

Meet WCC's Cafeteria Staff

By: Daphne Grayum

For those students who have not taken the opportunity to frequent our new lunch facilities in the Student Center building I must ask...

WHERE HAVE YOU BEEN???

Over the summer months WCC upgraded the café' facilities, making things better not only for the students but for the cafeteria staff as well. New equipment has been added, the area is now closed in (keeping the students from lining across the hallway), and a new deep-fryer was added.

**We now
have french-
fries!!!**

(sorry, couldn't help myself!)

I felt that now was

27

a good time to interview the cafeteria staff and find out how they like the new facility, what they would like to add or remove and how we [students] could make their job somewhat easier. Following are some of the responses I received:

Q: How does everyone feel about the new facilities?

A: We really like it! We have more room to prepare the food and the displays for the food is a nice addition.

Q: Have you had any responses from the students or faculty about the change?

A: Yes. Most have stated that they like it but others wanted to know why we "closed" it. (To help keep the hall clear.)

Q: Where is the food prepared?

A: All the food is prepared fresh daily in our cafeteria by the ladies.

Q: Does the new arrangement make things easier when serving the students?

A: For the most part it does but if the students would move down the line and prepay while their order is cooking it would help. The café' ladies are very good about remembering who has ordered and will get your order to you.

Q: Is there anything else that you'd like for the café'?

A: **A NEW TOASTER!!!** We are still using the old toaster which has forgotten how to pop up the toast when it's done. We end up with burned toast at least once every day.

How many of us stop to think of how hard these ladies work every day to prepare breakfast and lunch for those of us on campus? Show them how much you appreciate them and check to be sure your tables are clean when you leave. Just that small act of kindness would make their job much easier each day!
