Salemites Approve New Point System

The student body voted in chapel on Thursday to accept several amendments to the constitution. These amendments will bring about a separation of powers and create two new major student council offices. The new constitution will go into effect with the elections this spring.

The amendments to the constitution will put into effect the division of the student government into an executive board, a legislative board and a judicial board. The executive board will consist of the president, the vice president, the secretary and the treasurer of student government and the chairman and the secretary of the judicial board. The legislative board will consist of the officers who now make up the student council. The judicial board will consist of the chairman and secretary of the judicial board, the four class presidents, the presidents of the dormitories, one day-student representative and the president of the stee gee as an ex-officio member. These changes, it was felt, would help to better distribute the time-consuming work of the student government among more people.

These changes will affect the duties of both the major officers and the branches of the student government. The main duties of the newly created executive department are to co-ordinate the functions of the Student Council and to act as a liaison between the students and the faculty. The duties of the Legislative board are to consider petitions, to conduct orientation of new student government officers and new students, to act as a nominating committee, and to act as a clearing house for all campus extra-curricular activities. Two new duties have also been given to the Legislative Board. It will consider for acceptance any organization on campus which wishes to organize and will enforce the point system.

The Judicial Board will deal with infractions of regulations. It will also act as an impeachment board and have the power to remove council members from office. Another addition to the constitution is that any student holding a major office who is on academic or social probation will automatically be asked to resign. The student council felt that a council member who was on probation would not be qualified to pass judgment on the actions of others.

There was also an amendment to replace the house presidents with a house council in each dormitory which consists of the house presidents and hall presidents. These new house councils will still have the function of trying minor cases dealing with dormitory life which the house presidents council formerly dealt with.

The point system, although it is not itself a part of the constitution, was presented with the amendments because the enforcement of the point system is included as part of the duties of the legislative branch of the student council. The point system is designed to distribute responsibility among many students and to prevent one student from having too many time consuming duties to carry out. The point system assigns a specific number of points to the main positions of responsibility. No student may carry more than ten points and freshmen have a maximum of eight points which they may carry.
