

HEALTH HINTS
From the Hygiene Class

A very serious injury is often caused by allowing the ends of a broken bone to move about before the arrival of a doctor. If you find yourself holding your book more than 12 inches from your eyes when reading, you should consult an eye specialist because you are probably far-sighted. Infection may be caused by the bite of a non-poisonous snake. Falls and automobile accidents are the two main causes of injuries to bones, joints, and muscles. Most of these accidents are due to carelessness. No bandage should be made very tight because it might cut off circulation and cause gangrene.

Y. W. C. A. Conference To Be At Blue Ridge

Salem Hopes to Send Delegates

The Y. W. C. A.-Y. M. C. A. Conference is to be held again this year at Blue Ridge, from June 9-18. The purpose of the conference is to give men and women students fresh insights that will lead to rich discoveries in the art of living. The building of a fellowship of imaginative, sensitive, devoted, and intelligent Christian men and women is the inevitable and rewarding outcome of the days of inquiry, reflection and comradeship spent in the mountain retreat.

This year, as usual, a resourceful group of men and women who are experimenting in the Christian spirit of living on campuses, in the church, and in various community groups and organizations are to be the leaders. Among them are: Mr. Raymond Currier, Student Volunteer Movement, New York City; Dr. E. McNeill Potat, Jr., Pullen Memorial Baptist Church, Raleigh, already well-known and loved at Salem; Mrs. Clyde Milner, Guilford College, and Mr. Kirby Page, author of New York City.

This year, the Salem Y. W. C. A. hopes to send at least one or two

—about Cigarettes

As to the cigarette paper on Chesterfields

THIS reel of cigarette paper is sufficient to make 42,000 Chesterfield Cigarettes. It is of the finest manufacture. In texture, in burning quality, in purity, it is as good as money can buy. Cut open a Chesterfield cigarette. Remove the tobacco and hold the paper up to the light. If you know about paper, you will at once note the uniform texture—no holes, no light and dark places. Note also

its dead white color. If the paper is made right—that is, uniform—the cigarette will burn more evenly. If the paper is made right—there will be no taste to it and there will be no odor from the burning paper.

Other manufacturers use good cigarette paper; but there is no better paper made than that used on Chesterfields. You can count on that!
