

Ninth Grade News

Tuesday March 4th we elected our class colors and flower. They are as follows: Class color - Crimson Red and Silver. Flower - Rose.

Seven of our students were eligible to join the Beta Club. They are: Betty Jean Crawford, Tommy Billingsly, Tina Harbison, Virginia Cleaveland, Georgetta Penland, Jeanette Brown, Jack Cabe.

Carolyn Carpenter

Tenth Grade News

Spring is almost here after having two wonderful months of ice-skating.

Along with our winter months, we had two pupils enter our school, Shirley Huston and Walter Wilson. We are very glad to have them.

All last week Biology class rehearsed for a program that was to be given on radio Friday. We are proud to say it was a success.

Judy Chastain

Eleventh Grade News

The Junior class has been very busy planning the trip to Washington, which we are all excited about. The class plans to leave April 25th, return May 2nd.

After our trip to Washington we will make plans for our banquet. We have selected our flower, motto, and colors. Our flower is the Carnation; our motto is, "There is a little good in the worst of us;

A little bad in the best of us, and little it be who's any of us to talk about the rest of us." The colors are, pink and blue.

We had a very successful Junior-Senior play in which all of the students did a very good job.

Jean Elmore

Senior News

"Desperate Ambrose" was successful. We made a hundred and forty dollars and fifth cents. We had a full house and each one seemed to enjoy it. We wish to thank the ushers and everyone connected with it. We all had fun at rehearsals and this will be one of our brightest

memories in our senior year. We all enjoyed working with Mrs. Gillis, and we thank her for her kindness and patience during our senior year.

Barbara Wilson

Clemesta

A group of science students enjoyed a trip to Clemson Collage Saturday, March 29, to attend the annual program of the collage, "Clemesta". The first four letters of "Clemesta" stands for Clemson and the E, S, T, A, stand for engineering, science textiles and agriculture. We were invited to dinner and then a tour of the collage projects. A very interesting trip was into the Chemistry building to see a liquid air demonstration. The machinery in the Chemistry building was expensive and very useful such as the photographic microscope and analyzers. The geological exhibit was very interesting with many kinds of stones and fossils.

The tour of the textile building was very interesting. Starting from the very first step to the last we were shown how the cotton is woven into thread and then material. We saw the actual weaving of the Clemson Tiger Head.

The trip was very interesting and everyone enjoyed it.

Tina Harbison

The annual "Field Day" for high school students will be held at Cullowhee College Saturday, April 5th.

Students with the highest scholastic records have been chosen to represent their class and Highlands High School in the different subjects. Representing Highlands School are: Ninth Grade: Tina Harbison, General Science, Betty Jean Crawford, Civics. Tenth Grade: Jimmy Calloway, Biology and Mechanical English. Don Hopper, Current Affairs. Johnny Cleaveland, Algebra II, Walter Wilson, Algebra I. Linda Potts, Essay Contest, Jean Wood, American History. Eleventh Grades: James Newton, Chemistry and Georgia Cleaveland, Spelling. Twelfth Grade: Ella Cabe, English Lit., Linda Calloway, General Survey of Science, and Jo Anne Dardy, French Grammar.

We hope all the students going to Cullowhee will rank high in the tests.
