

SCIENCE NEWS

Professor Roy Campbell has been named a member of the committee on the teaching of science in the preparatory school by the president of the North Carolina Academy of Science. The North Carolina Academy of Science will hold its annual meeting at Catawba College on Friday and Saturday, May 7th and 8th.

In conjunction with this meeting, the North Carolina branch of the American Chemical Society will hold its meeting on Saturday, May 8th. Professor Charles H. Higgins will attend this meeting and will bring up the matter of establishing a western division of the North Carolina section of the society.

THE COLLEGIATE REVIEW

(By Associated Collegiate Press) Because he cribbed on a two-hour exam, a student at Nebraska State College stood up before the 100 members of his zoology class and apologized to them, the instructor and the school.

Medals, cups, plaques and miscellaneous awards won by Don Lash, Indiana University's great distance-runner, during his track career total up to 117.

By cutting the shells of hens' eggs and glueing a small glass pane over the hole with petroleum jelly, experimenters, under the direction of Dr. Howard Kernkamp, of the University of Minnesota's farm, can watch the actual growth of baby chicks while in the shell.

The 10-year contract which Indiana University recently granted Bo McMillin, football coach who has directed the Hoosier grid teams to first division births during the last three years, will replace the previous five-year pact.

For the third successive year, the Illinois College swimming team submerged all opposition in a flood of firsts and seconds and won the championship of the Little Nineteen Conference.

"Hair-raising" was the comment of Prof. Anthony Zeleny, of the physics department at the University of Minnesota, regarding the passage of a million-volt current through his body. The current, at 100,000 cycles, changes direction so fast that it can do no harm, he explains.

A "Thank-God-It's-Friday Club," Intercollegiate chapter 2, has been established at Washington University to promote "end-of-the-week relaxation with temperate beer drinking and scholarly discussion of the week's events."

The 63-year-old freshman, Jules Lebegue, who enrolled at the University of Illinois in February, has left school to help his son on the farm. "Getting rid of the rust and putting on a little polish" is still his policy, for he is studying by correspondence.

The atomic theory is not new. It was advanced 2,000 years ago by Epicurus, the Greek philosopher, and Lucretius, the Latin poet, say professors at the University of Michigan.

Having a girl during spring quarter, calculates a math wizard at the University of Minnesota, is equivalent to carrying 10 extra hours, for which you get some credit but no honor points.

The Peace Council of Columbia College has presented the motion picture "All Quiet on the Western Front." It hopes that the picture had a real educational value. Proceeds go to financing the campus peace magazine.

IT'S TRUE! By Wiley Padan

ROBERT TAYLOR
PRESENTED JEAN HARLOW A HALF DOZEN "BLUES" RECORDS TO ADD TO HER HUGE COLLECTION!

JEAN HARLOW
METRO-GOLDWYN-PICTURES
SHE HAS TRAVELED TO ALL PARTS OF THE WORLD, YET IN ACTUAL LIFE SHE HAS NEVER BEEN FURTHER THAN NEW YORK!

REGINALD OWEN
IS CAST AS ROBERT TAYLOR'S BROTHER IN "PERSONAL PROPERTY"

E. E. CLIVE
GAVE ROBT TAYLOR HIS FIRST PROFESSIONAL JOB IN THE ROLE OF A MOVIE STAR AT THE HOLLYWOOD PLAYHOUSE.

LSO SAYS
DIRECTOR W.S. VAN DYKE, WHO HAS MADE PICTURES IN ALASKA, AFRICA AND THE SOUTH SEAS, DOESN'T LIKE TO TRAVEL!

JEAN HARLOW
PRESENTED HER MAID WITH A NEW ROADSTER AS A GIFT IN APPRECIATION OF LOYAL SERVICES.

New York, N. Y.—"IT'S TRUE! that six years ago director W. S. Van Dyke spoke to a group of school children. One of the youngsters wanted to know how to train herself to become a motion picture actress," says Wiley Padan. "Van Dyke advised her to read all the books she could lay her hands on and to seek out amateur models. She grew up and now plays Jean Harlow's rival in 'Personal Property.' Her name is Marla Shelton!"

When lessons, meetings, plays and outside activities pile up on the calendars of the girls at Stephens College, the president calls a "Stop day," 24 hours during which students can do what they please.

A new "entrance-exit" course in matrimony has been added to the Utah State Agriculture College curriculum. "Marriage and divorce" is the name of the study.

Ride-thumpers at the University of Colorado will have to curb their technique. The chief of police has promised a ticket to anyone who thumbs from the street instead of the curbing.

A woman is like a can of paint—she has to be stirred up before she's any good and she's hard to get off your hands.

New York, N. Y.—(ACP)—If the large numbers of people had higher purchasing power, they could increase their life span by at least seven years.

That is what Dr. Henry C. Sherman, Mitchell Professor of Chemistry at Columbia University, told the Academy of Medicine.

They would be able to take full advantage of new knowledge in the field of nutrition, he said — advantage that could aid them in warding off disease as well as senility.

"Undoubtedly the great majority of all people will be benefited, the general level of the public health will be raised, and the averages of our vital statistics improved at many points by the simple taking of a larger proportion of the needed nutritional calories in the form of the protective foods.

"Naturally, we also hope that a larger proportion of people will soon have ampler purchasing power. We realize that right relations between purchasing power and the general level of prices is essential to the ability of any community to get the full benefit of any new knowledge of nutrition," he explained.

"For it is now clear to any one who will study the evidence that nutrition has greater constructive potentiality than science has forseen, and that even in the everyday choice of food we are dealing with values

DO YOU KNOW?

1. What word in the English language contains all of the vowels in their consecutive order?
 2. Do the abbreviations A.D. and B.C. come before or after the date?
 3. How much did the United States pay for Alaska?
 4. Who wrote the "Heptameron"?
 5. Who wrote the opera "Carmen"?
- (Answers on Page 4)

which are above price for the health and efficiency, duration and dignity of human life."

Washington, D. C.—(ACP)—Mrs. Franklin D. Roosevelt got a big "kick" out of her visit to a "certain college," for she referred to it recently humorously in a talk to the 150 Congressional wives who came to Washington with her in 1932.

"I went to a certain college," she said, "to speak twice — in the afternoon and evening. The college president was anxious that I shake hands with the audience after both programs.

"I explained that I didn't make a practice of it. But the president said, 'If you have to cancel anything, I'd rather you shook hands and didn't give the lecture.'"

Cambridge, Mass.—(ACP)—When St. Petersburg, Florida was named the sunniest spot in America by Harvard University meteorologists, California cities were put in the shade—at least relatively.

Data of the scientists ended the long controversy between Florida and California by showing that St. Petersburg averages fewer than five sunless days a year.

The sunniest spot in the west is the California-Arizona border, which has more than 300 clear days a year.

Bones That Bleach: Procrastination and hesitation are the twin destroyers of many a success. Some unknown poet put it this way: On the Plains of Hesitation bleach The bones of unnumbered thousands, who at The dawn of victory sat down to wait — and Waiting, died.

THIS COLLEGIATE WORLD

(By Associated Collegiate Press) Lip-rouge second-hand — that's the only way University of Wisconsin men will smear it on.

An emphatic "phooey — sever," went up on the Badger campus in answer to the appeal of the Columbia College Men's Make-Up Society that men use lipstick in order to prevent winter-chapped and summer-dried lips.

"There can be hardly any doubt about the fate of potential lipstick users at Wisconsin," said one student, "They would be hooted en masse."

It used to be the clock-watcher who was prodded to work with both eyes on his task. Now the clock-watcher is being warned.

If you become so engrossed in doing athene or any other kind of work that you skip meals and glances at a time-piece, you may be headed for one of two things — geniusdom or a padded cell.

So says Prof. G. D. Higginson, of the psychology department at the University of Illinois.

It is a well-known fact, explains the professor, that there isn't much difference between a genius and an insane person. Both have intense powers of concentration for a certain subject. But a genius can think of other things when he tries; an insane person can't.

Sit-down strikes can be traced back to Jonah, the Biblical character who was swallowed by the whale. At least that's what a writer in the Michigan Daily proves from the scriptures.

Jonah didn't belong to the CIO, nor was he troubled with labor difficulties. He was displeased because his prophecy that Ninevah would fall because of its iniquities didn't materialize.

"But it displeaseth Jonah exceedingly, and he was angry." (Jonah 4:1). "Then Jonah went out of the city and sat on the east side of the city, and there made him a booth, and sat under it in the shadow, till he might see what would become of the city."

A salary for conducting a sit-down strike is something that Jane Pickens, Ann Caldwell and Pauline Nolan, co-eds at Wesley Jr. College, Greenville, Texas, didn't expect.

Tired of seeing the typical leg-flying of modern musical pictures, the girls walked into the lobby of Greenville's best theatre, sat down and declared they wouldn't move until they were permitted to see Deanna Durbin, the 14-year-old song-bird.

Snapping up the chance to get lively publicity, the manager got the coeds comfortable chairs and set up signs explaining that the girls were sitting there until they saw a Deanna Durbin picture, put them on the payroll and moved up the playing date for "Three Smart Girls" to the next week-end.

Hopes of becoming wealthy overnight prompt people to send samples of well-water, rocks and metals to the University of Minnesota's geology department for analysis.

An envelope received not long ago by Dr. George A. Thiel, associate professor of geology, contained a piece of metal and this letter:

"I found this in the gizzard of the goose I was cleaning. Is the yellow material gold?"

The "yellow material" turned out to be a piece of ordinary brass.

Another specimen that came thru the mail was a bottle of water with a film on the liquid surface. The sender said he took the water from his cistern: "Does it contain oil?"

Dr. Thiel answered that the water did contain oil — Number 1 fuel oil.

Because he wanted to know whether or not the piece of rock that crashed through his house window was a meteor, a man sent the specimen to Dr. Thiel.

It was only a clinker that had been blown out of the chimney of a nearby house.

Another person hoping for fabulous wealth wrote this letter to the geology department.

"I dreamed that there was gold in a gully near Dayton. I went and

MILESTONES

(With Apology To Time)

Lost. One piece of a perfectly good (?) mind belonging to Annette Mc-Neeley. It was voluntarily given away Saturday night, and is thought to be in the vicinity of Davidson, but now the owner is anxious to make amends.

Found. A future career for Mary Thomas to help her while away the next eight years. She can be a nurse in a hospital, and be a little help-mate to some interne.

Born. New faith in the breast of Evelyn McCarty when she saw the proof of her recent photograph. Said Miss McCarty of this beautiful likeness: "Ye Gods! I'm an angel!"

Shocked. Several in the audience let out a good, healthy gasp during the performance of "The Purple Rim," Saturday night, when "Widder" Trotman lit up.

Engagement. The engagement of Frank Gerard to play for the annual Junior-Senior frolic is looked forward to with interest. Orchestra funds for future entertainments should suffer a few pangs of regret.

Donated. One gardenia boutonniere to B. C. Dunford by Miss Virginia Lee in return for the rendition of the "Rhapsody" number in his recital. The community appreciates Miss Lee's service.

looked and found a nugget. Do you think there is more gold there?" The fellow got a snappy answer in two words: "Dream again!"

A "Work Needed For Success" item designed to forewarn young hopefuls is the statement of William LeBaron, production head of Paramount, that overnight success in motion pictures, without preliminary training is impossible.

A survey of the major studios disclosed that all recent "discoveries" have backgrounds of training and struggle.

"In the silent days overnight discoveries were possible," said LeBaron, "however, such phenomena are not probable now."

The Negro was being examined for a driver's license.

"And what is the white line in the middle of the road for?" he was asked.

"Fo' bicycles," was the reply.

United States. Only 698 of the victims were white. 3,628 lynchings reported in the
