

SONG TO CELIA

Come, my Celia, let us prove,
While we may, the sports of love,
Time will not be ours forever;
He at length our goods will sever.
Spend not then his gifts in vain.
Suns that set may rise again,
But if once we lose this light,
'Tis with us perpetual night.
Why should we defer our joys?
Fame and rumor are but toys.
Cannot we delude the eyes
Of a few poor household spies,
Or his easier ears beguile,
So removed by our wile?
'Tis no sin love's fruit to steal,
But the sweet theft to reval.
To be taken, to be seen,
These have crimes accounted been.
—Ben Jonson.

The Federal Government is now
supplying millions to make it possible
for post-grads to keep on their
work for higher degrees. Graduate
students in their first years of study
for advanced degrees may earn from
15 dollars a month up to 30 dollars.
The quota for each school is 20 per
cent of those awarded masters' de-
grees and 75 per cent of those award-
ed doctors' degrees in 1934-35.

CHRISTMAS TRA-
DITIONS AT SALEM COL-
LEGE AND ACADEMY

campus where lighted candles are
placed in the windows. To one who
has spent four years at Salem, these
Christmas festivities are held dear-
er than any other part of the college
life, and are retained in the memory
as one of the most cherished tra-
ditions of our beloved Salem.

OF CORINNA'S
SINGING

When to her lute Corinna sings,
Her voice revives the leaden strings,
And doth in highest notes appear
As any challenged echo clear;
But when she doth of mourning
speak,
Even with her sighs the strings or
break

And as her lute doth live or die,
Led by her passion, so must I,
For when of pleasure she doth sing,
My thoughts enjoy a sudden spring,
But if she doth of sorrow speak,
Even from my heart the strings do
break.
—Thomas Campion.

DR. HOOD SPEAKS

(CONTINUED FROM PAGE ONE)
ple respond to different stimuli in
different ways. We add our own in-
terpretation to the raw material
around us.

He explained the scientific view
of seeing a table:

" We really see a reflexion of
light. The light rays reflected by
the table fall on the retina of the
eye and are transformed into nervous
energy. The nerve current ceases
to be a ray of light. The table is
first transformed into a ray of light
or a vibration, is changed into a
nerve current, which is changed into
a consciousness by which we call it a
table."

Dr. Hood has been professor of
Psychology at Davidson since 1920.
He received his A. B. Degree at
sity and his Ph. D. at Yale. He has
Southwestern Presbyterian Univer-
studied in France and England.

He is one of the outstanding psy-
chologists in the United States and
our Psychology Club was most for-
tunate in having him speak to us,
both two years ago when he spoke
on "Dreams" and Tuesday evening.

EXCHANGE HUMOR

Hot—How much did you say them
apples is?
Cha—Fifteen cents a peek.
Hot—What d'ya think I am—a
bird?

Lady: But I ordered a weiner
sandwich and you gave me fish.
Waiter: But this is a dog fish.

Mr. Dollar (arriving at a dinner
party with family): Please an-
nounce Mr. and Mrs. Dollar and
daughter.

New Butler (announcing in loud
voice): Three bucks.

AUTUMN

The naked hills lie wanton to the
breeze
The fields are rude, the groves un-
frocked.
Bare are the limbs of shameless
trees
Small wonder that the corn is
shocked!

—Skull and Bones.

He: Who spilled mustard on this
waffle.

She: How could you? This is a
lemon pie.

The proof of the cigarette
is in the smoking . . . and
it always will be

Smokers—both men and women—
want a cigarette to be mild—yet not flat
or insipid. At the same time they want
a cigarette that gives them taste—taste
they can enjoy.

Chesterfields are outstanding for mild-
ness—outstanding for better taste. You can
find that out by smoking them.

Just try them - Chesterfields are what they say they are
