

The Chinese Communists Forbid Exits

China

Over 2,000 foreigners, including 310 Americans, have been forbidden to leave China by the Communists there. The group was scheduled to leave Hong Kong this week, but the government would not let the landing craft which was to get them stop there. The United States government had ordered all the American officials to leave the country about two months ago. The State Department was taken by surprise when the Americans were not allowed to leave.

McCarthy

Ambassador Jessup has denied the accusations of Republican Senator McCarthy of Wisconsin that he has been affiliated with the Communist party in this country. McCarthy is chairman of a committee that is investigating Communism in the State Department personnel.

Jessup made a sweeping denial that he has ever been associated with any Communists by saying, "I am not a Communist and never have been a Communist". McCarthy is making his charge against Jessup on the basis of his association with Communist interested people.

Weather

Since heavy winds and snow storms swept Maine and New York state last week-end, it appeared that winter was here to stay for another long period. Jerome Mamas, chief of the United States Weather Bureau, has estimated that the eastern part of the United States will have thirty more days of unusually cold weather. The west is expected to have the usual good spring weather.

Antarctic

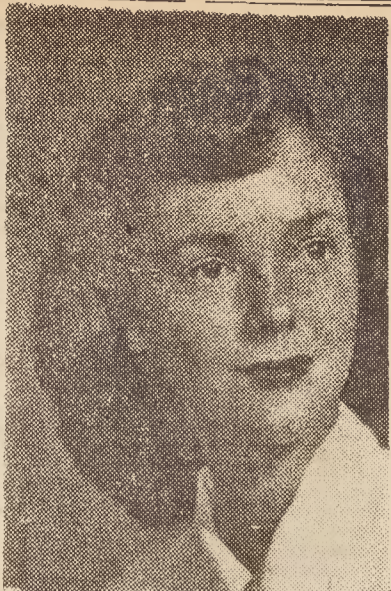

Rear Admiral Richard E. Byrd has stated that Secretary of Defense Johnson may allow him another trip to the Antarctic region. If the expedition is allowed it will be for the purpose of studying polar warfare, and about four thousand men are expected to go. The group will leave next October for five or six months in Little America.

This new expedition will be sponsored by the Army and Navy Air Forces, and the name of it will be Operation Highjump II. Admiral Byrd stated that the objectives of the trip would be to survey the area for minerals and to train men for possible polar warfare.

Marshals Are Elected By Junior Class

Six marshals to serve during the 1950-51 session at Salem College were elected this week by vote of the rising senior class. They are Ruth Hine, who will represent the day students as marshal, and five boarding students, Lou Davis of Morganton, Carolyn Butcher of Charlotte, Jane Parker of Goldsboro, Carolyn Harris of Rocky Mount, and Jane Watson of Clearwater, Fla. They are members of the rising junior class.

The new marshals will begin their duties this month, replacing the 1949-50 marshals. Both groups are to serve at May Day exercises and at commencement; at other campus events the new marshals will be in charge of seating arrangements and usher duty. They will be headed by Miss Martha Bowman of Hickory, who was elected chief marshal last week.

Lou Davis, daughter of Mr. and Mrs. C. V. Davis of Morganton, is a member of the 1950 May Court. She is majoring in History. Before coming to Salem, she attended St. Mary's School in Raleigh.

Carolyn Butcher, daughter of Mr. and Mrs. W. R. Butcher of Charlotte, is majoring in home economics. She is a sophomore representative to the legislative board of Student Government Association, and a 1948 graduate of Central High School.

Another home economics major is Jane Watson, daughter of Mr. and Mrs. F. E. Watson of Clearwater, Fla. She is a member of the Pierrette Players, and has belonged to the varsity hockey team and the Modern Dance Club. She is a graduate of Clearwater High School.

Spring Sports Season Begins

The spring sports season at Salem got underway at the beginning of this week. At present, it might appear that nature does not approve of our plan and is sending cold wet days to prevent us from enjoying these outdoor sports. Nevertheless in clear weather from now to the end of school, you will be seeing girls head toward the tennis courts for their morning classes, and to the softball field in the late afternoon.

Also, there are those who are taking advanced golf from Mr. Edwards out at Reynolds Park. They go out once a week for a two hour class. (By the way, if you are interested in knowing how Mr. E.'s knee is, just ask one of these golf girls—they can draw you a picture!)

For the students who do not go in for the outdoor life, there is a modern dance class in the gym. But don't let this fool you. It's not nearly as easy as it looks.

Archery is another one of our spring sports. Toward the middle of April the swimming pool will open. This is not for credit, but it is for swimming and sunbathing for fun!

Leach Speaks On Need For World Gov't.

Robert Leach, assistant professor of history, addressed the study group of Winston-Salem Council of Jewish Women Tuesday night on "Prospects of World Government Now," discussing various phases of World Federation.

He said, "World Federalism would draw the whole world into one framework of government. Every nation would delegate to this group the power to control the atom bomb and factories that produce war materials. An international police government would be set up to check on this."

U. S. Pattern

"This world government would be patterned after the United States, where the 48 states live peacefully despite stresses and strains between political and economic groups as there is a responsible Government in Washington. In this manner, World Federalism would be the responsible government."

"France and England have already agreed to join a world government. Measures are now before our Congress to this effect. Representative Thurmon Chatham and Senator Frank Graham have already indicated they are in favor of world government."

"Would Russia join a world government? They have already attacked the idea. Possibly Russia fears World Federation as an imperialistic threat. Possibly she wouldn't join as she wouldn't open her borders to let the concentration camps and economic frugalities be seen by other people."

Possible Infiltration

"If she did join she might try to infiltrate this world government unless it is well set up and carefully guarded."

"The suggestion has been made that Russia's suspicion of us be allayed by concrete evidences of friendship and help rather than by drum beating. The American Friends sent \$25,000 worth of streptomycin for tubercular children in Russia, carefully stamped as a gift of the American Friends."

"Ambulance units, also gifts of the Friends, operated behind communist lines in China and were asked by the communists to continue their good work."

"Direct help to the people of Russia, plus a Marshall Plan for Southeast Asia to help alleviate the
