Watson To Be SGA President Election Results Announced

by Allison Buice

"Judy Watson will be our new SGA president," announced Elections' Committee Chairman Denise Bennick. Election results were tabulated shortly after 1 p.m. yesterday. "We're very pleased with the voting turnout and with the new voting process, where students fill out ballots in the Refectory," added Bennick.

Upon hearing the results of the voting, Watson, a rising senior from Arrington, Va., said, "There are so many things we have to do. I hope every student will work with me and Executive Board in making SGA even stronger. I

look forward to working with next year's student body." Watson ran unopposed for the presidency.

Liz Denton, newly-elected SGA vice-president was unavailable for comment. Denton also ran unopposed for her position.

Gwen Campbell, after being informed of her victory as SGA treasurer, said, "I am truly excited about the busy year ahead of us and I'm hoping everyone will share with me their ideas on making our budget the most effective and economical possible." Campbell is a rising junior from Deland, Fla.

Other new members of Executive Board include: Lee Ann Manning, secretary of SGA; Lisa Abt, chairman to Honor Council; and Johanna Miller, chairman to Interdorm, all who ran unopposed. None were available for comment.

Other victors include: Amy Shafer, secretary of Honor Council; Susan Shurling, secretary of Interdorm; Susan Britt Murphrey, Social Activities Committee chairman; Margaret Bonner Adams, Big-4 chairman; Sara Hinkle, director of Student Activities; Leigh Flippin, Fall Fest chairman; See Elections, back page.

Salem Delegates To Attend Model United Nations

by Virginia Wagenheim

Salem will be one of 143 colleges and universities attending National Model United Nations in New York City April 6 through 10.

Seventeen Salem students will represent Poland at this year's conference at the Grand Hyatt Hotel. This is the ninth year Salem has participated, having represented the Soviet Union, East Germany, Hungary, and small

African nations in the past.

Since their appointment to the delegation early this fall, the students have been researching Poland's position on a variety of issues. Simulated committees deal with every facet of the country's political, economic, and social policy. Some of the topics on this year's agenda are the ban on the use of nuclear weapons against non-nuclear states, the reduction of military budgets and, in

general, "what Poland thinks."

The Salem contingents' advisor, Dr. Jerry Pubantz, is the faculty advisor's representative to the National Collegiate Conference Association, which sponsors the 59 year old program, and is vice-president of its executive board in charge of faculty programs. He will accompany the group to New York, but once there, the conference is entirely student-run.

In addition to discovering the nature of the United Nations and the country they represent, students develop skills in negotiation and compromise, public speaking, statesmanship, parliamentary procedure, and drafting resolutions.

"This and the opportunity to work with students from other parts of the United States, Canada, and Puerto Rico, make the Model United Nations a valuable experience," says Pubantz.

The 1982 Salem delegation includes: Mary Acker; Ferebee Brown; Katherine Craver; Jodi Critchfield; Josie Crolley;

Deborah Drylie; Carol Essa; Angeline Fleeman, permanent representative; Vicki Gaines; Julia Holdford, head delegate;

Kathy Mattson; Gail Moore, Foreign Minister; Allyson Potts; Martha Pritchard; Serena Sapuppo; Margaret Weant; Shari White.

Symposium Slated for March 30

by Carla Blakely

A symposium will be held March 30 in the Fine Arts Center for high school sophomores and juniors interested in a possible career in the areas of Biology, Chemistry, Computer Science, Mathematics, Medical Research, Medicine and Psychology.

These fields are becoming more female-oriented as time progresses and as Shakespeare once said, "Women are the books, the arts, the academics, that show, contain, and nourish all the world."

Women representing each of the seven fields will speak on job opportunities in the future and educational preparation needed, plus each woman scientist will describe her own work.

Dr. Estelle Ramey, Professor of Physiology and Biophysics at Georgetown University Medical School, will give opening remarks and the keynote address. She has written numerous scientific articles and is past president of the Association of Women in Science.

Dr. George McKnight,

who is coordinating the program, says he hopes that about 400 students will take part in the program which is being funded by a grant from the Mary Reynolds Babcock Foundation.

The schedule for the day includes three workshops and a panel discussion at the end of the symposium. The closing panel discussion will deal with how the women combine their personal and family lives with their careers and the personal satisfactions and rewards they gain through their careers as scientists and mathematicians.
