

Microwaves make living on-campus enjoyable

Jennifer Cowman
The Pendulum

If you live on campus, you might have noticed a new addition to the lounges. Microwaves.

Microwaves have been added to each of the lounges in Hook, Smith, Carolina, Virginia/West, Sloan, Jordan Center, Harper Center, and Chandler.

Steps to install the microwaves in the lounges started last spring. Lee Proctor, director of housing, and the Residence Hall Association decided that putting microwaves in the lounges would help the students feel more at home and make living on campus more enjoyable. They were also fulfilling a request by President Fred Young, and many parents, who questioned why they weren't

"Putting microwaves in the lounges would help the students feel more at home"

already part of the lounges.

Questions were brought to Proctor about why microwaves couldn't be put in each dorm room. Proctor said due to all the electrical appliances in the rooms (i.e., stereos, TV's, lamps, refrigerators, etc...) the ampage requirement was too low to accommodate an extra electrical appliance.

Proctor said the decision to

purchase the microwaves was made this past summer. The microwaves were paid for out of general funds. The carpentry shop installed all of the microwaves.

Students seem to like this new addition to their campus living. Proctor has received positive feedback. One student responded as Proctor walked into one of the lounges, "These were a good idea."

Asked if any future plans to improve campus living were in order, Proctor said there weren't any right now, but if anyone has ideas for improvements to bring them to any member of the Residence Hall Association, he said that they welcome any ideas students may have and do their best to incorporate them into campus living.

Heather Whitehouse/The Pendulum

Microwaves were placed in all the lounges during winter break. It is the responsibility of the students to take care of them.

Now you can afford to dream in color.

Apple introduces the Macintosh LC.

If you thought that finding a color Macintosh® system you could afford was just a dream, then the new, affordable Macintosh LC is a dream come true.

The Macintosh LC is rich in color. Unlike many computers that can display only 16 colors at once, the Macintosh LC expands your palette to 256 colors. It also comes with a microphone and new sound-input technology that lets you personalize your work by adding voice or other sounds.

Like every Macintosh computer, the LC is easy to set up and easy to master. And it runs thousands of available applications that all work in the same, consistent way—so once you've learned one program, you're well on your way to learning them all. The Macintosh LC even lets you share information with someone who uses a different type of computer—thanks to the versatile Apple® SuperDrive™, which can read from and write to Macintosh, MS-DOS, OS/2, and Apple II floppy disks.

Take a look at the Macintosh LC and see what it gives you. Then pinch yourself. It's better than a dream—it's a Macintosh.
