

"A DREAM BECOMES

Homecoming

Activities

OCTOBER 8-13

Homecoming is coming early to FSU this year. The annual event is scheduled for October 13. As the month of October approaches, excitement and anticipation of the homecoming activities mounts.

Activities for the week of Homecoming include the traditional freshman talent show, parties and dances, bonfires and pep rallies, the crowning of Lettie Williams as Miss Homecoming and the Saturday morning parade. Miss Winston-Salem State University and the Winston-Salem SGA President are among those who have been invited to participate in the parade.

Festivities for Homecoming week are as follows:

MONDAY - Coronation of Miss Homecoming and dance with the Chocolate Funk

TUESDAY - Freshman Talent Show

WEDNESDAY - Dance with the Majors at Utopia Lounge

THURSDAY - Record Hop in Lily's Gymnasium with Don Reed

FRIDAY - Pre-Dawn Dance with Satan's Era and Soul Serenaders

SATURDAY - Victory Dance at the Cumberland County Memorial Auditorium with the Chi-lites and Bloodstone.

HOMECOMING QUEEN AT FSU—Lovely Lettie Williams, a native of Henderson, N.C., will reign over the Homecoming Festivities October 13 when the Fayetteville State University Broncos host the Winston-Salem State University Rams. The Broncos beat Federal City, 21-13 in the season opener. (FSU Photo by John B. Henderson)

Introducing Miss Homecoming

Our Miss Homecoming, Lettie M. Williams, is from Henderson, North Carolina, a junior majoring in Elementary Education. Lettie speaks for herself, "I would like to take this time to thank you, the Broncos, for enabling me to be your Miss Homecoming and I will try to represent you in every way possible. Being a Bronco holds

in my heart great passion and I am able to exercise my love and dignity for Fayetteville State University as your Miss Homecoming. Homecoming

means a lot to the Broncos. It's a day deeply appraised by those involved. I sincerely hope that you will remember me and that day with love and dignity as fellow Broncos."

BRONCO PATTERNS--These FSU students are busy watching the Broncos get defeated by Norfolk State College.

FSU Has Largest Cluster

In a little less than one year, Fayetteville State University has developed one of the nation's largest College - Industry Clusters.

Fayetteville State University's College - Industry Cluster, affiliated with the National Alliance of Businessmen (NAB), has twenty-seven members. According to NAB sources, this is an unusually large number for first year members and FSU has one of the top cluster membership allotments in the United States.

The purpose of the College - Industry Cluster is to initiate, develop and expand a cooperative relationship between developing institutions, the business community, and mainstream institutions: To aid the developing institutions in a variety of ways so that their graduates can be better prepared to compete for jobs in the private sector and to move up to higher positions of professional and executive responsibility on an equal basis.

Hopefully, this will provide an attempt to relate the broad diversity of business expertise and resources -- and the experience of mainstream institutions to supplement and complement the facilities of the developing institutions.

Participating in Fayetteville State University's College-Industry Cluster are Converse Rubber Company, Sunoco Products Company, Kelly-Springfield Tire Company, R. J. Reynolds Industries, North Carolina National Bank, E. I. du Pont de Nemours and Company, West Point-Pepperell, Xerox Corporation, Texfi-Lively Knits, Burlington Industries, Federal Paper Company, Wachovia Bank and Trust Company, N.A., Rea Magnet Wire Company, Cablevision Twelve (12), Rohm and Haas Company of North Carolina Incorporated, Riegel Paper Corporation, Sears Rosebuck Company, Aetna Life and Casualty Company, First Union National Bank, National Alliance of Businessmen, North Carolina Natural Gas Corporation, Carolina Telephone and Telegraph Company, Knit-Away, Incorporated, Hercules Steel Company, Branch Bank and Trust Company, Carolina Footwear, Incorporated, LOF Glass Company, and Veeder-Root Company. In addition to the industry members, various departments within the University are represented on the Cluster.

Fayetteville State University's College-Industry Cluster functions with four standing committees and they include industry and university representation. The committees and their co-chairmen include Jim Webster, Rohm and Haas Company and Milton Yarboro, FSU, co-chairmen, FACULTY, STUDENT, Management Exchange; Grant Bailey, Kelly Springfield Tire Company and the late T. L. Reeves, FSU, co-chairmen of the MEMBERSHIP COMMITTEE and Mrs. C. B. Huff, FSU and Jeffrey King, Cablevision Twelve, co-chairmen of Equipment and Materials.

The co-chairmen of the above committees comprise the Fayetteville State University College-Industry Cluster's Executive Committee along with Perry R. Leazer, FSU, Chairman of the Cluster.

Each of these committees have established a set of goals and objectives for the 1973-74 academic year and these include projects to assist in university programs.

Tentative plans include a Career Information Fair to be held in October, adjunct faculty program to conduct seminars and lectures, cooperative programs for students and participation in the University Advancement Program.

Cluster members are also pledged to assist Fayetteville State University with research, institutional objectives, facilities and equipment, curriculum, career planning and placement, administration and organization, faculty exchange and intership fellowships.

FSU's Cluster hopes to add the mainstream university during the 1973-74 academic year. The mainstream is the third component of the Cluster; other are the university and interested corporation or corporations.

Mainstream universities can contribute different organization structures and approaches to program development not otherwise available to the minority colleges.

University officials emphasized that the Cluster concept is not a one-way street. It represents a one and one relationship with the University and industry, both reaping measurable benefits.

FSU's College-Industry Cluster meets monthly and these sessions include reports of various cluster activities and planning sessions for future mutual projects. It also provides and opportunity for members to talk with university personnel in an informal setting about mutual problems and possible solutions.

Individuals or businesses interested in becoming affiliated with the Fayetteville State University College-Industry Cluster can contact the Development and University Relations Office, Fayetteville State University, Fayetteville, North Carolina 28301, (919)483-6144.
