NUMBER 18

GUILFORD LOSES TO ELON

Last Game of the Season Lost by Narrow Margin.

On the evening of February 26, Guilford lost to Elon College in a hard fought basket ball game. The teams appeared to be evenly matched with a slight advantage in favor of the visiting team. At the end of the first half the visitors were only one point ahead, the score being 9 to 10. The Guilford players had hard luck in finding the basket, and even lost enough foul goals to win the game by a safe margin. Our boys had displayed real form both against Trinity and Davidson, yet for some reason they were unable to take the offensive in this game. Frazier was hampered by having a

MRS. BINFORD SPEAKS TO THE Y. W. C. A. ON "RESULTS"

Mrs. Binford came to the Y. W. C. A. with a real and inspiring message on last Thursday evening. She read II Timothy 4:7: "I have fought a good fight, I have finished the course, I have kept the faith."

Mrs. Binford gave an insight into the missionary life of Elizabeth Binford, whose field is Japan, by reading a list of questions she presented, on being asked what results she could show for her work. She asked in this list, if it was worth while to do the little every day tasks which confront a missionary daily, such as helping the mother take care of a sick baby, going to prayer meeting regularly, or holding one, tho only one person were present.

Wm. Sayerly, who was a very unlearned man, and a man without training, felt a desire to do ministerial work. He went to the town of Brighton, England, and there met with people so far above him that he left discouraged. But while there he had preached and he did not know that in his congregation was a bright girl who had long loved pleasure, who had become interested, and decided to change her whole life. This girl was Elizabeth Gurney, who later became Elizabeth Gurney Fry. The results Wm. Sayerly did not know, but the results we may see in the life of Elizabeth Fry.

Paul, as a missionary, did not know the results of his going to Rome, but the result is that Christianity was saved for the world.

"We," said Mrs. Binford, "cannot just as in the case of these people know the results of our work. There must be results, but it is perhaps better for others to discover them."

The meeting being in charge of the Mission Study Committee, Mrs. Binford's talk was almost entirely on the subject of Missions. It was an inspiration to all those who heard it and it caused each person to ask "What will be the result of my life."

LINEBERRY WINS THE WEB MEDAL

Oratorical Contest Up to Usual High Standard.

The thirty-third annual oratorical contest of the Websterian Literary Society was held in Memorial Hall on Friday evening of last week. It was a contest of unusual merit and much credit is due the contestants for upholding the high standard established and maintained by the Websterian Society.

Hobart Patterson presided and Clarence Macon was chief marshal, being assisted by H. N. Willard, D. J. White, Jack Brown and Charles Robinson.

The following is the program of the contest:

The Great Need of the South—J. D. Dorsett.

Industrial Reconstruction in America—Earl McFarland.

Bolshevism—Paul Trotter.

America's Mission to Mankind—R. A. Lineberry.

Dignity of Labor—Herman Raiford.

The judges were Prof. Herbert Ruckes, Prof. O. V. Woosley and Mr. H. D. Lane. Mr. Woosley announced the decision and delivered the medal to R. A. Lineberry.

PHILOMATHEANS SHOW THEIR LOYALTY TO GUILFORD.

The Philomatheans, at their last meeting, had one of the most interesting programs of the year. The numbers of the program all referred to loyalty to Guilford.

The program began with "Hail, Dear Old Guilford," sung by the entire society. As the words of this song were uttered, it seemed that surely they were from the depths of every Philomathean's heart, because an expression of joy beamed on every face.

Mary Coble then gave an interesting talk on "Why We Should Be Loyal to Guilford." In this she mentioned many reasons for our loyalty. She spoke of the many advantages that Guilford affords, the high ideals she has set forth, the general association and the inspirations of the faculty.

Following this number the society sang "Guilford Campus Song," with a great feeling of love and appreciation for the beautiful, green, swarded campus of Guilford.

Edna Raiford then told many interesting facts about her first impression of Guilford and why she chose to come to school here.

The last number of the program was a beautiful poem, "Tribute to Guilford," composed by Era Lasley, a Philomathean of '13.

Mary Dixon gave a good critic report and society adjourned.

THE FACULTY DEFEATS SENIORS

Annual Event Featured by More Strenuousness Than Skill.

One of the most interesting and hard fought basket ball games of the season was played here Friday night by the teams representing the faculty and the Senior class. To the great surprise of the spectators and the utter disgust of the Seniors the faculty won by a score of 14 to 9.

Mr. Bogue, who is working in the financial campaign, played for the faculty and it is largely to his playing that the success of the faculty is due. He played as if he had been playing all the season and was at once the fastest man on the floor. Every one viewed the faculty team with a feeling much akin to sympathy when they made their first appearance on the floor but that feeling was quickly changed to one of admiration as soon as the game started, for the faculty showed that they were at home and that they had no idea of losing the game.

The Seniors saw at once that to win they must do all within their power and they played with their usual determination and perseverance, but they were powerless on account of the excellent guarding of Dr. Binford and Professor Carroll. Professor Ruckes played center for the faculty and shot all the foul goals with unerring aim not missing a single shot.

There was much enthusiasm among the spectators and the supporters of each team vied with each other with a determination equal to that of the players. Professor Ancombe was the only substitute for the faculty and altho he had to scrap up a uniform from various sources as was shown by the fact that he had a green stocking and a red one, he was ready to do all in his power for the success of the team.

The scoring began early with a shot by Bogue but the Seniors quickly retaliated and two field goals by Patterson and Williard put them in the lead. Two foul goals for the faculty and one for the Seniors, a shot by Bogue and another by Patterson ended the scoring in the first half with the score 7 to 6 for the Seniors. The second half began strenuously and before long the Bogue had put three through and Macon one. A field goal by Brinton ended the scoring. The line up:

Brinton	F	Williard
Bogue	F	Patterson
Ruckes	C	Macon
Carroll	G	John White
Binford	G	Joe White

Field goals, Brinton 1, Bogue 5, Williard 1, Macon 1, Patterson 2; foul goals, Macon 1, Ruckes 2. Referee, Stafford.

PROF. DOWNING LECTURES ON TANNING

Former Chemistry Head Addresses Public Meeting of Science Club.

Prof. John Steele Downing, for four years head of the Chemistry Department of Guilford College and closely identified with many of the college activities while here, lectured last Saturday night before the members of the Science Club and their guests in Memorial Hall. His subject was "The Manufacture of Leather" and he held the close attention and interest of his audience while dealing with this important but little known topic. Prof. Downing began with an outline of the history of the development of the tanning process and then proceeded to describe in detail the main steps in that process as at present used. Beginning with a description of the green hides and the classes into which they are divided he showed

PROF. RUCKES LEADS Y. M. C. A.

The regular meeting of the Y. M. C. A. last Thursday night was led by Prof. Ruckes. He chose for his subject the word "Life." We know practically nothing concerning the origin of life, he said. He then took up the meaning of the four letters—L-I-F-E. L stands for loyalty; I stands for integrity; F stands for fidelity; and E stands for energy.

We have a cause to which we should constantly be loyal, the cause of Christ. Then the next allegiance we owe is to our country—our soldier and sailor boys—who have sacrificed so much for the sake of establishing and making our country safe for democracy. Not only should loyalty not stop here but we should be loyal toward our fellow man and to ourselves.

"Integrity" is honesty—true moral soundness, upon which we build and shape our lives. The majority of us are morally sound but we are prone to err. Sometimes our fault is trying to cheat, not so much the other fellow, as ourselves. In our school work, instead of relying on ourselves, we rely on other sources and by so doing we are stunting our own moral and mental growth.

The next, "fidelity"—is the necessity to fill an obligation, not only a personal obligation, but an obligation to mankind. The duty we owe toward each other depends upon the fidelity of the individual. Therefore the principal, fundamental obligation of life is fidelity.

Last but by no means least is "energy." If we intend to accomplish anything in this life we must have an ambition to attain a goal. Some of us have set our goal too low, while others who are aiming high are the ones who are successful in life. Put more ambition into your work, our school life is not measured by the A's and B's we make on our studies but by the work we do. All life is summed up in these four words—loyalty, integrity, fidelity, and energy."
