K. D. Pyatt, Jr.	Billy Ruffin	Arnold Stanton	Bobby Watson	Lydia Alexander	Marilyn Best	Joyce Britt	Gladys Costin	Betty Jean Gainey	Lillian Haynes

Clerk: Maybe I can help you make a selection. Now here's a sweet little sentiment. "To the on-

ly girl I ever loved." Jimmy Knight: I'll take a dozen of those.

From Danville, Virginia, comes this appropriate poem: The lecture's long, the subject's deep. If the prof should stop before I wake, Somebody punch me—for goodness sake!

MORE POWER TO YOU!
Today, new production miracles are in the making. The electric companies have doubled the amount of electricity available before the last war. And they're still stepping up the pace.
Your Carolina Power & Light Company is planning to add a 100,000 horse power unit in June, known as the new Goldsboro Electric Steam Generating Plant, located at Quaker Neck. This plant will go into service supplying the needs in this area and other sections of our state. This is a part of our building program—it means more power for you!
