

STUDY ABROAD

Announcement has recently been made by the Overseas Educational Institute of Hanover, N. H., of twenty-five full scholarships that it is offering to deserving students for study in France, Germany, and Switzerland.

A new development in modern educational organization is revealed in the program of the Institute, a school which, in addition to preparing for junior college and college entrance requirements, presents the opportunity of travel and association with European universities and the cultural advantages to be derived therefrom.

The Institute provides its entire year's program of travel and study abroad at a cost approximating an average year at a preparatory school or college, and through the medium of an experienced faculty, offers a high standard of scholarship. The majority of the time abroad is spent between the study centers of Grenoble, France, and Bonn, Germany, and the remainder of the time in excursion and residence in other important centers.

A complete program is sponsored by the institute, as well as a recreational requirement. In addition, Grenoble, in the French Alps, is near some of the great winter sports of Europe.

Further information pertaining to the Institute may be procured at the personnel bureau of this school. Requests for information pertaining to the scholarship should be addressed to the Scholarship Department, Overseas Educational Institute, Hanover, N. H.

THE young man is saying the reason he smokes Chesterfields is because they satisfy.

The young lady agrees with him She says: "They click with me, too. I'm not what you'd call a heavy smoker. But even I can tell that they're milder. Besides, I always

have a kind of feeling that Chesterfields taste better."

She's right. Chesterfields are just as pure and wholesome as Nature and Science can make them. And we have upwards of 90 millions of dollars invested to ensure their mildness and better taste.
