SPRING BUG COMES TO WCC

It seems the spring bug has finally reached WCC campus. Everyone knows that spring is the time for lovers and this spring is no exception. Not only are the birds and the bees into loving, but so are a lot of students. WCC's halls, library, commons, stairs, and the parking lot have recently been graced with loving couples

holding hands and..... Yes, Spring has come.

The warm breeze and hot sun make it very difficult to make classes on time, if at all. Even the faculty has loosened up after the long hard winter.

Out With Long-John's, In With Hot Pants

One way to tell spring has reached the WCC campus is to observe the change in the students and dress. Gone are the heavy wollen socks, long coats, boots, and long-john's. These are replaced by halter tops, hot pants, midriff blouses, tee-shirts and bare-feet. Since WCC has no dress code anything goes.

Everyone seems to be in a joyous mood now that the warm weather has finally arrived. Class cutting and tardiness doesn't seem to be such a terrible ordeal anymore. Faculty members have even been caught sunning on the steps.

They're Going To Be Fixed

The roads that go through the front parking lot have really been taking a beating this winter. However, the time has come for the roads to be fixed. Collegiate Drive is a state maintained road up to the point of the concrete; the school is responsible from this line on. The roads are to be

patched temporarily at an estimated cost of \$400.00. However, in the near future, when the new buildings are completed, the roads will be repaved at an approximate cost of \$10-20,000. The funding for this comes from the parking tickets often found on cars here at W.C.C.

Update On The New Buildings

All structural parts of the new buildings, such as walls, electricity, plumbing, and other architectural work have been approved by the state inspectors. Everything pertaining to the buildings except curbing and guttering is complete. This will be completed shortly and must also be inspected.

The Board of Trustees say that the buildings are incomplete until all landscaping and parking areas are finished, but this is being worked on steadily.

The Child Care Center must be licensed by the state before it is approved for operation. This, hopefully, will be done by late fall of this year.

The guidelines for determining the eligibility of children to attend the facility have yet to be

determined. Also to be determined is who will make the final decision. It was suggested that it will probably be a joint effort of the Life Science Department, Early Childhood, and the Administration. The children approved will probably be one-third from the faculty, one-third from the students, and one-third from the community, but this is not definite.

The Board of Trustees have awarded the Vending Machine bids to Dermox, Inc., of Taylorsville, N. C. They are now working on the interior part of the Vending area.

Wouldn't it be wonderful if the people who lost their tempers couldn't find them again?

EVER SEEN THIS? 'TIS A POT HOLE ON COLLEGIATE DRIVE.
