

A Seat That Moved

Have you ^{W. M.} ever seen a seat that would move of its own accord? Well, my friend Percy has, and this is the story.

One day while we were in Canada, Percy decided to go fishing. Later becoming tired, Percy took his seat on a knot protruding from the grass. But no sooner than done Percy found himself minus a seat except for the weeds and the mud.

Perplexed, Percy, hearing a noise, picked up a stick and hurled it in that direction. He made a direct hit and came up with a turtle weighing 25 3/4 pounds. His disappearing seat was explained.

County Teachers Work Toward Specific Goals

Four meetings for professional improvement and co-ordination of county activities will be held at Nashville for all county teachers during the first two months of school.

The teachers are divided into nine groups, each group working out specific plans for improving the subject under study.

Mrs. A. H. Farmer heads the English group and Mr. M. W. Weaver, the high school curriculum group.

The English group has joined the English Council 100 per cent.

MEALS SERVED DAILY

Between three hundred fifty and four hundred students are being fed daily in the lunch room.
