ALUMNI ASSOCIATION ACTIVITIES.

The Alumni Association of Elon College met in its annual session, May 23, 1927, in the Whitley Memorial Building, to hear the address of the occasion and to transact such business as was pertinent. A Constitution and By-Laws were presented, considered, and adopted. These provide the necessary ground-work upon which to build a healthy and ably functioning organization. A forecast of efficient and successful work was optimistically sounded.

One of the most far-reaching transactions was the definite defining of the term "Alumnus" as it pertains to Elon College. All students who have been mothered by the College for a whole year, either in the Academic School or in any Department, are rightfully considered, and by virtue of such relationship, have become children heiring the right to the distinction of an Alumnus. Every one henceforth having fulfilled such requirements shall consider himself thus honored, and shall stand ready at all times to bear recognition of the same and do his Alma Mater a service.

We, therefore, have in many localities enough alumni to organize local organizations. These local organizations will be capable not only of carrying out programs and working out plans that will be of local interest and serve to keep the family together; but also the high points of their work and the worth-while developments can be passed along to the General Association. Such suggestions and projects may be presented through the columns of Maroon and Gold. We also hope to see organized a General Council of the Association, which shall be composed of delegations officially sent up from local units. This General Council in its annual sitting, will serve as a connecting link between the Association and the local units, and will constitute the official legislative body of the Alumni Association.

It has been an observation that the Alumni of Elon College have been segregated critics, and not always constructive in their criticisms. It is time to begin the crystallization of a consolidated and unified opinion. This can be done through a sort of clearing house in which to eliminate from the wheat the chaff that is mixed in by a "hand to mouth" system of communication. Such a medium would get our brains to thinking on our problems, our hearts touched by their needs, and our spirits enthused and electrified by the possibilities before us.

The officers of the Association are the servants thereof, and are open to suggestions, and susceptible to opinions and judgments. It is desired that this year may develop a concrete system, which will have ways and means that are both fundamental and modern, that will be concise, conciliatory, and constructive. How many will resolve, upon reading this effort at broadcasting, to "stand by" your officers and committees in promulgating and enlarging the ideas set forth?

This is Station D. N. C. i. e. Durham, N. C., and we shall welcome and appreciate a word from you, so that we can feel the pulse, and see the tongue, and be the better able to diagnose correctly and treat accordingly. Consider your locality, and give us your suggestions as to an organization in your

We read with pleasure in the Defiance Collegian that this institution of the Christian denomination expects to meet a team from Elon on the basketball court in the Ohio city during the latter part of January, 1928. This will be the first meeting of the two Christian colleges in the realm of sportdom and the outcome will be watched with keen interest by the followers of both schools. The Collegian further stated that the Defiance team expected to journey to the Southland for a return game shortly afterward.
