ADVERTISING RATES UPON REQUEST

All articles for publication must be in the hands of the Managing Editor by 12:30 M., Monday. Articles received from an unknown source will not be published.

OUR REGISTRAR

Our Registrar is a quiet man. He has but little to say but means that little. He has given himself up to the task of getting more and better students for Elon, to the task of improving the grade work done by the students here, and to the task of causing Elon to be known and recognized for its high grade of work.

The extent to which he has succeeded is indicated by the fact that the recent Conference of Registrars in North Carolina elected him for their president during the ensuing year. They, as we, have confidence in his ability and willingness to work. He will, no doubt, discharge his duty in this capacity as faithfully as he has his duties as our Registrar.

Mr. Cannon is also our Graduate Manager of Athletics. During his two years in this position he has put Elon athletics on a much better financial basis and has brought about many other improvements in the field of athletics.

MEREDITH AND STATE ENTERTAIN

Meredith and State proved to be delighted hostesses and hosts. We were kept busy from the time we arrived at Raleigh until the time to leave. Mr. Hester, our capable president, opened the meeting with a very interesting and instructive address. The speaker described the type of student that our college editors should be and their rank in college life. This was exceedingly an able address, and it set a high standard that prevailed throughout the convention. Here all of our problems were discussed. We received much constructive criticism. The whole convention was a great success. The membership of the association is steadily growing. Each and every delegate derived a great deal of benefit from this meeting and enjoyed the many social events as well, as Meredith and State did not spare either time or effort in their role as joint hosts.

—E C—

REPORTERS CLUB

Recently, a Reporters Club was elected. The members of this club come from the four college classes. Both men and women were selected as reporters. We believe that the students who were elected are representatives of the whole student body. We think that the Maroon and Gold should represent the whole student body and we are striving to that end.

In their work as reporters they will receive valuable experience which they can not get in any other college activity. This experience will aid them each in later life.

If you know of an election, a social gathering or any kind of news that will be interesting to our readers, call a reporter; he will be glad to "write it up." Do not wait till the "news" becomes history. Call the reporter while it is still "news."

—E C—

OUR TEAM

Our team has come into its own. It has started to win. The men played an excellent game at Guilford last Saturday, as the score indicates. That is the "old fight," big team. Keep it up. With the entire student body behind you, and on the home field, you have an excellent chance to win the High Point game this week. We are for you, one and all. Let's go!

THE KEMPUS KET

only one left for Miss Arledge and Miss Bushong. They drew straws. Result: Miss Arledge had her date, and Miss Bushong is still rubbing tear-stained eyes.

—Bedbug Deaton—

Remember that I, Oscar, am always hungry for scandal and gossip. Keep my tin can full and I shall never go hungry.

—M-e-o-w—

There were two girls on the hill Sunday who had a couple of dates apiece. Well, they decided to divide with some other girls. Miss Frances Dark took one of the "dates," and there was

Small boy "Hudson" looking at stork, "Mamma, I believe he is trying

to see if he can remember me."

—Beat High Point—

Will some one please tell Mr. Jim Utley what the two gentlemen were looking for on the piano keys at the concert Monday night—he wants to know.

At chapel last Saturday, the speakers were a scientist and a preacher, who were to be introduced by two students from the expression class, Mr. Boone and Mr. Veazey. Mr. Boone said, "Ladies and gentlemen, we are glad to have with us a great scientist who will address us on a subject of which he is a living example. Professor Zoboe will now address us on the theme of 'The Missing Link!'"

After this feature of the program, Mr. Veazey came forward and said, "Friends, I am sure we are all delighted to have with us a man who has given the subject of his discourse an unusual amount of study. In fact it is true that he is full of his subject. The Rev. Loomup will now address us on 'The Works of Satan.'"

A new society has been formed on the hill, its purpose being to bring about the return of the golden age when whiskers were in fashion. Its members assert that shaving takes much time that could be spent in enjoyable loafing and that a good coat of beard saves the public from being exposed to so much masculine homeliness. They will

meet in the P. K. W. Society Hall, No. 37 East Dormitory. No special badge will be bought, but any one seen wearing a beard more than five quarters of an inch long will be recognized as a member. The goat will be the sacred emblem of the new order.

—Merci Moses—

Ode to Seniors

By E. D.

Rockabye seniors in the tree top
If you keep studying, your grades will not drop;
But if you stop digging, your grade will sure fall,
And down will come seniors, diplomas and all.

How will your office look?

Not like this, of course

Yet you will find in it a dozen jobs that can be done more quickly and effectively by electricity—and done so quietly as to be practically unnoticed. In fact, electricity has completely revolutionized many office methods.

YOUR FATHER probably will recall the days of high stools, eyeshades, and evenings overtime.

But visit a modern office! A thousand letters to go out by four o'clock. A new price list to all customers in to-night's mail, without fail. Enter electricity. Two or three people turn switches, and the finished letters come out of an ingenious machine. Another motion and they are sealed and stamped. Only electricity could get that job done.

Here's a statistical job. The reports are in; thousands of figures to analyze. Looks like overtime for fifty clerks. "Certainly not," answers electricity, as a button starts the

motor-driven sorters and tabulators. Key cards are punched with lightning fingers. Electric sorters devour 24,000 cards an hour. Tabulators add quantities and amounts in jig time, and print the totals.

Go to almost any bank today. Hand in your account book. Click, click, click, goes the electric book-keeping machine and back comes the book to you. Five operations performed in that brief moment. Everybody saves time,—you, the clerk, the bank,—when electricity is the book-keeper.

In the office of to-morrow you will find "electrical fingers" doing more work than even to-day.

TO-DAY in a modern office you will find these electrical aids:

- Addressing Machines; Dictating Machines; Adding Machines; Multigraphs; Check-writers; Calculating Machines; Cash Registers; Interior Telephones; Card Recorders; Card Sorters; Time Recorders; Accounting Machines; Time Stamps; Clocks; Mailing Machines; Typewriters; Fans; MAZDA Lamps, and many other electric devices.

This familiar mark appears on many electrical products, including motors that drive time and labor-saving office machines.
