

Elon's Emanons Complete Tour

The Emanons, Elon's jazz workshop group, recently finished a tour of three states with their jazz, rock and contemporary concert.

The college musicians kicked off their road show with a concert at the College February 23, followed by a performance for a local high school on February 24. Other performances were: Lenoir and Statesville high schools, February 25; Martinsville and Hillsville, Va. high schools, February 26; Princeton and Bluefield, W. Va. high schools, February 27.

The Emanons, are a group of Elon students who are interested in keeping alive the heritage of jazz. Directed by Jack O. White, associate professor of music, the group is strictly voluntary and receives no credit for participation in the band.

The band features Clint Horton as vocalist, Howard Hudson on the piano, David Abernethy on the drums, and Dallas Smith on the guitar, in addition to a section of trumpets, trombones, and saxophones.

The 19-member group's Repertoire includes such tunes as "Sunny", the Chicago Transit's "Nobody Knows What Time It Is", "Jude" by the Beatles, and "Montage", a contemporary jazz number.

Elon Defeats High Point

ing the early first half.

Elon went ahead for the first time in the game 21-20 when Cole converted his third 3 point play with 6:37 left in the half. The lead changed hands several times until Hicklin put the Christians in the lead permanently with 1:20 left in the half. The Elon squad went to the dressing room with a 31-29 advantage.

In the first half High Point shot 37% and captured 23 rebounds while the Christians fired 35% from the floor and captured 21 rebounds. Three point plays by Cole, assists and good defense by Marshall on the Panther's Witt, and key baskets by Robbie Hickoin sparked the Fighting Christians first half attack.

In the first six minutes of the second half, Elon outscored the Panthers contributing 15 points to the Panther's 7 points, giving the Christians a 10 point lead 46-36. Baskets were made by Cole, Trautwein, Marshall, and McGee. Elon maintained this advantage with the aid of a man for man pressure defense.

Elon increased the lead in the final portion of the fourth quarter capitalizing on freethrows from fouls incurred by the Pan-

thers. Brown, Hicklin, Wallace, Berry, and McGee each had turns at the charity line contributing clutch freethrows.

Elon's 88-69 victory highlighted by Cole's effort of 28 points was the result of team play and good defense by the Christians. Witt, High Point's school record scorer, was limited to 25 points in behalf of the Panther effort.

* * * * *

What is the official State flower?

The dogwood. The dogwood was adopted as the official flower of the State by the General Assembly in 1941.

What are the dates on the North Carolina flag?

April 20th, 1775 and April 12th, 1776. Each appears separately in black letters contained within a gilt scroll in semicircular form.

May 20, 1775 is the date of the Mecklenburg Declaration of Independence. April 12, 1776 is the date of the Resolutions adopted by the Provincial Congress of North Carolina at Halifax.

The flag of North Carolina was established by the General Assembly in 1885. The flag is displayed from a staff upon the top of State institutions and State public buildings.

Data Processing Offered

By BECKY CARTER

In an effort to better prepare students for modernized business, Elon is now offering two data processing courses which are taught by Allen Sanders, associate professor of Business Administration and Accounting.

The courses are open to all majors. A Survey of Data Processing is offered in the fall which is a two hour course. Practical Applications of Data Processing is offered during the winter term in conjunction with the fall course.

These courses aid the student in gaining familiarity with two kinds of equipment: the punch card machine and computers. A punch card machine reads the holes punched in cards. A computer is an electronic data processing machine. The main difference between the two machines is the speed at which they operate.

The first day of class, students are divided into three groups. The groups are referred to as the hardware department, the systems and procedures department and the terminology and language department. Each group is responsible for becoming experts in their individual department and for presenting their findings to the other members of the class.

A chairman is chosen for each department, and the chairman meets with his two or three times a week in order to discuss their project.

The chairmen of each department also meets with the instructor in order to plan a work schedule and discuss any problems that they may have. At the end of the semester, the chairmen evaluate each group member. In turn, the chairmen are evaluated by the instructor.

Prof. Sanders feels that almost every college graduate will run into a situation where computers are being used, and they will need to understand a certain amount of terminology in order to get a clear picture of business operations. He feels that the student

er make up their outside scoring threat.

T. K. E., whose captain is Tom Balderson, is led by the steady scoring and rebounding of Brian Henson. Steve Nicolay and Dean McBrader were also very impressive during regular season.

Moffitt A-1, captained by Pete Kouchinsky is led by Dave Davis and Bruce Madison, the latter having an average of over 20 points per game. Moffitt is the only team who went undefeated through regular season play.

Two teams capable of providing an upset in the tournament are Sigma Phi Beta and Smith A-1.

Prof. Allen Sanders teaches data processing courses in an effort to familiarize students with modern business practices.

should learn enough from these courses to deal intelligently with various situations encountered after graduation.

These two courses give the student an opportunity to become deeply involved in their subject. The student are on their own

students are on their own aspects of their chosen field. According to Prof. Sanders, the student will

gain more knowledge when he is given extra responsibility. This also increases the desire to achieve.

Baseball Practice Begins

termen: Dewey Capps (E.R.A. 1.70), Tom Jernigan (E.R.A. 1.98), Jim Ramsey (E. R. A. 2.08), Don Oakes (E.R.A. 4.50), and Steve Bird. Coach

Drake has several promising candidates for the pitching staff: Billy Schultz from Morristown, N. J., Mike Futrell from Virginia Beach, and Gerald Campbell.

Drake stated that, "We need to get outdoors and practice, since the gymnasium can only help get the ball-players in shape and going over the basic fundamentals." Asked about the upcoming season, Drake replied, "We will be an exciting ballclub to watch, and for the team to be successful, the veterans must hit, since there will be quite a few ballplayers on the club who have not played college ball yet."

As for the prediction of the coming season, Elon will be in contention along with High Point, Catawba, and Pfeiffer. If the young players can produce along with the returning lettermen, Elon should have a real fine ballclub, which both the student body and Coach Drake may be proud of.

Students Rate Profs

promotions and tenure. At least four student evaluations will be requested for each faculty member being considered for promotion. Three of the students will be chosen by the chairman of the faculty member's department and one will be chosen by the faculty member himself.

The evaluation form to be used by the students will differ from those used by the colleagues, chairman and dean in that it will ask specifically for the student's comments on the faculty member's teaching. The forms carry information on the activities in research, publication, consultation and advisement which are expected of every faculty member.

The committee emphasized that as in the past, no one would be advanced in rank or denied promotion simply on an isolated evaluation of any kind. The student evaluations will be used beginning with the 1970-71 academic year.

Comprehensive

Exam

Discontinued

On Friday, January 30, 1970 the faculty voted that comprehensive examinations be no longer a requirement for graduation. This action, according to Dean Theo Strum, is effective immediately.

The No. 13 Hole on Beaver Lake Golf Club in Asheville is the longest par five hole in this country. It is 690 yards long.
