WELCOME TO CHAUTAUQUA

While the students are widely scattered and most of the faculty away in special study at various universities, nevertheless Maroon and Gold, speaking for faculty and students, is bringing out this number as a hearty welcome to the Summer School and Chautauqua to be held at Elon July 25-August 6.

Knowing the value to student life of the religious opportunities offered by the college through its splendid Christian Education Building, we in welcoming the young people and leaders of the church to the campus at the same time congratulate them upon the fine privileges they will have for most thorough instruction and amid surroundings that are ideal in their physical appointments.

We students are proud of the Christian Education Building and of the distinction that it gives our college to have the first building of this type on an American college campus, and the benefits that come to us from it during nine months of the year we are happy to share with the leaders of the church and the young people who will gather here for the Summer School.

We wish every one a happy two weeks of agreeable association and profitable study and we feel sure that this happy result will come from the perusal we have given the program that is laid out covering instruction, recreation and inspiration. We congratulate the town of Elon College, too, on having such a group with such a program come to it, and we predict for the Summer School every good success.

If we may be pardoned a suggestion, we would be glad for our own faculty members to have part in this Summer School in the future and we would be glad, therefore, to see the Summer School come early in June or late in August, if it is possible for the leaders to arrange it so.

The average American youth doesn't realize what a good time he is having—the summer camps for instance. School might seem a grind now, but you are grinding it or it is grinding you into some kind of a future. Why not shape yourself into a finished product, so that when you leave your Alma Mater you can demand a job, not have to hunt it?

A letter came in the other day from our "Campus Cat" Editor, and he wished to inform the world that the crabs were still crabbing, and also that the fish that he was catching were really no fish story.

MY FELLOW ALUMNI

The Maroon and Gold staff has given us a corner in their paper to keep filled of the current happenings of the Alumni. It is up to us as to the success that shall be derived from it. Shall we let it stand blank or use it in a way that shall keep us in closer touch with each other, to cement that good will and fellowship that existed in our four years of college life? Why not each of you send in, some time during the year, a short article concerning your work or anything of interest? Elon's students are a large family, and a message from you will be of great interest to all the others.

Why not join with the Maroon and Gold staff and make this the best year in the history of the Maroon and Gold? Will you do your part? Let us not fall short in a thing so vital to our school.

GEO. D. COLCLOUGH,
 Field Secretary.
