Alpha Sigma likes the 'Oaks'

Alpha Sigma Alpha has entered its fourth year here at Elon. With 27 active members, the sisters of Alpha Sigma Alpha are the only sorority on campus without a house. Unable to provide a house for them, Elon set aside 16 spaces in the Oaks for some of them to live. With eight rooms next to one another, the Alpha Sigma Alphas have made this section of the Oaks their designated home.

Sophomore Kathy Gobble says, "The Oaks is the next best thing to having a house. It has helped the sisters feel as though they have a home on campus."

Each of the other three

which not only provides a home for the sisters, but also represents their organization. The vice-president of Alpha Sigma Alpha, Julie Jones, feels that the section of the Oaks where her sisters live can represent Alpha Sigma Alpha to outsiders.

One problem the Alpha Sigma Alphas were faced with early in September concerned the display of the Greek letters outside their rooms. Elon College opposed allowing them to hang the letters outside for the public to see. Their reasoning behind the complaint was that the Greek letters

may suggest parties which would result in a noise problem for the town resi-

"The sisters of Alpha Sigma Alpha are happy about their new home, but we want Elon to realize that we consider it a temporary dwelling and are still quite anxious to acquire a house," Julie Jones says. Until a house can be provided, Alpha Sigma Alpha hopes to keep at least 16 sisters at the

Elon students at A&T career day

By Vivian Miller

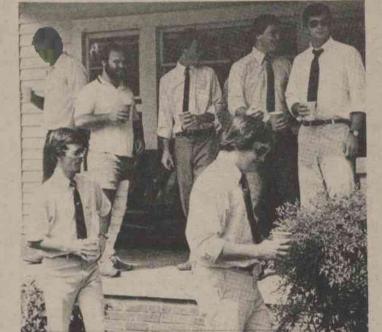

Several Elon students attended the career day at A&T State University on Sept. 24. This career day was oriented for engineering, accounting, biology and business majors. Proctor & Gamble, Kodak, Aerospace, accounting firms, IBM, Sou-

thern Bell, Western Electric, Reynolds, and many others were represented.

Information pamphlets and other materials were available for students at the various booths. Representatives explained the opportunities and job functions within their organizations. The business and science fields seemed to be open and in need of trained people. The new field of communication, which is in demand, was left out of this particular careers day. Mary Carroll, a human services major here at Elon, suggested to Ms. Susan Phillips, that if Elon has a career day, that it include firms and businesses who employ persons in the area of communica-

Seniors Vennecia Bynum, Mary Carroll, Alonzo Craig, Vivian Miller, James Moore, and Debra Nelson along with placement counselors Ms. Susan Phillips & Mr. Jim Hackney attended the careers day.

Frats discuss various housing renovations

The presidents of Kappa Sigma, Sigma Phi Epsilon, Sigma Pi, and Tau Kappa Epsilon fraternities have met recently with the chief of maintenance, L.B. McCauley, Sr., to discuss renova-tions of the four schoolowned fraternity houses.

Among the renovations are exterior painting, replac-ing windows, interior improvements, and rewiring. Three out of the four houses received new gas furnaces.

Renovations were necessary to insure safety and to improve living conditions. After the fire marshall declared that the electrical wiring was obsolete, funds were appropriated to rewire the houses. McCauley said, "Students now come to school with stereos, hair dryers, clock radios, fans, refrigerators, and televisions. The wiring in the fraternity houses was not made to accomodate the increased load, so rewiring was neces-

New outlets are being

installed, and the system is being upgraded. Other renovations include plans to install new sewer lines at the Tau Kappa Epsilon house, a refurbished bathroom at Sigma Phi Epsilon, new floor supports at Sigma Pi, and new doors and locks at the Kappa Sigma house.

Both the fraternity presidents, and Mr. McCauley were pleased with the meetings. Michael Johnson, president of Sigma Phi Epsilon, remarked, "Maintenance has been good to us considering how busy they are. We brought our problems to them in a unified manner, and they were very willing to

Kappa Sigma president, Steve Coors, said, "McCau-ley and maintenance have been responsive to our needs. It was good working with them and the other fraternities. Mr. McCauley summed it by saying, "The meetings led to a better understanding between maintenance and the frater-nities."

A special showing featuring three unrelated art forms is on display until Oct. 30 at the Durham Art Guild, 120 Foster St., Durham.

Judy Henricks of the Elon art department is displaying

her most recent oil paintings. Sharing the spotlight with Henricks' works are realist sculptures by Carl Goldstein and collages by Kaola Allen and Simon Vin-
