OF COURSE You Want Your Child to Win If any one told you that you were making it needlessly hard for your boy or your little daughter to get on in school you wouldn't believe it could be true. But are you giving your child or your children the good light they need for their home studying? In many of the schools light is still poor, so it is especially important to provide good light where children's home work is done. See that the lamps they use are of sufficient wattage to give plenty of light and that there can be no glare in their eyes, either direct or reflected. Poor light makes concentration difficult, brings on fatigue and drowsiness quickly, is damaging to young eyes, and is often responsible for faulty posture, which is a danger to be guarded against.
