## Broncoettes CIAA Champs

Fayetteville State University's Women's Basketball team captured the Central Intercollegiate Athletic Association (CIAA) Women's Basketball title with a hard fought 63-61 victory over the Trojannes of Virginia State College.

The three day tournament was held at Elizabeth City State University. The top four teams in the Northern and Southern division of the CIAA were invited to the tournament. Even though the Broncoettes of Fayetteville State come into the tournament seeded only third in the Southern division, Fayetteville State was the league's hottest squad winning 12 of their last 14 games.

Largely responsible for this turnabout was the return of 6 ft. 4 in. Katrina Owens. Along with Angelia Newsome, a returning Senior All-CIAA performer, and a squad made up largely of freshmen and second year players, Owens &

Co. blitzed through the second half of their schedule to finish the regular season 18-7.

Fayetteville's first opponent in the tournament was Norfolk St. College the second seed in the Northern division. The Broncoettes battled back from a 37 to 28 halftime deficit to win 72-74. Freshmen Katrina Bullock and Dianthia Morris provided the bulk of the scoring punch garnering 23 and 22 points respectively. Owens added 13 points and a whopping 23 rebounds. Next, the Broncoettes faced the only team that had beaten them in their last 15 games, Winston-Salem St. The game was everything it was built up to be as Fayetteville once again had to struggle from a halftime deficit to win 88-84, in two overtimes. Bullock again led the Broncoette attack this time with a season high 32 points. Owens contributed 19 and 26 rebounds. The finale saw Fayetteville against a determined Virginia State squad. For the third time in

the tournament the Broncoettes had to fight back from a halftime deficit. Fayetteville's second half surge sparked by Bullock's offense and Owens' shot blocking and rebounding earned them the crown. Owens finished the tournament averaging 16.6 ppg and 23.6 rpg for the three day affair and was named tournament MVP. Bullock and Morris ended as Fayetteville's leading scorers for the tournament and were named to the All-Tournament team along with Owens.

Morris and Newsome received All-Conference honors and first year coach Maceo Smith was named CIAA coach of the Year. The Women now are readying themselves for the National Association of Women's Sports National tournament to be held in Hampton, Va. March 13-17. We salute you Lady Broncos and wish you the best of luck in the upcoming National Playoffs.

### HEW Officials Visit Campus

Left to right: Dr. Mary Berry, assistant secretary for Education and Mr. David Tatel, Chief of Civil Rights Division HEW, inspect the facility and equipment to the Division of Business with Dr. Charles "A" Lyons Jr. Chancellor of Fayetteville State University, Feb. 20, 1979. ### Black Collegian List Summer Employment Programs

The national magazine of

Black college students, The Black Collegian Magazine has a wealth of information geared toward the needs of Black college students. In addition to the usual featured career outlooks and job opportunities the '79 January-February issue includes a section on special work-study and travel programs specifically geared to Black college students. This issue also contains a section on opportunities for students in engineering the most lucrative field of study today.

If you are seeking permanent or summer employment, this issue of THE BLACK COLLEGIAN provides numerous leads. A limited number of free copies are available in your placement office.

## Congratulations, Broncoettes!

## Bye Bye Newbold

by Fidele Essono

Walking along Murchison Road, the pedestrian will automatically notice a remarkable break out-workers with hammers, some stacking bricks or riding a caterpillar for pushing down the old Newbold's walls. Newbold was one of the oldest buildings on Fayetteville State's campus.

According to the files and tellers of history, Newbold was built in 1930 and cost \$68,000. It had sixteen classrooms, six practice rooms, a cafeteria, a library and a teacher's gymnasium and could hold 700 elementary school children. It also served as a laboratory for student teachers at the college. The Fayetteville Teachers College was undoubtedly one of the oldest negro institutions of the south and played a major role

in the past for the black community in North Carolina as well as surrounding states.

It provided the academic preparation for many teachers who were to provide educational opportunity for the developing black intellectuals. The Newbold School remained the nest of some of those students who spent their moments in it building the black learning potential. In fact, only Newbold's building is being torn down, not the quality of education or its efficiency that benefited those who studied there. The experience of watching such a monument being torn down should encourage this and succeeding generations to excel scholastically. We should improve ourselves through higher education at FSU.

Newbold Building

Newbold has apparently been razed to make way for continuous technical change but

its specter and legacy is still around and should live forever.

### NSF Chemistry Research Grant Awarded To UNC-G

GREENSBORO— Seven chemistry students will have the opportunity to do research this summer at the University of North Carolina at Greensboro under a National Science Foundation undergraduate research participation program.

The NSF has awarded \$13,970 to the UNC-G Department of Chemistry to support 10 weeks of research by seven undergraduate chemistry majors between May 21 and Aug. 10, 1979, according to Dr. Walter Puterbaugh, head of the department.

Dr. Puterbaugh said participants in the special program will be selected from current junior or first semester senior chemistry majors who show a high potential to benefit from a research experience at this stage of their career development.

He added that at least three of the participants will be picked from among student applicants at colleges in the region other than UNC-G, and a special effort will be made to locate qualified minority and handicapped applicants.

Eastern Airlines, Inc. has developed a service to aid students traveling on cor-

porate interviews. This service is called the Student TRIP Service.

TRIP, short for Travel Reservations Interview Program, is the service Eastern uses to issue airline tickets to students traveling for on-site interviews. Here is how TRIP works: Once you are notified that you are invited for an on-site interview, simply call Eastern's Reservation Office and ask for the Student TRIP Desk. (Be patient and persistent, this is not a well publicized service).

Applications should be sent to the UNC-G Department of Chemistry by March 15. Those selected should be notified by mid-April.

"The research problems for the program were designed by faculty research supervisors to provide experience with a variety of modern research techniques, and to encourage independent involvement and growth of the participants," Puterbaugh said.

Tell the reservations agent the name of the company that invited you, the company's address, the name and telephone number of the person that invited you. The reservations agent will call the company to confirm this information and issue you a non-redeemable airline ticket. The company will pay Eastern for your ticket. If the company does not offer you a ticket and if you do not have ready cash to pay for your ticket, this service will help you greatly.
