

Yesterday I went to visit some of the big forests. In them were beautiful pines and fir trees. You just can not imagine the number of acres of forest in Sweden and Norway.

While we were on the way to the forests, we passed several reindeer farms. I am sure Santa will have no trouble finding a good team for next year.

You should be here to ski. The people have much fun.

I'll be home in time for school and will tell you more about my trip.

Your friend,
Harold Jernigan

School obtains Sound System

Succeeds in Sale of Ads

The Parent Teachers' Association of Bailey High School has succeeded in getting some very much needed equipment for the school. This material is a Sound System, a device which is very much needed.

The school radio will be placed in the office. From the office wires will be run to every classroom as well as the auditorium. In every room there will be a loud speaker. If a class wants to hear a certain program, all the teacher has to do is go down to the office and tune in the station. The pupils can stay in the classroom and listen to the program.

Mr. Walker can talk to all rooms over the loud speaker while sitting in his office.

The money used for this equipment was obtained by selling ads. It is said that the merchants will see the advertising sheet more than before.

The school wishes to thank the P.T.A. for their splendid work that will so much improve the standard of our school.
