Two Seniors Are Chosen Rotary Couple For Month of March

Jamie Council and Richard McLean have been selected as this month's Rotary Couple. Jamie is involved in many activities inside and outside of school. Within the school she is Chairman of the Social

Phil Returns

At the end of March of last year, one of Senior High's most respected and appreciated members bid farewell to his co-workers, friends and students. Coach Phil Harris, left Senior High to become a member of Boddie Noell Enterprises as manager of a Hardee's in Wilmington.

His ideas were in the interest of financial betterment, which he hoped to gain. Coach Harris says, "because of emotional ties and coaching the Gryphons, I felt that when you do something you really enjoy, it's much more important than money."

Committee, a member of the President's Cabinet, the National Honor Society, and Advertising Manager of the Hi-Noc-Ar. She is also the Song Leader for the Now Generation Singers and the church pianist for Arlington Street Baptist Church. Her hobbies include music, tennis, bicycling, and dancing.

When questioned about her feelings on being selected as this month's Rotary Girl, she replied, "I was really happy and surprised. I enjoyed the first luncheon so much -- Charles Dunn (director of the SBI) was guest speaker and he was very

Coach Phil Harris has returned to us, and we welcome him with open arms. He is presently a full-time Driver's Education instructor, and next year he will obtain coaching duties. Welcome back Coach Harris, and we really missed you while you were away!

interesting."

Richard McLean, this month's Rotary Boy, also enjoys being involved in school activities and outside activities. Among his school activities are the Fire Drill Committee, the Elections Committee, the Senior Privileges Committee, and the first semester Senior Class Vice-President. Richard's outside activities include the Christian Education Committee, the Order of the Arrow (Brotherhood Member), and he is an Eagle Scout. His hobbies include bicycling, basketball, swimming, and camping.

When asked about his feelings when informed of his being selected as March's Rotary Boy Richard replied, "When I was informed that I had been chosen as Rotary Boy for the Month of March, I was both pleased and surprised. Mr. Dunn (head of the S.B.I.) was truly interesting."

Moon Affects Wolves- Instead of Males

Well girls, spring is right around the corner and love should be blossoming all over the place. SHOULD! What's happening? How come we girls are sitting around like magnets? After some research (and a lot of experience) I have found that the reason boys tend not to date as much has to do with the position of the moon. That's right. That ole' Carolina moon completely cuts off dating tendencies within boys. He does an especially good job during this time of year. But don't fret girls. We can't move the moon, but there is a way that we can get the boys out and under him-- and I don't mean camping out under the stars either.

First of all, as much as we hate to admit it, that ole' man in the moon is sneaky. He makes himself all bright and full and fills us girls up with romance. So naturally we roam around at night, trying to sneak up on our prey. A short ride around the town usually results in a find of at least 4 or more males together somewhere. So why should the boys ask us out separately when they know almost for sure (especially when the moon is full) that the girls will be out tonight! All they do is hang out somewhere until the girls get there or vice-versa and the guys don't need to spend a dime.

We girls have got to join together and get mother nature and her moon back in the right orbit. Like I said before, though - there is a way to fight the moon. Instead of going out and stalking out the males, let them stalk us. You say the effect of a full moon is too great? Never. Get a bunch of girls together and pull down the shades so that no rays of the moon reflect on your

heart. And by staying in a group of girls, if the moonlight does happen to sneak in, then you'll be able to resist the temptation to get out. Unless the boys are a little on the queer side, you'll find they may get tired of each other without any female companionship.

But keep another thing in mind. The moon has an ill affect on the male population between the years 15-18. It is a known fact that the moon has something to do with the tides. Well, it also has to do with "ties." Get it? -- binds, seriousness, the whole works-- they hate it. Beware of the moon during those "wonder years", for he can be tricky. But more than that, beware of the boys. Like the moon, sometimes you detect a winking eye from guys, but don't let it get to you. Remember all it is is a wink. Or sometimes a certain male may give off a gorgeous, tantalizing light, but again, like the moon, it cannot be seen the next day.

Girls, read your almanac and study the course of the moon seriously. One day you'll find yourself in a canoe (probably rowing) with a boy and the moon will be high overhead reflecting in the water. For the first time he will realize that sometimes the force of a girl can outdo that of the moon. So, until that far-off date, wear sunglasses if you go out at night, stay home on "full-moon" Saturday nights, and above all, don't even think about tying a boy down! Researchers say that for some unknown reason the moon is maturing in age a lot faster these days and that's what I want to see the moon reflect down on these boys - MATURITY!

Your senior year is a time for planning

Air Force Delayed Enlistment is one of the best plans. It's a program that guarantees your Air Force career interest before you graduate. You keep going to school and enjoying your senior year. After graduation, your Air Force job and some of the finest technical training in the world is ready. That's Delayed Enlistment. Find out about it now. Contact
