REPORT ON A GOOD NEIGHBOR

In one of the weekly meetings of the Rotary Club, A.Hector Sosa, of La Plata, Argentina, who is the District Scholarship Student at the Appalachian State Teachers College in Boone, gave a talk about his country and his impressions of our section of the United States.

He emphasized the importance of the Scholarships in promoting mutual understanding among our countries.

The economical and grographical conditions-say the speaker-are similar in both countries.In order to say,not only the economical and geographical conditions are alike, but the way the people think and live.

In Argentina the children may begin kindergartens which are free to the public.Also the universities which are supported by the Federal Government are open to everyone without tuition.

Argentina is the world's larges producer and exporter of linseed, the largest exproter of chilled beef and corn and the second larges exporter of wheat and wool.It is also the principal exporter of hide to the United States.

The population is estimated at eighteen million and is one third the size of the United States.

The Argentine Constitution was patterned after ours.Therefore the political organization of the two countries is much alike.

Argentina is placed as far south of the equator as we are nort which makes the climate in the nort warm and in the south cold.Also their seasons are opposite from our

His impression of the United States was good.He was delighted with the friendly hospitality of the southern people,especially in the western part of North Carolina.

This Scholarship is doing a very fine job in bringing good will among the nations of North and South America.
