Film, Speaker on China

Far East Reporter editor Maude Russell and the documentary film "Red Flag Canal" will afford students a rare opportunity to learn of the life and spirit of modern China. The film will be shown in the Leak Room on April 13; showtime is tentatively set for 8:15 p.m. After the film Maude Russell will answer students' questions and offer her reflections on China.

Maude Russell has been intimately acquainted with China for over half a century. She lived in China from 1917 to 1943 and returned to visit post revolutionary China in 1959 and 1972.

The eighty year old Maude Russell has devoted her life to promoting friendship between Chinese and Americans and shattering misconceptions and prejudices which the two peoples hold of each other. She continues to travel across the country for lectures and speaking engagements. She

has been doing this since the McCarthy era.

The film "Red Flag Canal" recounts the building of a canal through the side of a steep mountain range in order to bring water to one of the driest regions in China.

very primative methods were used. Large numbers of people participated proudly; role in the construction. "The effort was nothing short of heroic," said a member of the U.S.-China Peoples' Friendship Assoc.

The film shows something of the spirit, philosophy, and way of life in China today. Aki of the International Relations Club took the initiative in bringing the film to Guilford. He said the film was suggested to him by Frances Goldin, the activist who visited Guilford last month and that several students have expressed the desire to see it.

Construction took ten years; women played an important

The Guilfor

Journey Into Blackness

Journey into Blackness continues Sunday April 11 with emphasis on religion. The B.A.S.I.B. Black Ensemble will be featured as they sing gospel and spiritual songs. Dick Woodward will give the message of the evening.

The Guilford College student body and Community are cordially invited.

Choir News

The Guilford College Choir will be joining the Consortium Choirs of UNC-G, Greensboro College, Bennett College and A&T in a concert in conjunction with the Greensboro Symphony. The featured choral and symphony piece will be the ever-classic Beethoven's 9th Symphony. The concert is being performed at 8:15 this evening at the War Memorial Auditorium. This is the final major effort of the Guilford Choir this year. Their two remaining performances will be at the Quaker meeting in Sophia on April 19th and at the Commence-

Biophile Calender

The Biophile Club is organizing for next year's Calendar. We created the calendar for the whole Guilford community and we would like it to be from the whole Guilford community. If you have nature-oriented drawings, photographs, quotes, or original writings, please contact Cindy Norman (Hebbs #27, 294-1073.)

Bizarre Biophile Bazaar

Another bizarre bazaar was held Saturday, April 5th in front of the cafeteria. We were set up by 10:30, but business did not pick up until about 11:30 when people began gathering for lunch. Food was the most popular item (it seems many people come out of the cafeteria hungry) and of the foods for sale, the chocclate eclairs took the cake.

In addition to food we sold several types of plants (green and bright colored ones, the latter not being live) strange glass creatures (which they say came out of the Chemistry department); pressed flower notecards; a few crocheted items and one duck pinata (out of a number of pinatas).

The hit of the day was to be a silk-screening project -- the brain-child of Scot Oliver. Unfortunately no one got this design on their T-shirt because a thick ink gummed up the screen and finally the design was damaged. Scot says (with no promises!) he will TRY to remake the design and set up the screen again in a few weeks. So hang on to your shirts!

Late in the afternoon we moved over near where the picnic dinner was set up with a new batch of eclairs! However with the cold and the wind we, did not last long, so at about 5:30 we packed up and left. If you had things reserved, they are probably waiting for you in Hobbs room #27. Or if you missed us, there are a few flower notecards and some cloth flowers (or if you want a pinata we can make you a real good deal!) still for sale in Hobbs #25 or #27.

This Biophile Bazaar was much smaller in scale than any previous ones. But we were successful in selling almost all we had and so cleared about \$35. This money will be sent as a donation to an environmental organization of the Club's choice.

Worn tires?

Those worn tires you just discarded may still be giving you a smooth ride. Paving oads with used tires is just one of the solutions to the waste disposal problem posed by the 200 million tire casings abandoned every year. According to a study by the U.S. Protection Environmental Agency, tire casings can also be used to generate power and to serve as artificial reefs, impact absorbers on highways, and in retreaded tires. "Roadbuilding could solve the waste problem immediately and almost completely, reports the EPA. "The possibility of incorporating rubber into roads has been considered and tested sporadically over the past 45 years." EPA tests indicate that a 1/4 inch film of rubber should increase by 440 percent a road surface's ability to withstand expansion and contraction without cracking. Compounds made largely of reclaimed tires have been least 52 used in at road-surfacing projects in nine states.

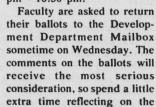

The cost is also practical. Rubber tires could also be a viable alternative to coal and other types of fuel. A british firm currently operates a plant which consumes 700 tires an hour and generates 3,500 pounds of steam an hour with savings of \$110 a day over the cost of coal. And, as fuel, there is reportedly little environmental difference between tires and good quality coal.

Excellence in Teaching Awards pm - 10:30 pm.

You now have the opportunity to see an outstanding professor rewarded for his or her contribution to the Guilford College community. Monday and Tuesday, students, faculty and staff received ballots asking them to nominate two teachers of the past academic year ('74-'75) to be considered for the "excellence in Teaching" awards. After giving your nominations serious thought you are asked to comment on the reasons for your choices and to return the ballot in the following manner on Wednesday April 9 -- Main Campus Students, Cafeteria, 11:30 am - 6:30 pm; Day Students, Grill Room, 11:30 am - 1:30 pm; Urban Students, Urban Center - 8:30 am - 2:00 pm and 5:30

The U.S. Fish and Wildlife Service further reports that 43 small tire reefs are now in place off the East Coast shores. The Service estimates that a billion tires would be needed to construct all the reefs required on the East Coast alone. Tires submerged in ocean water for 10 years show no signs of deterioration. nor does sea water appear to contaminate by prolonged exposure to tires," the EPA report states.

motives for your choices. The two recipients of the awards will receive a cash grant of \$500 contributed by the Board of Visitors. Traditionally known as a fund raising body, the Board is also interested in furthering the quality of education at Guilford College. This grant is to be used as the recipient chooses on projects relating to their field or in some way that will benefit their students or their teaching skills.

The final decision will rest with a Selection Committee consisting of David Hayworth and Charles M. Reid Jr. of the Board of Visitors, Cyril Harvey and Grimsley Hobbs of the Administration, and Mel Bringle of the Student-Scholarship Society. They will weigh not only the amount of nominations a professor receives, but the reasons for which they were nominated. The announcement and presentation of the awards will be at the commencement exercises May 10 by Mr. Lineberry, president of the Board of Visitors.

Be sure and get your nominations in on Wednesday. Take this opportunity to get the outstanding professors of Guilford College recognized.
