

Education Elon offers buildings, equipment, and capable of answering practically any educational

Desires good location, and adequate literary facilities for the development of the human body is a vital interest of the college. Football, basketball, tennis, and other athletic sports have found a well-deserved place in the program here at Elon. Our student body is proud of its athletic teams; and is always ready to give them its most hearty support. For those who are not physically fit for strenuous athletics, the college has provided excellent gymnasia and physical instruction.

We have mentioned only a few of the advantages present on our campus. But we extend to prospective students everywhere a cordial invitation to visit our college, to talk with our students and faculty, and to answer from their own observation the question, "what does Elon offer the prospective student?" The paramount interest here is the preparation of men and women for future citizenship; and in seeking to cope with this interest the college has, in so far as possible, duplicated on this campus the situation of actual life as men and women must live it when the brief four years at college have passed.

THE SECOND MILE

The Elon student body has had a hard workout during the last few days, warming up for the student-faculty race which began today. We refer to the race as beginning today because, up to this time we haven't done much running. In reality, it started last September; but, in order to play fair with the faculty, we have given them a good lead; and now we've got to sprint and sprint hard. The race will end next Tuesday, and the results will be published later.

But there is another mile; and the Bible admonishes that, when a man asks you to go with him one mile, go with him two. The faculty wants another chance, and of course the student body is going to give it to them. But there is one thing which the student body is not going to do in this second mile: it is not going to give the faculty another lead. We are going to keep right up; and next spring, when the finals come off, anybody who beats us out is going to have to do some tall running. And so "on your mark! I get set! ready, go!"

(This article was written by one who flunked all his midterm exams.)

Dissertation On Woman Reveals a Bizarre Mixture

She's an angel in truth, a demon in fiction. She's the greatest of all contradictions. She's afraid of a bug, she'll scream at a mouse, but she'll tackle a husband as big as a house. She'll take him for better and for worse, she'll spit his head open, then be his nurse, and when he is well and can get out on her she'll pick up a teapot and throw at his head.

She's faithful, deceitful, keen-sighted and blind, she's crafty, she's simple, she's cruel, she's kind; she'll lift a man up, she'll cast a man down; she'll make him her hero, her ruler, her clown. You fancy she's this, and you find she is that.

For she'll play like a kitten and bite like a cat. In the morning she will, but in the evening she won't, and you're always expecting she does, but she don't.

"DER YELIAB"

On Sunday, February 16, 1914, at exactly 3 minutes to 10 o'clock there was given birth of the family of "Der Yeliab," a woman christened "Der Yeliab." From child she proved to be intelligent and superior to her playmates—contrasting them in all intellectual contests—until now she has become one of the outstanding figures in her college. There seems to be no question of her importance. Any problem of complexity that she can not answer, in fact, many educators have placed her in a field by herself.

We think it only fitting that we take this space to acquaint our readers with one so noted. All questions of importance, interesting, or having a conference with this intellectual genius may do so by donating to Room 61—I am sure that they can there receive valuable information as to "socializing" on the campus.

TREATMENT INCOMPLETE.

Wife: "Here's a bill from the optician."
Husband: "Tell him I can't see my way to pay him."

matemat are experts in history, literature, journalism, philology, comparative anatomy, science, and religion. We have college-trained lawyers who usually are glad to give legal advice to the other prisoners, and doctors who informally prescribe for minor ailments of their fellow-inmates. We once had an unlocked clergyman, a brilliant scholar, he was too. One of these highly educated men said to me: "chaplain, you don't care me with the rest of the prisoners here, do you?" "No," I answered, "I place you far below them. They did not save you from your opera, your confessions, your general background. So I consider that you are much more to be condemned than these other poor fellows who never had the chance in life that you did."

"It is seldom, however, that our college men show such a concealed spite. On the contrary, they seem to feel the disgrace of their conviction and imprisonment more intensely than any other group of inmates. Usually, too, they think back of the punishment to the crime for which it was imposed with a pride which a highly educated man may feel the disgrace of imprisonment and shrink from the associations of prison life. Superior intelligence prompts him to accept quietly the exigencies of his new situation, and as a rule our college men are model prisoners. In fact, disciplinary measures among them are practically unknown."

"For economy of prison administration, among other reasons, they are not often put to such mental tasks as sweeping up refuse, but are assigned work for their own benefit. Vocational training especially fits them. So they are to be found in the prison library, or doing clerical or secretarial work in the main office. The present chief clerk in the central office is a college-trained expert accountant. Other college men work in our well-equipped hospital wards or in our clinics and laboratories. Many of the instructors in the schools are also college men—among whom is one of the most remarkable teachers I have ever known; and many others are assigned as advisers to the inmates who are taking advanced studies through correspondence courses.

"To the best of my knowledge, we have not had any school-teachers or college professors among our prisoners. Whether this is because such men do acquire a real education at college, or because of something connected with the atmosphere of their prison, the truth remains that those who make teaching their life work do not come to Sing Sing.

"How does it happen that so many of them are in prison? Why should men who belong to what is popularly considered our privileged class make such a failure of life that they have to be shut up behind the bars? A college man now at Sing Sing is inclined to lay the blame on social and economic conditions. He says that in periods of financial depression the proportion of highly educated men who are in prison should be expected to increase, because, in the first place, a depression hits the artist and the artist those who are holding white-collar jobs, and in the second place, these men are used to living on a higher scale of living, and so, when the crisis comes, they are less able and less willing to adjust themselves to a lower scale of living. I have not yet been able to get any statistical

Worship theme: "The Pathway of Purity." Hymn: "The Pathway of Purity." Scripture lesson: Mark 2:23-29. Prayers. Talks: "Customs and Traditions." "A Heppier Sabbath." "Enemies of the Lord's Day." "No Sabbath in the Heart." Closing hymn. Benediction.

Worship theme: "The Pathway of Purity." Hymn: "The Pathway of Purity." Scripture lesson: Mark 2:23-29. Prayers. Talks: "Customs and Traditions." "A Heppier Sabbath." "Enemies of the Lord's Day." "No Sabbath in the Heart." Closing hymn. Benediction.

COURSES ELON IS TO OFFER THIS SUMMER

- Education 22a—Primary methods.
- Education 21b—Grammar grade methods.
- Education 23—Classroom management.
- Education 31—Educational psychology.
- Chemistry 11-12—General Chemistry.
- Art 24—Drawing and Industrial art for elementary grades.
- English 40-42—American literature.
- English 47—Advanced sentence structure.
- English 24—Children's literature.
- French 11-12—First year college French.
- Geography 21—Principles of geography.
- Geography 22—Geography of North America.
- History 12—United States up to 1865.
- Education 24—Child psychology.
- (All of the above named courses carry regular college credit.)
- Pennmanship.
- High school mathematics, if there is a sufficient demand additional courses may be scheduled.

Junior Oration Subjects

- The Citizen and the Law.
- The Discovery of Radium.
- The Romance of the Electron.
- Time.
- An Impossible Requirement.
- Business Administration.
- Is Technocracy a Men to be End.
- Technocracy.
- Future of Agriculture.
- Development Toward World Peace.
- The Depression.
- Chemistry.
- The Chemistry of the Automobile.
- Romance of Chemistry.
- History of Medicine.
- Biography.
- The Modern Quest of Youth.
- Science in Man.
- Physical Education.
- Playing the Game.
- Work and Play.
- Bible.
- Necessity of Christian Education.
- Character.
- Music.
- The Musician—Yesterday and Today.

KEMPUS GOSSIP

Anyone in need of a new sole, see Pippo Latham.

Every campus has a Joe college, but we have the original one in blood Johnson.

We understand that the girls' committee in West dormitory is "You scratch my back and I'll scratch yours."

Bob Armacost can't decide which he likes best—red heads or brunettes.

Everyone is worrying whether or not they will pass—well, it's too late now.

We agree that Miss Chambiee takes a swell picture. How about it? (7) (7)!

In public speaking class, Miss Fitzhugh wanted to know what keeps the tongue—well, we would say this—key.

What would happen if we have reviews for exams. Everyone passed all their exams. Professor Snuggs gave an easy exam.

We had frid chicken on Friday night. Lights shined on all night. George Chandler didn't talk about Portsmouth.

Miss Fitzhugh didn't turn in a cut.

School went to church. Everyone closed for a week. Professor Martin did not make you laugh.

We think it would be time to "kick the bucket."

We wonder how Dr. Clarke got so many stars on the collection chart.

We wonder why Connie Jones fell down the stairs.

J. T. Chappel, who frequents West Burlington, has at last decided to stay on the campus.

We wonder what Fay Nichols did with the poetry she wrote.

We understand Wauyl Lambeth and Maxine Covington have taken up interior decorating? ? ? Many enjoyed their exhibition Monday night.

We wonder why Bing Miller spends so much time in the Mechanical Drawing room.

Favorite number on the campus—Ninety-Three.

We understand that Jape Rawls is planning to open a Seafood business in Elon.

"A wise old owl sat in an oak. The more he heard, the less he spoke. The less he spoke, the more he heard. Why wasn't he like this wise old bird."

C U next week.

ways of doing this. One is by force. It has been asserted that America can do it only by obedience to the laws of the land and to the laws of God. The other method is by the strategy of goodwill.

Gleanings Of Wit

Dr. Smith pulled a good joke the other day. He said that he wanted a good meal, so he came to the dining hall.

Voices in the dead of night in the dorms. "Wake up, quick, wake up!" "Can't." "Why not?" "Ain't sleeping."

Rill and Dr. Powell were out in the woods and Rill stopped and picked up a chestnut burr. "Dr. Powell," he called, "come here. I've found a porcupine egg."

Kimball: "Brothers and sisters, you all want to be ready to jump when you hear Gabriel blow that horn?"

Jamaneau: "My goodness has he got a car too?"

SEPARATION
Hands off steering wheel.
Arms around girl—
Across the fence Willie—
In the ditch Pearl.

One advantage a dumb animal has is that he doesn't have to give up, take, advice.

Dramatic Club to Produce 'Cat-o-Nine Tails' Here

The Elon Playmakers will produce a mystery play, "Cat O' Nine Tails," by Philip Barry.

The play has been ordered by the director and work will begin soon. It immediately after exams.

January 6 the formal installation of the chapter of Delta Phi Omega will take place. Miss Fitzgibbon, the director, will be in charge of the ceremony.

THE UPWARD ROAD.

I will follow the upward road today. I will keep my face to the light. I will think high thoughts as I go my way.

I will do what I know is right. I will look for the flowers by the side of the road. I will laugh, and love, and be alone.

I will try to lighten another's load. This day as I fare along.

CULTIVATE FRIENDS.

No man or woman who has a real friend is wholly miserable. It is only the lonely who are utterly despairing. Make friends so that you may have companionship and sympathy, so that you may have some one to relate with you in your joy and weep with you when you weep, for a friend doubles our joys and halves our sorrows.

selfness. These times are really revealing the kind of people individuals are. Kindness is revealed by one's attitude toward his money. When one fails to minister to others less fortunate than he, he is selfish. When he does minister to others, even though he has little, he has the attitude of Christ.

One's attitude toward government and the changing function of government are subject to just criticism. The increasing expense of the government and the decreasing income make the burden heavier. Both government and private charity are to the breaking point. Unless something is done to bring about justice, a revolution, either by orderly or disorderly processes, is certain. Each individual's relation to the problem, and that relation spread about to his fellows will bring about relief to these conditions.

Studying As Art Topic of Address Prof. Robertson

Prof. J. R. Robertson, former superintendent of Albemarle county school, will give the address to the Elon student body on Wednesday morning, January 14th. His subject is "How to Study." A most interesting one, as that difficult problem is on the minds of the students just at this particular time. He will discuss the study preceding examinations.

Prof. Robertson stated that a student who acquires the art of studying, will not be hindered or fail in during his school career. A child is born with the instinct of curiosity. Curiosity leads to interest, interest leads to attention, and attention leads to study. Controlled attention is a most vital condition under which studying is done. Finally, study leads to knowledge.

These are some hindrances to study, according to Prof. Robertson. The student hates to begin. By just arting his teeth and beginning this can be overcome. Another hindrance to studying is the fact that the mind wanders. One must get the obstacles out of the way and keep his mind on the subject. In fact, failure to organize thought is a great hindrance.

One of the finest things about examinations, said Prof. Robertson, is that it makes the student review, organize, and integrate the parts of the course into a united whole.

Buffet Supper is Given in Honor of Pi Kappa Tau

Among the outstanding events of the week was a buffet supper Monday evening when the members of the Pi Kappa Tau Society at Elon were entertained.

Members present, besides their regular members, were: Ruth, Barbara, Mary, Joseph, Knox, and Ruth Cox.
