Homo Sapiens

Man is the strangest of all God's creatures. He spends a life-time and millions of dollars discovering ways and means of growing more food than ever before. Then he elect governments which spend millions of dollars destroying that food so prices can be maintained: meanwhile, because of high prices of food thousands of children go to bed hungry at night.

He fights for snorter hours and then gets his wife a job while he either moonlights or complains that he has nothing to do.

He hires traffic officers to protect him, then complains when they give him a ticket for breaking the laws which he wants enforced.

He brags on his sister's vir-

tue and tries to take that of every other woman.

He can't stand his own smell or that of his mate so he spends millions annually making sure both of them smell like something else.

He drinks to drown his sorrows, then gets into more trouble because he has a drinking problem.

He swears all politicians are crooks while doing all in his power to beat the income tax.

On top of all this he believes Heaven in his final reward for leading a good life but, when he is ill, spends his last dollar because he is in no hurry to get there.

And who stands by him through all this, for better or for worse, in health and sickness? That's right--you guessed it the first time--"Woman."

Earth Week

The Biology 103 class dragged out of bed before the chickens during Earth Week to get to school by 7 a. m. to watch the "Today Show." Why did we do such a ridiculous thing? To hear and discuss the opinions of ecologists and environmentalists who were discussing the problem of pollution. The topic of the week was "New World or No World" and dealt with the necessity to change our ways of living or not to live at all. We heard from such people as Paul Ehrlich, the author of "Population Bomb," who proposed families be limited to two children; Ralph Nader, who stated that more money was spent by large industries for advertising than for pollutant research; and Charles Luce of Consolidated Edison power company who stated they did not spend as much for advertising as they did for research and they had cut advertising in half.

One day was devoted to London's pollution problem and how the government had enforced laws to prevent air pollution by home heating systems. They started their program in 1952 after 4000 people had died as a result of heavy polluted smog. Coal burners were replaced by

smokeless fuel burners with the government paying 70% the cost.

Some suggested using taxes to encourage anti-pollution; others suggested using the ballot to replace non-actors with those willing to do something about the environment. It was brought out that there are laws regarding pollution but they are not enforced. There should be an agency modeled after NASA to coordinate all anti-pollution legislature and enforcement. Water polluters are being allowed to continue polluting because there is no way to enforce laws on the high seas. Charles Luce suggested working from within a company to get anti-pollution controls. He stated that by going to work for a company one could find out exactly what was being done and what more should be done. To start on the local level by cleaning up hometown streams, rivers, land, and air is necessary to get something accomplished nationwide to propose and not those who just say something needs to be done. It was stressed that the end need not be around the corner but immediate action is needed to prevent the farther destroying of Nature and our Planet.

Did You Know That??

The leading targets for motor vehicles crashes in North Carolina are poles, trees, and signs in that order.

Mr. Charles E. Waller, WCC Dean of Students, was voted "the best looking boy" by his senior high school classmates.

When you travel through the state of Alaska you go through four time zones.

Meko Crousen was born in the suburbs of Tokyo, Japan, and hopes to visit Osaka this summer? Lots of luck Meko. Osaka is a beautiful city. The 1970 Expo is being held there this year.

A woman's picture at one time appeared on a dollar bill? And that there were once three dollar bills? And also that one time you could eat and drink money in some states.

Mrs. Mary Cuthrell, Spanish teacher, has a birthday on the 11th, got married on the 12th, and had two babies on the 14th? WOW!!! How do you explain that one to your students?

A German hippie is called a Flower - Kraut.

George Trautwein, WCC music teacher, was musical director for the "Lost Colony" production for about 15 years?

WCC In Competition

Wayne Community College had two table clinics to compete with about 33 others at Pinehurst this year. It was held at the Whispering Pines Motel, May 12, 1970 at 10:30 through 12:00. Some of the schools that participated were:

UNC School of Dentistry, Central Piedmont Technical Institute, Wayne Community College.

Two clinics from WCC were titled:

1. Patient Knowledge of Nutrition, 2. Rubber Dam Placement.

1. "Patient Knowledge of Nutrition" was demonstrated by Connie Kennedy and Annette Johnson. It showed a wheel of the basic nutritional groups and a flip chart of vitamin deficiencies.

2. "Rubber Dam Placement" was demonstrated by Doris Cogdell and Connie Richardson. It showed a flip chart on the order of procedure, a film strip showing the different steps in placing the rubber dam. This film was made by Mr. Charles Lee of WCC. There were also illustrations of a few basic steps in the rubber dam placement.

On Tuesday afternoon at the Dental Assistant Session, the awards were given out.

"Rubber Dam Placement" --1st prize!

All four girls worked hard on winning the trophy! This is the 1st year that Wayne Community College has won recognition at the North Carolina Dental Convention. The trophy is kept by WCC for one year. Ribbons were received by the winners to keep!

Phi Theta Kappa Chapter Installed

The installation of Phi Theta Kappa of Wayne Community College took place at Saint Francis Episcopal Church, Goldsboro, N. C., Sunday, March 1, 1970, at 7:00 p. m. Mr. Walter Brown, acting in the absence of President Clyde A. Erwin, and Mrs. Mildred S. Council, Chapter Sponsor, installed the following officers who are the five charter members:

President, Patricia Hagan Ford; vice president, James Douglas Burch; treasurer, Margie Lee King; secretary, Judith Carolyn Jones; council member, Ronald John Werthelm.

Following the installation of officers, Nu Kappa Chapter and Omnicron Rho Chapter members performed the initiation service. Mrs. Betty Dauchert is faculty sponsor for Omnicron Rho Chapter at Lenoir Community College, and Mr. Gene Mercer is faculty sponsor for Nu Kappa Chapter at Mount Olive Junior College. Each pledge received a long stem white rose as a symbol of a newly formed intellectual friendship. At the close of the service Mr. George Trautwein of the Music Department sang the Phi Theta Kappa song.

Mrs. Wilma Zipf and Mr. George Trautwein serve on the Scholarship Committee with Mrs. Council and they assist in all the activities of the Phi Theta Kappa Fraternity.

To qualify for membership in Phi Theta Kappa a student must be regularly enrolled in a two year college, shall be carrying a full-time load (as defined by his institution) and shall have completed at least one term in a two year program leading to a degree. A student shall also be of good moral character, shall possess recognized qualities of citizenship, and shall have established academic excellence as judged by the faculty.

WAYNE COMMUNITY COLLEGE

Summer Quarter 1970

June 10—Wednesday, 9:00-1:00, Registration.

June 11—Thursday, 7:00 a.m. Classes begin.

July 1—Wednesday, 10:00 p. m., Holiday begins.

July 6—Monday, 7:00 a.m., Classes resume.

August 25—Tuesday, 8:00 a. m., Final Examinations begin.

August 28—Friday, 10:00 p. m., Classes end.

DR. CHARLES E. POWELL

"New World, Or No World"

"New world, or no world? This was the question that was proposed to those who watched the "Today" program during the week of April the 20 through the 24. The entire week of the "Today" program was devoted to the problem of pollution. Since pollution deals directly with biology and the fact that the information presented on the "Today" program would be the most up-to-date, the Biology class, 103, decided that they should watch this series of programs.

The biology class met in the electronics room Monday through Friday at seven in the morning until nine o'clock. As a member of the class, I know that it was often difficult to get up and be at school on time at this hour, but the effort was well worth it. The entire series was exceptionally good and I feel that the entire class benefited from watching the programs. The programs started serious thinking among us about the problem of pollution.

There were numerous speakers and group discussions during the series. One of the most important aspects of the programs was the fact that the problem of pollution was viewed from many different angles. We did not receive just one viewpoint, but the viewpoints of different people from different walks of life, from doctors to college students.

Pollution of the oceans, rivers, air and land were all discussed during the series. The fact that plastics are a major pollution problem was brought out during the programs. They will not decompose and if burned, will give off a poisonous gas. Another fact brought out during the "Today show" was that the pollution of our rivers which empty into the oceans may in a relatively short period of time, kill our oceans!

Another important aspect is that pollution cannot be blamed on any one part of our society, such as industry. Pollution is a problem which concerns everyone, and often the worst polluter is the individual person. We must all take the problem of pollution seriously, as indeed it is. Everyone should think about pollution and the ways in which he can help to solve the problem. "New world or no world?" Think about it!

Dr. E. Charles Powell will begin his duties as chairman of the Science Department and coordinator of Health Occupations at Wayne Community College on July 1st, 1970. He succeeds Dr. William Draper who is accepting a position in the department of Organic Chemistry at Syracuse University.

Dr. Powell has practiced medicine in Goldsboro for a number of years. He served as Chief of Staff of Wayne Memorial hospital from 1952-1954 and as Chief of Obstetrics from 1955 until last year.

He states that he is looking forward to his new position with a great deal of pleasure. "There is a great shortage of technicians in the United States today and industry and science are in the peculiar position of having a much greater need for technicians than for graduate scientists and engineers."

Dr. Powell's wife, Mrs. Eleanor Powell is chairman of the Liberal Arts department at WCC.

Faculty Resignations

Wayne Community College students will be saying their final farewells to the following faculty members whose resignations have been submitted:

Ed Nicholson, Dean of Academic Affairs; Charlotte Barry, Dental Occupations; Dr. Wm. Draper, Chairman, Science Department; Chuck Edgerton, Electronic Data Processing; Shirley Graham, Business; Dee Kromi, English.

We regret the loss of these faculty members and wish them much success in their new endeavors. Announcements of replacements will be forthcoming.

Sunrise

(JAMES DILLET FREEMAN)

Sunrise is never sudden but comes slowly.
Out of His heaven-bowl God pours His holy
Water of clear and crystal light to run
Through the rose window of His perfect sun
And fall into our mind. In the beginning
We sense not light so much as darkness thinning;
Dawn touches first the tips and tops of things--
The mind to catch the morning must have wings,
And when the day is cloudy, day may start
Not so much in the sky as in our heart.
Yet after a while, all imperceptibly,
We rise and look around us--and we see--

The law of retribution presses upon every man, whether he thinks of it or not. It pursues him through all the courses of life.--Albert Pike.

THE WAYNE COMMUNIQUE

THE VOICE OF WAYNE COMMUNITY COLLEGE

GOLDSBORO, NORTH CAROLINA

Editor..... Bill Daniels
Reporters..... John Lassiter, Neal Herring, Robert Kaylor,
George Joseph, Mike Powell
Photographer..... Arnold Lancaster
Chief Typist..... Dianne Casey
Assistant Typists..... Joe Daniels, W.C.D.
Layout and Proof Editor..... William Daniels
Sports Editor..... Milford Jones
Intramural Reporter..... Bobby Friede
Advisors..... Dean Waller, Mrs. Ward, Mrs. Reid, Miss Griffith

The Communiqué is published monthly for the students of WCC. The opinions expressed here do not necessarily represent those of the Board of Directors, staff or faculty of WCC.

Work hard, play hard!
