

Guilford Celebrates Earth Day!

Seniors Anne Belott and Monica Chevalier are leading the way this Earth Day, Friday, April 22, to mark a walking/biking trail from Guilford through the meadows/woods to the Kathleen Clay Edwards branch of the Greensboro Public Library. Twenty-five campus volunteers will help.

Interested students should meet at Jefferson Elementary with a picnic lunch.

Jefferson Elementary, the Piedmont Land Conservancy, the Sierra Club, the Center for Ecozoic Studies, the Center for Education, Imagination and Natural World, the Audubon Society, Guilford's Forevergreen, and several other local environmental organizations are joining forces with the Greensboro Public

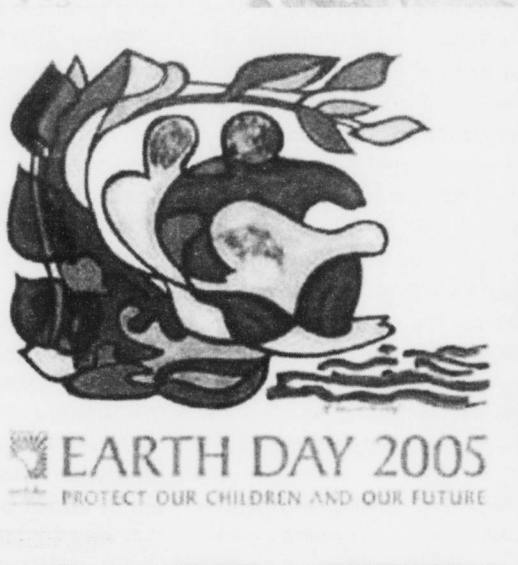

Library this Earth Day.

The library is known as the "environmental library" because its construction is completely environmentally friendly, with amenities like porous cement and environmental building materials.

At 6:30 p.m., talks will be held at the library about Thomas Berry, one of the nation's most influential ecologists and theologians," said Steve Sanford, assistant director of the events.

Also speaking are Mary Evelyn Tueker, Jon Grim, and Chip Holton.

On Saturday from 9 a.m., a city-wide festival will be held for Earth Day. For more information, contact Monica Chevalier or Anne Belott by e-mail.

Celebrate Earth Day

Kathleen Clay Edwards Branch Library • 1420 Price Park Dr. • Greensboro • 373-2923
