

# THE GUILFORDIAN

VOLUME VII.

GUILFORD COLLEGE, N. C., SEPTEMBER 22, 1920

NUMBER 2

## First Numbers of Lyceum Course

De Jew the Wizard Here Oct. 2.

The College lyceum season will open Saturday night, October 2, with a popular entertainment to be given by DeJew, the wizard. Part of the numbers will be furnished by the Piedmont Lyceum Bureau who directed last year's course and part will be secured independently.

Four numbers will be given during the first semester. The first one will be here October 2. The Tschai-kowsky Quartette will be here October 22. Two other numbers for this semester are: a recital in November by a famous soloist, and a lecture in December. Further notice of these numbers will appear later.

DeJew the Wizard, who will entertain the college Saturday evening, comes with high recommendations from the towns where he has given performances. His program will consist of mysteries of the most alluring nature and will be found to be the last word in magic.

The chairman of the College Lyceum Committee wishes it announced that the tickets for October 2 will be fifty cents to all people outside of the college. The ticket for every student was included in the registration fee.

### MOTION PICTURE MACHINE PURCHASED

Guilford Students to See Best Films In College Auditorium

An item of particular interest to the college students and to the community people as well, is the announcement of the arrival of the college's new motion picture machine.

The machine is of the type especially adapted for schools and churches which was, and is, also used extensively by the U. S. Army both here and abroad.

Although no definite program has yet been decided upon, there will be approximately ten shows given during the school year. It is probable that most of these will be given on the Saturday evenings, which have not already been scheduled for Lyceum numbers, socials or other particularly important programs. Others may be given during the week. Further announcements as to dates and programs will be made at an early date.

It is intended to show popular plays of the best type in the regular shows for which an admission of twenty-five cents will be charged. It is hoped also to use the machine in Seminars to show educational and industrial films of interest to special groups of students.

### MOTION PICTURE SCREEN DONATED TO COLLEGE

Mr. Roland Hill, a former Guilford student, has given the College a silk fibre stage screen. This donation completes the moving picture outfit that is now being installed. Mr. Hill either has charge of, or is intimately with, a number of moving picture theatres in North Carolina; two of these are in Greensboro.

## Guilford Enrollment Highest Since 1914

Statistics Regarding Students Reveal Interesting Facts

Up to Monday, September 27, two hundred and twenty four students have registered at Guilford, as compared with two hundred and sixteen at the same time last year. The group is slightly less representative, four fewer counties and one less state being represented than last year. The most striking change has been the increases in Yadkin, Davie, Montgomery and Perquimans Counties. As might be expected the great majority of the students come from nine counties of which Guilford is the center. Three other centers of Guilford influence will be noted in the counties about Goldsboro, at Belvidere in Perquimans and in Northhampton. To these should be added the district about Ivor, Virginia.

The age of the boys shows a slight decrease from last year, indicating a gradual decline toward the normal age of 18. The average for forty-eight new boys is 18.7 years against 18.8 years a year ago. The girls average is almost exactly the same as a year ago. For sixty-two new girls it is 18.1 years. One boy stated that he was born June 24, 1920. He is therefore the youngest member of the Freshman class. One girl put down the month and the date of her birth but neglected to mention the year although the question asked was "What is your age?"

The number of Friends is not quite up to the number last year. The Baptists show a decided gain while the other denominations have almost the same record as a year ago.

Of one hundred and thirteen new students fifty two are graduates from High School. Whiteston High School (Perquimans county) has contributed seven of its graduates to the Freshman Class. Pleasant Garden and Thomasville have sent three each and the following schools are each represented by two: Liberty, Pineland, Troy, Free Will Baptist Seminary, Greensboro, South Buffalo, Farmer, Rural Hall, High Point, Elkin, East Bend, Monticello. Fifteen other schools sent one graduate each.

The number of boys is one hundred exactly half of whom are new students. The number of girls is one hundred and twenty-four with two

### THE REV. H. O. NASH TALKS TO STUDENT BODY

The Rev. H. O. Nash, pastor of St. Andrew's Episcopal church, of Greensboro, gave a vivid exposition of the scriptural lesson, The Vine and the Branch, in chapel, Friday morning, September 24. The Reverend Mr. Nash is a man of broad and varied experience. He was for several years an officer in the British navy; taught seven years in a cathedral school in Canada, and has held his present position for the past two years.

## Obligations of Citizenship

Professor W. C. Jackson of North Carolina College for Women Speaks to Guilford Students

"Obligations of Citizenship" was the subject very ably discussed by Professor W. C. Jackson on Saturday evening Sept. 25th.

In beginning—Professor Jackson said that there were two things that all college students should know.

First, the principle of Evolution which is the principle of growth, or change. From early times History has shown that all institutions have passed through a process of development.

The second principle which every college student should know is love. People learn to work in the right way through the principle of love. The greatest thing in all the world is the power and force of love. It adds to efficiency, and helps to develop the spirit of brotherhood. Through love all humanity is bound together as one unit.

"It is all important that college students should know the principles of citizenship," said Professor Jackson. These principles may be compared to a stream which has five currents. The first current is a religious instinct. Every one possesses some sort of religious instinct and any one who puts this aside loses the real important things in life. The other principles are, education, the social instinct, economic and lastly to political. The political or state has control over all these principles in reality. The state has control over the school, also the social life which is the family. Speaking from the economic standpoint the state controls the industry and labor. Then lastly the state controls politically. "What then controls the state? The vote is the power that controls the state," said Professor Jackson. "The ballot is the most powerful thing in all the world at the present time. For this reason everyone should know the importance of democratic obligations. Every person who has the right to the ballot and does not vote is defeating the cause of democracy. Voting requires intelligence, information, and knowing the men who are the political leaders. With the ballot the American people are going to determine the great racial problem. The negroes are now demanding certain rights; the ballot, justice in court, education, defense from lynchings, etc. It is up to the people who vote to help solve this problem.

Another great question which must be determined by the ballot is the question of the Japanese in California, immigration, and so on. All such problems must be determined by the ballot. The legislature of North Carolina will do what the people ask and compel it to do. This will be done by the ballot. Is it not then all-important that the people of America awake to these obligations of citizenship?

Professor Jackson in closing read the words of the well known song, "America the Beautiful," which was very effective.

## Foot Ball Season Opens Saturday

Guilford to Meet Roanoke in High Point

Coach Doak is well pleased with his foot ball prospects for this year. With eight "letter" men forming the framework of the team, and the other positions filled with men from last year's scrub teams, this year's aggregation promises to be much stronger than that of the past season. Four of the men from last year's team are back field men. Besides the men of the scrub team who battled the "varsity" team all last season, a number of valuable men from high schools have reported for practice. Daily practices and frequent scrimmages are rapidly shaping the team for the opening game of the season.

Guilford will open her foot ball season by playing Roanoke College in High Point, October 2. The following is the probable line-up which Coach Doak will start in the game: Right end, J. C. Newlin. Newlin proved his ability to handle the "pig skin" last year. Right tackle, B. Shore. "Babe" never "wipes off the

(Continued on page 3.)

### GIRLS IN OUT-OF-DOOR EXERCISE BEFORE BREAKFAST

Did you see, or hear about, those 47 girls who reported for "gym" last Thursday morning before breakfast? Do you know what that means? It means that athletics are booming; it means that the Y. W. A. A. is beginning another year with greater prospects for success than ever before. This is an expression that leaped from the lips of an athletic-spirited Guilford girl.

Guilford considers itself fortunate in securing Miss Mildred Crabb as director. She comes full of enthusiasm, energetic, and with many new ideas. Miss Crabb, Miss Noles and Miss Roberts form the advisory committee.

Dovie Hayworth has been elected President of the Association. One of her characteristics is doing everything wholeheartedly, with the best of her ability. She has assumed her responsibilities with no less enthusiasm than usual.

The other members of the cabinet are: Secretary, Nelle Carrol; Treasurer, Florence Cox; Base ball Mgr., Edna Raiford; Basket ball Mgr., Isla Willis Thompson; Hiking Mgr. Okie Raiford.

In addition to these departments two others have been added this year. Volley ball has been started with Elizabeth Yates as manager, and Hazel Richardson is Social Chairman. This department has in charge the social functions of the Athletic Association. From time to time socials, picnics, camp suppers will be planned to promote athletics and to create a more democratic feeling among the girls.

With the leadership of the advisory committee and this excellent cabinet, and the cooperation of all the girls, surely there is a great future in store for the Y. W. A. A. of Guilford.
