SGA seeks student input on policies

Dan Daly

by Debra Burke

The Student Government Association has two long-range goals for the year of 1981-82, according to Dan Daly, president of the SGA.

First, he says SGA wants "to increase involvement of the student body at Elon and to increase knowledge for the students and residents of the town about the environment we live in."

Second, "we want to continue investigating the voting rights of all students at Elon College with the organization PIRG," he continues.

"It appears that there may be a great desire among the students to investigate the

rules on visitation, alcohol and other policies concerning student life," says Daly. "Until we receive some inspiration from the student body as to what they expect from us, we cannot operate."

Daly wants to hear the opinions and ideas of students as to what they expect the SGA to do for them. "We have to show the higher-ups that we have a right to be entrusted with responsibility. We must prove that we are responsible adults. All it takes is about 10 people to shoot everything to heck for everybody else."

Daly stressed that it is

important for students to realize that "anything accomplished is coming out of the SGA administration, senate, class officers, and RCs on down." All parts of student representation are involved in work on all issues.

"Our main problem starting off this year is that we are in a state of chaos. The relocation has caused us to suffer for space, but we are trying to cooperate with student affairs and other facilities that have been displaced," states Daly.

The SGA will hold its first meeting of the year tonight at 6 in the Long Student

Elon librarian dies following short illness

The funeral of Guy Lambert was held yesterday at the First Reformed United Church of Christ in Burlington.

Lambert died Monday at Wesley Long Hospital in Greensboro after a short illness.

Lambert served as associate librarian at Elon since 1963 and was named head librarian last fall.

Before coming to Elon, Lambert served as associate librarian at Campbell College in Buies Creek, N.C., for two years. From 1956 to 1961 he worked at May Memorial Library in Burlington as the catalogue specialist.

He was a member of the North Carolina and

American Library Associations, the alumni association at the University of North Carolina in Greensboro, and Sigma Mu Sigma fraternity.

Lambert was a 1959 graduate of Elon College where he received a bachelor's degree in philosophy. He received a master's degree in 1973 from UNC-Greensboro, and his library training at UNC-Chapel Hill. He did doctoral study in curriculum and instruction from UNC-G.

Part of the Thursday morning worship service at 9:30 in Mooney Theater will be devoted to Lambert.

Contributions may be made to the Guy Lambert Memorial Scholarship Fund.

Open house a success

by Teri Miller

Sunday, Sept. 20, marked the beginning of the fraternities' fall rush with the semi-annual Open House parties for students and faculty. The nice weather drew crowds of Elon students to each of the fraternity houses.

Brothers and alumni of each fraternity welcomed their guests and hosted a very enjoyable afternoon for all. "Because our organization is on display to all of our prospects, we have worked very hard to prepare the best impression possi-

ble," said one brother from Sigma Pi.

The time and effort that the fraternities dedicated toward this fall's Open House resulted in a great success. Lists of students interested in joining these Greek organizations were compiled to lead the fraternities in their future rush programs.

Chris Lowman, a freshman at Elon, stated, "Today was great. It was the kind of opportunity I've been looking for to meet brothers and see what the fraternities here really are like."

New degrees offered

Elon College will offer two new degrees which may be awarded to successful candidates in the spring.

A B.S. in Business Administration and a B.S. in Accounting will be added to the degrees Elon currently offers.

Accounting 336, Economics 321, and Business Administration 311, 321, 323, 328, 411, and 423 are the core courses required for the B.S. in Business Admin-

istration.

The B.S. degree in Accounting requires the following foundation courses: two mathematics courses selected from Math 111, 121, 160, 161, 221, and 222, Computer Information Science 111, Business Administration 111, Economics 211, 212, and 246, and Accounting 211 and 212. Further requirements will be outlined in the college catalog.
