NUMBER 3

News From Other Colleges

BEAUTY, BRAINS AND MONEY

The current freshman class at Princeton University asks only for "beauty, brains and money" in its girls.

These three endowments were listed most frequently in replies to a questionnaire circulated among the 671 members of the first-year class by the *Daily Princetonian*.

Some held out for blonde hair as the chief requirement and a few die-hards wanted red-headed women.

Given their choice between a varsity "P" and a Phi Beta Kappa key, 320 chose the key and 140 the letter.

To the question, "Do you drink?" 253 answered "No," and 213 said they liked theirs; while 235 smoke and 193 do not, 180 neither smoke nor drink.

On the question of a career, 253 said they haven't decided what they will do after graduation and 194 have decided.

Football is the class' favorite sport to watch, 320 voicing this view.—*The Bracketty-Ack*.

PROFESSOR AND STUDENT

Professor Homer F. Rainey, speaking before a group of educators at Bucknell, asserted that the ingenuity of professors in making up schemes to get students to study what they have no interest in studying, is amazing. The result is that we have a preponderance of teaching on the part of the professors and a minimum of learning on the part of the students.—*Connecticut College News*.

"ADAM AND EVE"

It is no longer the vain Eve who dolls up for Adam, but vice versa. When the time came to have the pictures taken for the annual, the Adams were the ones who disputed about what should be worn, while the Eves calmly agreed to wear the solemn drape. Perhaps these saff Adams will add a column of beauty hints to the *Pioneer* sometime soon.—*The Pioneer*.

THE MECHANICAL MAN

When Winnie Lightner crowned "I Want a Mechanical Man," some three years ago, she little realized the tremendous influence she was having on humanity. University of Idaho engineering students at once set out to fulfill her desire. After months of tireless effort on the behalf of the entire group of engineers, aided by Professors Gaus and Cruikshank, they are prepared to offer to the world a mechanical man constructed from a metal of recent discovery.—*Idaho Argonaut*.

Fall Play To Be Given November 24

As a part of the annual homecoming day program the Dramatic Council will present "The Enemy," Channing Pollock's play which will be given in the auditorium on the night of November 24. This play ran for a year in New York and is one of the best current plays.

The setting is in Austria during the World War. It tells of the two elements in Austria; the first favoring war, the second, seeing the folly of losing lives and property, against it.

"The Enemy" has a cast of ten characters, all of which have not yet been selected. It will be the first student-directed play given at Guilford College, David Parsons and Harris Moore being the two directors.

DEAR TO THE HEART OF ALUMNI

GUILFORD-ELON FRACAS "TURKEY DAY" CLASSIC

With the big fracas of the Guilford football season, the Elon game, creeping nearer and nearer, hopes of coming out on the right end of the score run high on the Quaker campus.

Revenge over Elon's victories of the last two years will be sweet if the fighting Quakers take them into the camp as is expected. Keeping in mind all the reverses that Guilford has met with so far this season there is plenty of power and fight in the team as has been shown in keeping teams of much larger schools on their toes right up to the final whistle. Most of the games have been lost by a small margin and a favorable break in many cases would have meant victory.

So far Coach Anderson's gridders have come through the season with few injuries which leave the team pretty much intact.

Now with the Elon game just a few weeks off the boys are starting to show the spirit that has filled the breasts of Guilford men for many years.

There is only one man on the squad this year who has been on a team that beat Elon. This means that nearly all of them have yet to experience the thrill of beating Guilford's big rival. With this as an added inducement every man is exerting himself to the utmost to be in a position to give Elon something to remember them by.

Having lost Pete Williams, all-conference back, and Rollins, stellar end, Elon is without their big guns of the last two campaigns. Waters, tackle, and Newsome and Latham, backs, are the outstanding players in Elon's line-up.

Elon, so far this season, has one victory chalked up for them. Roanoke and Randolph-Macon have beaten both Elon and Guilford, but the Quakers made a better showing in both games.

HOMECOMING DAY FEATURED BY GAME WITH ELON TEAM

Dramatic Council Presents Fall Play, "The Enemy" in Memorial Hall.

FULL PROGRAM OF EVENTS

Alumni Are Expected to Give Full Support to Make This a Memorable Day for Guilford.

The annual homecoming day at Guilford College is scheduled for November 25, Thanksgiving Day. Plans are nearly completed for the entertainment of Alumni and friends of the college. The faculty and students are eagerly awaiting the opportunity to aid the "Old Grad" in making homecoming a real success.

As inferred in the name, "Homecoming" signifies a return of old grads to their Alma Mater. Bringing their children and friends with them they point out objects and places which are deeply engraved in their memories.

It is a time when they meet old classmates and once again discuss things which happened "way back when we went to college."

The day's activities will begin with a sunrise worship service, which will be followed by a meeting for worship in the New Garden Friends Church at 10 o'clock. At 11 o'clock the Guilford Alumni hockey team will play the undergraduate women's team. Lunch will be served at 12:30 in Founders.

The chief feature of the day will be the Elon football game in Greensboro Memorial Stadium at 2 o'clock. Cousins, sons and other relatives of the alumni will be found in the "Quaker" lineup. Former classmates will be found in the stands, rooting for their team to bring home the bacon. If the boys win, there will be a bonfire that night.

Dinner, which is to be served in Founders and New Garden at 6:30, will be preceded by registration for the alumni in Founders.

OPEN HOUSE CELEBRATED AFTER USUAL FASHION

"Don't you wish we could just lock up our rooms?" "I sure hope they break their necks before they reach my room: I just swept all the dust under the bed and I'm scared it's going to blow out." These are a few of the sentiments expressed by the girls on the pseudo joyous occasion of "Open House."

At the first sound of the bell, Carl Jones rushed up the steps at Founders and thus became the leader of the visitors. Passing from room to room, they spoke to each owner, but remained longer in the rooms which harbored candy.

There seems to have been two crimes committed on the third floor of Founders. One girl who innocently treated her company to candy kisses is still in deep distress. 'Tis said that two (one was a professor) took advantage of her magnanimity and demanded more than manufactured kisses.

Several doors down the hall one girl still laments the loss of her two dogs, "Willie" (no relation to William Shakespeare) and "Pick" (not Pack Kyle's twin brother). The former owner of these dogs earnestly requests the kidnapper to be expressly kind to "Willie," who was suffering from a severe

Reunion at Little Brick School House

The Little Brick School, established in 1815, the forerunner of New Garden Boarding School and Guilford College, came to life again this summer when former teachers and pupils gathered at the ruins of its foundation, and exchanged memories of the days spent within the small structure. At this first reunion it was the expressed sentiment of the group to make the gathering an annual affair.

PROGRAM LED BY A CAPELLA CHOIR WITH ORCHESTRA

Haydn's Chorus, "The Heavens Are Telling," Given Spirited Setting.

SOLO BY DR. CAMPBELL

Devotional Led by Mr. Milner—History of Luther's Hymn Read by Mr. Noah.

For Friday's chapel an entertaining program featuring the choir and the orchestra was given under the direction of Professor Noah.

The choir gave a spirited interpretation of Haydn's chorus, "The Heavens Are Telling," including a trio, Mrs. Noah, Jewell Conrad, and Marvin Lindley.

Dr. Campbell sang a beautiful solo, "Eye Hath Not Seen, Ear Hath Not Heard," in which she was accompanied by Miss Gail Wilbur at the piano.

Mr. Noah read an account of "A Mighty Fortress Is Our God," a hymn composed by Martin Luther, who besides his other accomplishments was an amateur musician and is called the father of congregational church singing.

The devotional exercises were led by Clyde A. Milner. In his closing prayer, he asked that we might have open minds and spirits during moments of worship throughout our college life.

WILLIAM PENN DISCUSSED BY TOM SYKES IN CHAPEL

Occasion Is 250th Anniversary of the Landing of Penn in America.

STORY OF QUAKER PIONEER

On Tuesday morning, the 250th anniversary of Penn's landing in America, Tom Sykes gave a short resume of William Penn's achievements.

William Penn and a group of his fellow believers left England to come to America and to establish a colony of Friends in America. They were not welcome in the Puritan settlement in Massachusetts, nor were they tolerated in Maryland. Thus it was that the party after two months of ocean voyaging landed at New Castle on the Delaware.

Profiting by their knowledge of the colonies, they invited everyone to settle among them, and only co-operation was needed to make a successful and happy colony.

Penn himself and most of his followers were young but resourceful, nearly all in their late teens or early twenties. Young Penn had done a prodigious amount of work, mainly literary in character, before he crossed the ocean. He had written voluminously, suffered imprisonment often and spent his fortune furthering Quaker ideals.

Penn challenges every one of us to be the great men we might. We may drive forward to great progress only through a stronger spirit of citizenship and firmer belief in God.

SCIENCE MAJORS FORM A DISCUSSION GROUP

Students who are majoring in Biology, Chemistry, and Physics have formed an organization for discussion of topics of special interest, and to stimulate achievement in these fields.
