## BRUCE STUART NAMED

### ASSISTANT TO THE PRESIDENT

Greensboro, N.C.--Bruce Stewart, well known in the educational field in North Carolina, has been named Assistant to the President of Guilford College, Dr. Grimsley T. Hobbs.

A 1961 Guilford graduate who has been on the school's staff since 1967, Stewart succeeds Jerry Godard, who resigned to become Dean of Warren Wilson College in Swannanoa, N.C.

In his new position, Stewart will be concerned primarily with program coordination, institutional planning and community relations.

An immediate project is the direction of the Self-Study of the college for a report of its standards and trends over the past 10 years as well as a projection of the college into the next decade, a report important to the rating of the institution by the Southern Association of Colleges and Schools.

Since joining Guilford as Director of Admissions, Stewart has directed the Richardson Fellows Program and served as Coordinator of Special Academic Programs

As Assistant Professor of Education, he will continue to teach in a course for freshman, "Being Human in the Twentieth Century." "Contact with students is important," he declared. "I want to be directly involved with the people who all this is for."

In 1965, after teaching for two years at Page High School in Greensboro, he became

Dean of Student Affairs and teacher of economics and sociology at the N.C. School of the Arts in Winston-Salem.

He is a member of the board of the New Garden Friends School and has served as an educational consultant for a number of school systems. Stewart and his wife, Jean, assistant director of admissions at Guilford, live at 709 Plummer Dr. They have one daughter, 4-year-old Kathleen.

A native of Lynn, Mass., Stewart became a scholarship student at Guilford College in 1957. He received his master's degree in education from UNC-Chapel Hill and has done additional graduate study in educational administration at Chapel Hill, UNC-Greensboro, and Boston and Harvard Universities.

## BIODEGRADABILITY

(CPS)--Researchers at Pennsylvania State University speculate that a tin or steel can discarded today should be completely broken down by the year 2073. A glass bottle might last until the year 1,001,972. Aluminium cans which are disposed of in 1973 should be degraded by 2113
