GUILFORD COLLEGE, N. C., FEBRUARY 7, 1917.

NUMBER 17

"DEVELOPMENT" Y. M. C. A. SUBJECT

Ira G. Hinshaw led the prayer meeting service at Y. M. C. A. last Thursday evening. He chose as his subject the word, "Development."

The speaker spoke of the necessity of having a well developed physique. He then proceeded to tell how this might be brought about. He cited the life of a good athlete as an example. He said that the human body is like a machine and if it is not properly cared for it soon becomes unfit to perform its functions.

He then discussed his subject from the standpoint of mental development. He said that there are many ways of developing the mind, chief among which are observation, investigation and imitation. The student who is only an imitator is a failure. Observation and personal investigation are more productive in the processes of mental development.

The student who has one or both of the foregoing characteristics does not possess a fully developed personality. There must be the element of soul cultivation. This is accomplished in much the same way. As a mason builds a large structure, as the workman completes the building by laying one stone at a time, so must the individual frame his spiritual character by doing the little things as he meets them.

COX HALL TAKES FIRST GAME.

Cox Wins in Soccer 3 to 0—Archdale Strong in Second Period.

The first game of the series between Archdale and Cox Hall for the campus championship in soccer football was played Thursday afternoon on Hobbs' field. The field at first glance appeared to be more suitable for a swimming contest than for football, but after Lineberry and Bill Hollowell had rolled around in the deepest lakes for several revolutions Professor Woosley decided that it was in good shape for playing. Miss Benbow was afterwards heard to remark, however, that she certainly would like to hire those boys to operate the wringer in the laundry as they knew how to absorb water.

The two teams were pretty evenly matched as to size and weight, but the Cox Hall team had slightly the advantage of the Archdale boys in passing and shooting as the score of 3 to 0 in favor of Cox Hall indicates.

The first half started with Archdale kicking off to Cox. After about a ten minute scrimmage back and forth from one end of the field to the other the Cox Hall boys rushed the ball down to their end of the field where Fort's lucky toe shot the pigskin under the posts for the first goal. Two other goals were made in the first half by Smith and Willard in about the same manner. There was no scoring on either side during

Quakers Win and Lose

QUAKERS BREAK

LOSING STREAK

After Losing Three Games by Close Scores Guilford Defeats Elon in Cleanly Fought Contest.

In a good game of basketball marked by clean playing, Guilford defeated Elon by the score of 28 to 19. Due to the exceedingly cold weather the first half was slow, and void of thrilling plays. In the outset the Quakers took a lead, but by sluggish playing of the home team, close guarding by Elon when the ball was under the Crimson and Gray's goal, and the precise shooting of foul goals by Sorrells, Elon cut this lead down, and finally forged one point ahead, the score at the close of the first half reading 11 to 12.

After an interval of ten minutes the Crimson and Gray quintet seemed to be imbued with new energy and spirit, and within a few minutes of play pushed ahead and continued to pile up more points and increase their lead thruout the remaining time of play. From this time onward the Crimson and Gray was never in doubt of victory. The fast work of Semans, both in getting the ball and perfect basketing it, was the outstanding feature of the contest. Of the 28 points he secured 10 for his team. During the first half Elon secured only three field goals, and was able to obtain two in the second period, but the wonderful tossing of foul goals by Sorrells increased her score, he perfecting 9 out of 12 chances. Both teams exhibited good defensive qualities as shown by the score.

Line-up:

Guilford.	Elon.
Semans R.F.	Franks
Smith L.F.	Harris
Zachary C.	Cox
Walser R.G.	Sewell
Massey L.G.	Sorrells

Substitutes: Smith for Zachary; Jones for Smith; Morris for Walser.

Field goals: Semans, 5; Jones, 2; Zachary, 1; Massey, 1; Franks, 3; Harris, 1; Sewell, 1.

Foul goals: Massey, 5; Sorrells, 9. Referee, Stuart.

PROFESSOR BALDERSTON RECOVERS.

Professor Balderston, who suffered a very painful accident on Tuesday, January 23rd, in a soccer game on that day, has sufficiently recovered from the operation performed at St. Leo's Hospital last Monday to be able to resume his work here. We are glad to state that the operation was a complete success, the Malar Process, the cheek bone, which was badly crushed in as a result of the accident, having been reset and is now in its normal position.

Mr. Archie Riddick, '16, spent Saturday and Sunday at the college.

GUILFORD LOSES HEART-

BREAKING STRUGGLE

Presbyterians Win in Hottest Contest Ever Seen on the Local Floor.

In one of the most hotly contested and spirited games of basketball in the annals of the game at Guilford, the Crimson and Gray lost to Davidson on Tuesday night by the close score of 27 to 28. Guilford as a unit outplayed the visitors, but due to the stellar work of Childs, the husky Presbyterian forward, and the passing of Hedgweld, in the last half, the Quakers went down in defeat by a margin of one point.

Guilford opened the game with fast and snappy playing. Massey obtained the ball near Davidson's goal, after it had been tipped off, dribbled down the floor around his opponents, and made a splendid shot, thus registering the first point of the game. This play was followed in close order by two tallies, which were easily made by Captain Smith. While the ball was in a "mix up" Walser hurried up the floor, and no sooner than it was extricated, was it passed to him, and in an easy manner he made the trial good. Massey added two more field goals by evading his opponents, and dribbling in proximity to the goal, then "coining" the pigskin.

During this time, Davidson, however, was not idle, ut bon the alert, piling up points. She showed good form in passing and securing goals. Childs lead his team-mates with three field goals. He exhibited a keen eye and some little skill in pocketing the "pill," registering two difficult shots from the corner and middle of the floor. Walker added two field goals for his team, while King was able to contribute one.

The first half ended with the score standing 12 to 16 to favor of Guilford. Davidson, however, in the second period, came back strong, and in spirited form, and with a changed line up, Hedgweld having been substituted for Childs and Childs for Deal, tied the score in a very few minutes, the tall Presbyterian center securing a long shot from the middle of the floor and Childs making an easy one safe. The score stood tied for a short while, and Davidson forged ahead, but only for a few moments to be tied again by Guilford. However, with the systematic yelling of the first part of the game having ceased, and being replaced by individual encouragement the members of the Crimson and Gray's quintet, and with clock-like playing of the Davidson five, with Childs' deadly shooting, the Presbyterians waged forward into a narrow lead, which they were able to retain by energetic playing. When the referee's whistle announced the close of the game, Guilford was only one point behind

REV. C. M. SHORT SPOKE SUNDAY

Delivers Two Excellent Sermons to the College on Sunday.

Rev. Charles M. Short, '03, was a most pleasant visitor here during the week-end, delivering two very timely and interesting sermons to the students on Sunday. At the morning meeting, Mr. Short emphasized the neighborliness of the Good Samaritan. He described religion as a life and not merely a philosophy. The real significance of religion is to be realized in the everyday relations of man to man. The Good Samaritan found the great opportunity of his life in the pursuance of his usual duties and not in a spectacular occasion. It was the simple opportunity to give personal aid to a stranger in need which immortalized the hitherto unknown character. In conclusion Mr. Short added that the greatest and most characteristic feature of the story is to be seen in the uncalculating, spontaneous love which prompted the compassionate act of the neighbor.

At the evening meeting Mr. Short discussed the value of an ideal in life. He outlined the true end of life as the perfectly developed Christ-like character. The object of life was not the Hedonistic ideal of pleasure but the perfected life.

Both discourses were excellently received and thoroughly enjoyed. His reminiscences of life here at Guilford and his recitations of incidents which occurred during his course were very interesting. Guilford is always glad to have Mr. Short make us his annual visit and to many this seemed to be the most enjoyable and beneficial of all visits. Certainly was it pleasant to have his sincere presentation of some of the very vital phases of religion and moral conduct.

THE ELECTRON THEORY AT SCIENCE CLUB.

On Wednesday, January 31, the Science Club held its regular meeting. In the absence of Prof. Balderston, Jesse Garner, the vice-president, presided. The program consisted of a talk by Prof. Brinton on electro-magnetic waves. He first took up the method of producing the waves used in wireless telegraphy, illustrating their properties and explaining inductance and capacity in condenser circuits. In discussing the electric oscillations which produce visible light he gave an account of the electron theory and the evidence by which it is supported. The manner in which this theory explains some of the chemical and physical properties of matter was shown, as well as the nature of radiant energy and the probable internal structure of an atom. He also illustrated how the theory of the electrical constitution of matter and the idea of electric mass has led to many curious conclusions which contradict the Newtonian mechanics.
