a General Electric motor that will do it faithfully for a lifetime at a cost of a few cents an hour.
