

COMMUNITY INTERESTED IN
TURKEY RAISING

Dorothy Bissette

Interest in turkey raising has caused many people in this community to begin a new project this year.

Mr. Z. C. Bissette has been raising turkeys for the last ten years, but he has been raising them on a large scale production for only three years. His son, Zacharia Bissette, has been raising turkeys on a large scale production for two years.

Others that have just begun to raise turkeys are Mrs. Millard Morgan, Mrs. Ralph Strickland, Mr. Rodney Finch, and Albert Lamm.

These people are not only raising turkeys for their home use but for the use of the community.

SOUND SYSTEM USED FREQUENTLY

Lizzie Mae Manning

Many educational programs heard over the sound system in this school have been and will continue to be beneficial.

Since the seniors were to give a radio speech in their English work, giving these talks over the sound system has been good training for them. Mrs. Farmer requested that these talks be broadcasted from the office to the eleventh grade class.

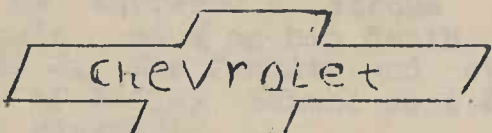

The Juniors, when they gave their chapel program this month, surprised the high school by presenting "The Man on the Street" program over the sound system. The novelty of the program was highly commented upon.

Educational programs have been heard for the last two Mondays and will continue until December 16, 1940. This series of programs, broadcasted from 2:30 to 3:00 P. M. under the title "Know Your State Government," are sponsored by the history class of Hugh Morson High School, Raleigh.
